SUMMARY:

Civil/ Environmental Engineering/GIS Analyst

- Civil / Environmental Engineer graduate from the **University of Texas at Arlington (UTA)**.
 - Experienced GIS Professional with 7 years of expertise in Spatial analysis, data management, creating, drafting and mapping GIS data.
 - Possess strong management and organization Skills with ability to lead team effectively, Quick Learner with a keen attention to detail and Enthusiast to learn new technologies.
-

PRIMARY SKILLS:

AutoCAD, ESRI ArcGIS, ArcGIS Pro, 3GIS, QGIS, JIRA, FIM (Fiber Inventory Management), Small World (GDO), Knowledge on SQL, Knowledge on Python, Arc Map, REVIT/BIM, AS8, MS Office (MS-Excel, MS-word, PowerPoint, Outlook)

EDUCATION:

Master's in Environmental Engineering, University of Texas at Arlington, Arlington, Texas

Bachelor of Engineering in Civil Engineering, Tribhuvan University (IOE), Kathmandu, Nepal

WORK EXPERIENCE:

GIS Analyst: SGS Consulting/Exelon (Baltimore Gas & Electricity), Baltimore, MD (Remote) *(July 2022-July 2024)*

- Mapping BGE Gas and Electric service and associated features in a software **ArcGIS Pro** as per details provided on Work Order Ticket /As-Built (AUTOCAD), Cartography Maps, Field Maps.
- Edit and update Gas service lines and Electric Service lines as per Field Verified details in GIS and Asset management Suite AS8.
- Perform QA/QC report to ensure meaningful geocoding and spatial accuracy of gas service and maintain GIS database
- Implement SQL queries to manage and analyse spatial data stored in GIS database
- Integrated Python Scripts with GIS software for spatial analysis, data extraction and bulk update.
- Reporting stakeholders regarding project needs and areas needing improvement.
- Worked as Asset Management Team and correct the data errors on Various Asset System.
- Perform Spatial analysis, produce insightful maps and prepare reports for Project analysis.

GIS Analyst II/ OSP Engineer: TEK Systems/ Verizon, Irving, TX *(March 2019 to March 2022)*

- Drafting the Verizon Optical Fiber cables (Aerial and Buried), conduits, access points, Splices, Slack loops, Poles and associated features (OSP) as per details provided in Engineering Drawing (AUTOCAD) using **3GIS Software**.
- Verify the location of Fiber cable and associated features and edit the Fiber Cables and associated features with reference to landbase layer, aerial imagery, geographic data layer and google earth view, Field Maps.
- Perform Spatial analysis, produce insightful route maps, maintain detailed design documentation, including network layouts, splice diagram and prepare reports to present the results of the analysis.
- Generate Signal Trace report for network Analysis.
- Edit and modify the Fiber cables and associated features as per Maintenance Project/Redline drawings, Right of Way (ROW) agreements documents and field verification Details.
- Export KMZ file from 3GIS and Verify the Fiber cable Alignments with the associated features using software **QGIS**.
- Trained new hired validation engineers on my team and assist with utilization of 3GIS, QGIS and fostered a basic understanding of GIS terminology and telecommunications standards.
- Provided 3GIS telecom support by troubleshooting system issues and ensuring data integrity for network planning.
- perform QA/ QC and Generate 3GIS report maintain record keeping and update records in project management tool **JIRA**.
- Implement SQL queries to manage and analyse spatial data stored in GIS database.
- Drafting LEDCOR Optical Fiber cables (Aerial and Buried) and associated features as per details provided on QuickBase, such as Redlines, VCRs (latitude and longitude coordinates), Survey Data, Splicing details, Field maps and GPS data.

GIS Analyst I: Matrix Resources /ATMOS ENERGY, Dallas, TX

(November 2017 to March 2019)

- Drafting Service Gas pipeline and features associated to Gas pipelines such as conduits, EFVs, valves, Taps, Caps, Riser, Casing and Coupling in a software **small world/ArcGIS** as per details provided on Field Survey Data (Stationing), As Built drawing and field verified details.
 - Edit and Modify Service lines graphics and update database attributes to correspond to field verification of facilities, Right of Way (ROW) agreement, private easement.
 - Apply As-Built changes, map corrections, Leak, and maintenance jobs, Redlines with reference to Legacy maps, Cartography Maps, CAD drawings, Satellite imagery, aerial photographs, GPS data and Remote sensing data for permanent mapping and record keeping.
 - Perform QA/QC and spatial data analysis and generate detailed maps and compile comprehensive report to effectively communicate the findings.
-
