Sree Sahithi Guthikonda

Data Engineer

sreesahithi1998@gmail.com | +1 (469) 490-1785 | Arlington, TX | LinkedIn

SUMMARY

Data Engineer with 5+ years of experience in Data Extraction, Data Modeling, Big Data architecture, and Cloud-based data pipelines using AWS and Azure. Proficient in Python, Spark, Hadoop, and real-time data processing with Kafka and Flume. Skilled in building scalable ETL workflows, data analytics, and visualization using Power BI, Tableau, and SQL-based reporting tools. Strong expertise in developing and deploying end-to-end data solutions leveraging Azure Data Factory, Synapse Analytics, and AWS Redshift.

SKILLS

Methodology: SDLC, Agile, Waterfall
Programming Language: R, Python, SQL
IDE's: PyCharm, Jupyter Notebook, Visual Studio Code
ML Algoritham: Linear Regression, Logistic Regression, Decision Trees, Supervised Learning, Unsupervised Learning, Classification, SVM, Random Forests, Naive Bayes, KNN, K Means, CNN
Big Data Ecosystem: Hadoop, MapReduce, Hive, Apache Spark, Pig
Framework: Kafka, Airflow, Snowflake, Django, Docker
Cloud Technologies: AWS S3, EMR, Glue, Athena, Redshift, IAM, EC2, Lamda, Azure, Virtual Machines, Kubernetes Service, Functions, Data Lake Storage, Data Factory, Synapse Analytics, Monitor, Active Directory
Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow
Database: MS SQL Server, PostgreSQL, MongoDB, MySQL
Reporting Tools/ Other Software/Other Tools: Tableau, Power BI, SSRS, SSIS, Anaconda, Sitecore, CMS, Jira, Confluence, Jenkins, Git, MS Office, Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving
Operating Systems: Windows, Linux

EXPERIENCE

PNC Financial Services, USA | Data Engineer — **April 2023 - Current**

- Implemented Agile methodologies across the development lifecycle, enabling continuous feedback, iterative progress, and faster time-to-market, resulting in a 15% revenue increase.
- Designed and assessed AWS services like EMR, Redshift, S3, EC2, Lambda, API Gateway, DynamoDB, and SQS to build scalable, serverless data solutions.
- Developed Spark applications using Spark Core, Streaming, SQL, DataFrames, and Datasets for batch and real-time processing, optimizing data transformations with Hive, MapReduce, and Pig.
- Engineered and optimized Kafka connectors to integrate diverse data sources into Kafka topics, improving data flow efficiency by 25%.
- Used AWS Glue for ETL processes, including data validation, cleansing, and transformation, ensuring high-quality data pipelines.
- Employed Python libraries like NumPy, Pandas, SciPy, Matplotlib, and Seaborn to analyze trends and visualize insights, increasing stakeholder engagement by 15%.
- Built proof-of-concept solutions deploying data in AWS S3 and Snowflake, enhancing data accessibility and performance.
- Utilized Git for code management and deployment, ensuring seamless collaboration and version tracking.
- Collaborated with reporting teams to design and develop interactive Tableau dashboards, leading to a 20% rise in user engagement.
- Optimized Hive schemas with partitioning and bucketing techniques, improving query performance and data retrieval efficiency.

Nevina Infotech Pvt Ltd, India | Data Engineer — **Jan 2019 - Dec 2021**

- Utilized MySQL and MongoDB expertise to design efficient data models, optimize database performance, and execute complex queries within microservices, improving data retrieval speed by 15%.
- Worked with Azure cloud services, including Azure Synapse Analytics, Azure SQL Data Warehouse, and Azure SQL, to design and implement scalable database solutions.
- Developed end-to-end ETL/ELT pipelines using Apache Spark, Apache Hive, Azure Data Factory, and Azure Databricks for efficient data integration and migration.
- Worked with various big data file formats such as Apache Parquet, CSV, AVRO, and JSON while building data applications using Apache Hive and Apache Spark.
- Developed Python-based ML models with Azure Data Factory to predict monitoring rules, reducing creation time by 20%, and implemented Spark-based Python modules for machine learning in Hadoop on Azure.
- Applied statistical techniques to analyze datasets, identifying trends and patterns that contributed to a 15% increase in revenue.
- Leveraged Python libraries such as Pandas, NumPy, and Matplotlib for data processing and visualization, achieving a 25% reduction in data processing time.
- Worked on ETL, data integration, and migration across Azure cloud infrastructure services, ensuring smooth data movement and transformation.
- Led the implementation of the Waterfall methodology to guide projects through all SDLC phases, ensuring timely delivery of critical project artifacts.
- Utilized MapReduce and Spark for large-scale data processing, improving performance and enabling efficient machine learning and predictive analytics on Azure.

EDUCATION

Master's in Information Studies | Trine University, Angola, Indiana

Bachelor's in Computer Science | KL University, India
