Chinmay Dali Software Engineer

[LinkedIn](#) | 551-215-2071 | chinmay@mywebemails.com | [GitHub](#) | New York City, NY

Technical Skills

- **Languages:** Java, Python, JavaScript, SQL, HTML, CSS3, C++
- **Framework/Library:** Spring, Spring Boot, Django, Flask, Node.js, React.js, Redux, Angular, Express.js, Hibernate, JQuery, .NET core, JavaFX, Maven, Gradle, React-Native, Android, RxJS
- **Databases:** MySQL, MongoDB, PostgreSQL, SQL Server, Oracle, SQLite
- **Tools & Technologies:** Azure, AWS, Google Cloud Platform, Redis, Kafka, RabbitMQ, NUnit, xUnit, MSTest, SpecFlow, CI/CD, Jenkins, Docker, Kubernetes, GraphQL, gRPC, OAuth, JWT, IdentityServer, Fiddler

Professional Experience

Software Engineer, *Infosys* 01/2024 – Present | Remote, USA

- Engineered robust backend microservices for a B2B services platform using Java and Spring Boot, optimizing query performance and reducing average processing time by 70% and enhanced operational efficiency by 40%.
- Created and optimized complex database schemas with MySQL and Hibernate, supporting intricate queries and transactions. Achieved a 20% reduction in data retrieval times and improved data integrity.
- Deployed microservices architecture on AWS EC2, utilizing AWS S3 for file storage. Reduced server response time by 25% and increased system reliability.
- Developed RESTful and GraphQL APIs with Django to facilitate seamless communication between frontend and backend systems, ensuring efficient data synchronization. Improved data retrieval speeds by 30%.
- Performed comprehensive testing using JUnit and Mockito, achieving a 98% test coverage. Reduced production bugs by 40%, ensuring high code quality and reliability.
- Employed Docker for containerization, ensuring consistent development and production environments. Improved deployment times by 50% and streamlined the CI/CD pipeline using Jenkins for faster releases.
- Designed and developed dynamic, responsive user interfaces using JavaScript and React.js, improving user engagement and reducing rendering times by 30%.

Associate Software Engineer, *LTI Mindtree* 03/2021 – 07/2022 | Mumbai, India

- Enhanced application performance by 20% through the implementation of server-side caching with Spring Cache, achieving over 99% uptime. Developed robust REST APIs using Spring MVC for audits, optimizing data access and processing.
- Engineered an interactive front-end with React, Redux, and TypeScript, and added visualizations using D3.js and Chart.js, enhancing user engagement by 20% with real-time insights and engaging dashboards.
- Leveraged Spring Data JPA and JPQL for advanced querying, improving database interaction efficiency by 25% and significantly reducing query execution times.
- Automated routine tasks and optimized database performance with Spring Boot, custom repository methods, and JdbcTemplate for complex queries. This resulted in a 30% improvement in system responsiveness and operational effectiveness.
- Conducted unit testing using JUnit and Mockito within Spring Boot, achieving 40% test coverage. This effort led to a substantial reduction in bug tickets and enhanced the efficiency of the software development lifecycle (SDLC).
- Leveraged AWS Lambda, S3, and Glue to reduce infrastructure costs by 25% and enhance scalability. Used DynamoDB and RDS for data storage and management, streamlining ETL operations.
- Migrated legacy systems to AWS (EC2, RDS, S3), reducing maintenance costs by 20% and improving system availability. Established CI/CD pipelines with GitHub Actions, Docker, and Kubernetes, and automated builds with Jenkins, cutting release times by 40%.
- Increased operational efficiency by 30% through the automation of ticket allotment to user agents based on specific triggers, using Python, Flask, Celery, and MySQL for effective issue tracking and reporting.
- Spearheaded the integration of continuous integration and delivery pipelines using Travis CI and Docker, reducing release times by 40%, improving deployment reliability, and enabling faster iteration cycles for key product features.
- Utilized RabbitMQ's Publisher-Subscriber model for efficient messaging queue systems, optimizing communication between microservices.

Education

Master of Science, Computer Science ***Stevens Institute of Technology*** 08/2022 - 05/2024 | New Jersey, USA

Bachelor of Engineering, Computer Engineering ***University of Mumbai*** 08/2017 -05/2021 | Mumbai, India
