Kola Teja

PERSONAL DETAILS

Current Location	Narasaraopet
Date of Birth	January 26, 2003
Male	

EDUCATION

Graduation

Course	B.Tech/B.E. (Electrical and Electronics)
College	Jawaharlal Nehru Technological University (JNTU), Hyderabad
Score	7.6%
Course	B.Tech/B.E. (Electrical)
College	Jawaharlal Nehru Technological University (JNTU), Hyderabad

Schooling	Class XII	Class X
Board Name	Andhra Pradesh	Andhra Pradesh
Medium	English	English
Year of Passing	2021	2019
Score	92%	97%

SKILLS

- Data Analytics

LANGUAGES KNOWN

English (Both)

CERTIFICATIONS

- IT Service Management Foundation based on ISO/IEC 20000

INTERNSHIPS

Embrizon technologies | June 2024 - August 2024

- During my internship, I completed a comprehensive project on Sales Prediction, where I utilized data preprocessing techniques, exploratory data analysis, and machine learning algorithms to build a reliable predictive model. The project focused on forecasting future sales trends to support data-driven business decision-making, showcasing my ability to work with structured datasets and deliver actionable insight

PROJECTS

Sales prediction | June 2024 - August 2024

- The goal of this project was to develop a machine learning-based predictive model to forecast future sales using historical data. The model aims to support businesses in making strategic decisions related to inventory, marketing, and resource planning by identifying trends and patterns in past sales data.

Responsibilities & Tasks:

• Collected and preprocessed large datasets containing historical sales records, handling missing values, outliers, and categorical variables.
• Performed Exploratory Data Analysis (EDA) to identify key factors affecting sales, seasonal trends, and customer behavior.
• Implemented various machine learning algorithms such as Linear Regression, Random Forest, and Decision Trees to build and compare prediction models.
• Evaluated model performance using metrics like Mean Absolute Error (MAE), Root Mean Squared Error (RMSE), and R-squared to select the best-fit model.
• Created intuitive data visualizations using Matplotlib and Seaborn to represent insights

Sales prediction using machine learning | June 2024 - August 2024

- The goal of this project was to develop a machine learning-based predictive model to forecast future sales using historical data. The model aims to support businesses in making strategic decisions related to inventory, marketing, and resource planning by identifying trends and patterns in past sales data.

Responsibilities & Tasks:

• Collected and preprocessed large datasets containing historical sales records, handling missing values, outliers, and categorical variables.
• Performed Exploratory Data Analysis (EDA) to identify key factors affecting sales, seasonal trends, and customer behavior.
• Implemented various machine learning algorithms such as Linear Regression, Random Forest, and Decision Trees to build and compare prediction models.
• Evaluated model performance using metrics like Mean Absolute Error (MAE), Root Mean Squared Error (RMSE), and R-squared to select the best-fit model.
• Created intuitive data visualizations using Matplotlib and Seaborn to represent insights

WORK EXPERIENCE

DELPHI TVS | December 2024 - April 2025

- Quality Analyst:Product quality checking

ACHIEVEMENTS

- Department topper in B.Tech/B.E.
- Top 3 in class in B.Tech/B.E.
- Top 3 in class in school
