EXECUTIVE SUMMARY

Results-driven Systems Engineer with 8+ years of expertise in Web and Application Server Administration, focusing on enhancing system reliability, performance, and observability across cloud-native and on-premises environments. Furthermore, proficient in designing and implementing advanced monitoring solutions using tools like DataDog, AppDynamics, and CA APM, with a deep understanding of observability metrics and capacity management. Additionally, skilled in automation, system troubleshooting, and collaborating across cross-functional teams to integrate observability into the software lifecycle, complemented by adept at streamlining operations, and providing real-time insights to ensure high availability and optimal performance for enterprise systems. Overall, committed to delivering excellence with a proven track record of developing strategies to minimize manual work, enhance performance, and reduce the severity and frequency of incidents.

CORE COMPETENCIES

- System Reliability & Performance Monitoring
- Cloud-Native Monitoring Solutions (DataDog, AppDynamics)
- Infrastructure Automation
- Observability Metrics & Analysis
- Capacity Planning & Performance Tuning
- Cross-Functional Team Collaboration
- Incident Response & Troubleshooting
- Log Management & Parsing Automation
- Application Performance Management (APM)
- Monitoring Tools Configuration (CA APM, Dynatrace, Splunk)
- Cloud Infrastructure & Services (AWS, Ansible)
- Dashboard Creation & Data Visualization
- Middleware & Application Server Management (WebSphere, WebLogic)
- Real-Time Monitoring & Alerting Systems
- Cloud and On-Premises Integration
- Infrastructure as Code (IaC)
- SSL Configuration & Security Best Practices
- Technical Documentation & Knowledge Sharing

TECHNICAL SKILLS

Programming Languages: Java, Python, Shell Scripting (Bash, Perl, Jython)

Application & Middleware Servers: IBM WebSphere, Oracle WebLogic, JBoss, Tomcat

Monitoring & Observability Tools: DataDog, AppDynamics, Dynatrace, CA APM, Splunk, Grafana

Cloud Platforms: AWS (Certified Practitioner), Azure, OpenShift

Automation & DevOps: Ansible, Jenkins, Docker, Kubernetes, Terraform

Databases: Oracle, SQL Server, DB2, PostgreSQL

Web Servers/Version Control: Apache, Nginx, IIS, Git, SVN

Performance Monitoring: OpsGenie, ThousandEyes, Synthetic Testing

System Administration: Linux (RHEL), Solaris, Windows Server

Security: SSL/TLS Configuration, LDAP Integration

Visualization & Reporting: Custom Dashboards (DataDog, AppDynamics), Power BI

PROFESSIONAL EXPERIENCE

C.S.X TECHNOLOGY | JACKSONVILLE, FL | **Systems Engineer (Monitoring)**

July 2019 – Present

Company Overview: C.S.X Technology is a leading provider of rail-based freight transportation services in North America, emphasizing reliable and efficient operations through advanced technology systems.

- Spearheaded the migration of legacy on-premises monitoring tools (CA APM, OMI) to a cloud-native solution using DataDog, improving scalability and reducing infrastructure costs.
- Automated the deployment of monitoring agents across WebSphere, Liberty, and OpenShift environments using Ansible Playbooks, enhancing configuration accuracy by 30%.
- Designed and implemented real-time monitoring for critical customer-facing applications, reducing downtime by 40% through early issue detection.

- Developed enterprise dashboards to provide unified views of key metrics for capacity, performance, and incident tracking, improving stakeholder decision-making.
- Integrated DataDog with OpsGenie for streamlined incident management, reducing Mean Time to Resolution (MTTR) by 25%.
- Provided root cause analysis for application slowness and capacity-related issues, leveraging tools like Splunk, Kibana, and ThousandEyes to ensure 24/7 availability.
- Leveraged Splunk to analyze application and system logs, identify bottlenecks, and improve troubleshooting efficiency, reducing resolution times by 20%.
- Configured Splunk dashboards and alerts to monitor infrastructure and application health, ensuring 24/7 availability.

Environments: DataDog, WebSphere, Liberty, OpenShift, Ansible, Splunk, Kibana, ThousandEyes, OpsGenie, Red Hat Linux

WELLS FARGO | CHARLOTTE, NC | **App System Engineer**

June 2017 – July 2019

Company Overview: Wells Fargo is a multinational financial services company providing banking, investment, and mortgage solutions. Led the migration of application performance monitoring from Dynatrace to AppDynamics, optimizing application insights and enabling proactive troubleshooting.

- Configured and deployed Java, .NET, and database agents for AppDynamics across diverse environments, achieving a 20% improvement in system observability.
- Created custom business transactions, health rules, and dashboards tailored to business-critical KPIs, ensuring SLA compliance.
- Collaborated with middleware and application teams to implement monitoring best practices and address performance bottlenecks, reducing transaction latency by 15%.
- Developed comprehensive EUM dashboards, correlating user activity with backend metrics to enhance application performance monitoring.
- Integrated AppDynamics with Splunk and xMatters, enabling real-time alerting and enhanced security compliance.
- Built and maintained Splunk dashboards for infrastructure and application logs, providing real-time insights into application performance and security metrics.
- Analyzed Splunk data to detect anomalies, investigate incidents, and optimize application workflows, contributing to a 25% reduction in incident volume.

Environments: AppDynamics, Dynatrace, Java, .NET, Splunk, xMatters, WebSphere, Apache, Red Hat Linux

DELL | BOSTON, MA | **DevOps Engineer/Monitoring**

December 2016 – June 2017

Company Overview: Dell is a global leader in technology solutions, focusing on digital transformation and IT infrastructure.

Implemented AppDynamics EUM, machine agents, and database agents for robust application and infrastructure monitoring, achieving 100% SLA compliance for key metrics.

- Automated alert configurations and created custom dashboards for development and QA teams, enhancing visibility into system health and performance.
- Integrated monitoring tools with Moogsoft to centralize event management and reduce incident noise by 40%.
- Troubleshot application issues, including slow performance, memory leaks, and hung threads, using AppDynamics transaction snapshots.
- Migrated monitoring configurations from legacy tools to AppDynamics, improving application monitoring accuracy by 30%. **Environments:** AppDynamics, Moogsoft, Ansible, Splunk, Apache, Linux, Windows Server

POINT CROSS PVT LTD | BANGALORE, INDIA | **Junior Software Engineer**

October 2013 – July 2015

Company Overview: Point Cross Pvt Ltd is an IT services provider specializing in custom software development and digital transformation solutions.

- Developed and maintained enterprise applications using Java, Hibernate, and Spring, enhancing performance by optimizing back-end workflows.
- Designed and implemented client-side validations with JavaScript to improve user experience and reduce form submission errors.
- Configured and managed WebSphere Application Server for development and deployment, ensuring seamless integration with MQSeries.
- Created reusable components using JSP and Servlets, reducing development time for future projects by 25%.
- Authored SQL queries and stored procedures to support application functionality, enhancing data retrieval efficiency. **Environments:** Java, Hibernate, Spring, WebSphere, MQSeries, Oracle, HTML, Linux

EDUCATIONAL QUALIFICATIONS

Masters in Information Technology

2019

UNIVERSITY OF CUMBERLANDS, WILLIAMSBURG, KENTUCKY

Masters in Computer Sciences

2016

SILICON VALLEY UNIVERSITY, SAN JOSE, CA

CERTIFICATIONS

-
- AppDynamics Certified Professional Implementer

- Datadog Certified APM and Log Management
- AWS Certified Cloud Practitioner

PUBLICATIONS

Published a research paper titled "[Using Gesture at System Frames in Packet Failure Control](#)" in the International Journal of Computer Science and Technology (IJCST) in March 2013.
