PROGRAM ANALYST

Solutions focused professional with 20+ years experience within the Department of Defense (DoD) working multi-million dollar programs, delivering system and data analysis, oversight of the planning and execution of system testing, creating and maintaining program documents, and reporting project progress to senior management.

PROFESSIONAL EXPERIENCE

Security Operations Specialist / Analyst U.S. Special Operations Command, Tampa, FL Sept 2007 – Aug 2023
Deployed to overseas locations to perform surveys assessing physical security focused on data collection and analysis for US facilities. Advanced through the roles of Assistant Survey Team Lead, Production Team Lead, and Information Resource Management; recently served as Innovation, Research, Integration and Standards lead for modernization efforts.

- Assessed program training needs, identified deficiencies, effectively completed yearly program-wide training events
- Facilitated collection and production activities, data access and editing tools available on-site, verified products to customer
- Coordinated cross-functional team, created workflow process, migrated stand-alone data to geospatial information database
- Conducted 56 surveys in 46 countries, generated templates for data entry, standardized customer products for data sharing in accordance with applicable laws, executive orders and guidelines
- Served as a technical authority on emergency planning and analysis, ensured products met established agency standards
- Planned and coordinated projects to improve the protection of infrastructure by facilitating data sharing with federal agencies
- Prepared presentations, papers, and responses to inquiries for distribution, provided customer quarterly and ad hoc products
- Planned, coordinated, and supported multiple projects, ensured program structured data, database management and formats will be compatible with move to modular open systems approach for data access visualization and retrieval

Deputy Production Manager (USAF, Major) U.S. Special Operations Command, Tampa, FL Aug 2002 – Sept 2007
Directed analytical and production activities of 35 personnel in a joint service intelligence production program supporting DoD directed special operations planning for contingency and crisis response. Provided acquisition support to intelligence office in special operations command; responsible for program requirement tracking and project development.

- Provided technical assistance, created and maintained standard procedures, ensured compliance with department standards
- Drafted standard operating procedures, coordinated efforts with ops and management, successful transition to new software
- Managed data analysis and production, resulting in 152 digital products, accessible tools and overlays for user visualization
- Compiled and evaluated data to make recommendations, presented and trained solutions, reduced processing time by 25%
- Composed written presentations and presented them to senior level management, customers, and other stakeholders
- Evaluated documents for consistency with policy, guidelines, and procedures; improved professional knowledge and skills

Chief, Operations System Engineer (USAF, Captain) U.S. Space Command, Cape Canaveral, FL Aug 2000 - Aug 2002
Delivered technical support to the 45th Range Squadron on the \$2.1B standardization and automation program. Managed individual and group meetings focused on requirements, test and evaluation, deficiency resolution, and implementation schedules.

- Provided technical support, represented ops teams during testing and scheduling, minimized impact to range operations
- Compiled wing-level input, supporting systems capability document, ensure timely project integration for customers
- Interfaced with ops, logistics group and program office, identified deficiencies, implemented resolutions to meet standard
- Managed operational test and evaluation plans, ensured user input to requirements, critical space lift capability integrated

Developmental Engineer / RDT&E (USAF, LT) U.S. Air Force, Albuquerque, NM Jul 1997 - Aug 2000
Primary point of contact between program office, independent test organization, and test range for weapon system test planning. Led lethality team for operational test and evaluation planning and execution.

- Supervised analyst team, supported test plan development, scheduling, and execution, kept stakeholders apprised of progress
- Expanded application of models and simulations, in support of operational testing, saved 90,000 dollars in test costs
- Analyzed operational data, prepared oral and written presentations, provided critical information to flag officers

EDUCATION / PROFESSIONAL CREDENTIALS

Masters in Aeronautical Science (MAS) | Embry-Riddle Aeronautical University
Bachelor of Science in Electrical Engineering (BS/EE) | Embry-Riddle Aeronautical University

Training

Computer Aided Design Applications: AutoCAD, TurboCAD

Geographical Information Systems Applications: ESRI ArcMAP, ArcCatalog, ArcGIS Pro

Defense Acquisition University Courses: Intermediate systems planning, research, development, and engineering; Intermediate test and evaluation; Test and evaluation management; Systems engineering management; Intermediate systems acquisitions

Security Professional Education Development (SPED) Program: Physical Security Measures, DOD Locks, Exterior Security Lighting, Electronic Security Systems, Storage Containers and Facilities, Risk Management for DOD Systems, Protected Distribution Systems
