Phone: +1 (512) 934-4014

Email: deepak04082023@gmail.com

Professional Summary

Highly experienced and dedicated software development professional with over 17 years of hands-on experience with designing, developing, and managing. Proven expertise in leading technologies/frameworks/cloud, communication skills, coordination among cross-functional teams, mentoring junior developers, and ensuring the successful delivery of high-quality software solutions. Expert in leveraging best practices in software architecture and agile methodologies to drive continuous improvement and innovation.

Technical Skills:

- **Programming languages:** Proficient in Java, J2EE, Struts2, Spring Boot, Hibernate, Play framework, and Akka.
- **Front End Technologies:** ReactJS, Redux, JSP, HTML, CSS, JS, Ajax
- **Build Tools:** Gradle, Maven, Ant.
- **Subversion:** SVN, Bitbucket, Git.
- **Design principles:** Design patterns, Monolithic, Microservices design patterns.
- **Software Architecture:** Expertise in system design, scalable, robust, and secure software architecture.
- **Software Methodologies:** Agile, WaterFall.
- **Cloud Technologies:** AWS services, Azure.
- **Databases:** Proficient with SQL, and NoSQL databases like Oracle, MySQL, and Cassandra.
- **DevOps:** Familiar with CI/CD pipelines, Docker, Kubernetes, Jenkins, and Splunk.
- **Leadership:** Team management and mentoring, stakeholder communication.
- **Application Security:** Fortify, lifecycle, Pen Testing.
- **Application/Web Servers:** JBoss, Nginx, Apache, Akka HTTP.
- **Testing Tool:** Mockito Junit.
- **Web services:** Rest APIs, SOAP services.
- **Tools:** JIRA, Soap UI, postman, eclipse, IntelliJ, Fortify(SAST, DAST), Sonatype.

Professional Experience:

Software Development Engineering- Advisor [Fiserv solution LLC.] – [New Jersey] [May 2016] – [November 2024]

- Led design, development, and implementation of eCustomer services web application and got that delivered successfully.
- Collaborated with cross-functional teams like Quality Assurance, AppOps, product managers, release management, security team, delivery team, and other stakeholders.
- I was involved with different teams for infrastructure planning i.e. server & capacity required.
- Worked with the security team for application security scan and issue resolution.
- Developed multiple proofs of concepts like client onboarding deployment automation, AWS SQS integration with the application, Amazon Web Services S3 folder scan for vulnerabilities while uploading new objects, and completed proof of concepts for Amazon RDS MySQL database upgrade with replication.
- I worked with the performance team for performance testing of the application.
- Mentored a team of 10 developers, conducted code reviews, and provided technical directions for features and functionalities development.

- Developed and unit tested Restful APIs/Backend services/DB entity with Java, AWS SDK, Spring Boot, play framework, Akka, Spring Data, and Hibernate and written Junit test cases for end-to-end testing.
- Implemented UI changes with ReactJS, CSS, JS, and HTML.
- Provided support to AppOps during releases for application validation and production issues also helped them with DR testing by reviewing the DR plan.
- During my tenure, I also gained people management experience from May 2016 to Feb 2019.
- I worked with the internal audit team for the quarterly project audit.
- I was providing monthly/weekly status on delivered and ongoing applications/features to senior leadership.
- Owned bi-weekly status and progress on open security vulnerabilities for CardServices – Risk portfolio.
- The technology stack used
 - Core Java, Spring IOC, Spring Boot, Spring Data JPA, Spring Cloud, PlayFramework, Akka, Hibernate.
 - ReactJS, Redux, Typescript, CSS, JS, Sonar lint.
 - JSON, XML, Cache, JWT, Swagger, JIRA
 - SOAP UI, Postman, JMeter, and JIRA to track project tasks and defects (both internal/production).
 - Services of Amazon Web Services, Azure.
 - MySQL, Oracle 19c.
 - JBoss, Nginx, Akka HTTP.
 - Fortify, Sonatype, Pen Testing.
 - Linux, Windows

Technical Lead [Wipro Ltd.] – [Greater Noida, India] [Apr 2014] – [Apr 2016]

Role and Responsibilities

- Performed the role of Technical lead.
- Mentored a team of 6-8 team members for technical guidance, code reviews, and requirements clarifications.
- Collaborated closely with Business System Analysts, QA, and product teams to ensure the delivery of high-quality software to clients.
- Provided project work status/issues/risks to stakeholders promptly.
- Collaborated with the architect team for technologies & design and designed database tables, and their relationships like primary key, foreign key, Sequences, etc.
- Developed proofs of concepts like digital signatures on documents generated at client browsers, application accessibility of Return module from vendor application, etc.
- Developed UI, backend services, RESTful APIs, and hibernate entities for application.
- The technology stack used
 - Core Java, Spring, Spring IOC, Spring AOP, Hibernate.
 - SQL server.
 - Weblogic server.
 - JSP, CSS, JS, HTML
 - Microsoft Office.
 - Oracle EPM.

Technical Analyst [Fiserv India Pvt. Limited] – [Noida, India] [July 2008 – April 2014]

Role and Responsibilities:

- Performed the role of full-stack senior developer.

- Conducted requirement analysis & effort estimations, design (prototyping and documentation), coding, unit/dev testing, QA support, and delivery for the requirements from the product team and addressed production defect(s) end to end.
- Created high-level documentation and low-level documentation for the applications.
- Developed web applications, RESTful APIs, and SQL queries, along with triggers for the backend database.
- Collaborated closely with Business System Analysts, QA, and product teams to ensure quality delivery of high-quality software to clients.
- Designed database tables and their relationship to enhanced performance.
- Conducted regular training sessions and workshops for junior developers.
- Provided project work status/issues/risks to stakeholders promptly.
- The technology stack used is
 - Core Java, Struts2, Spring IOC, Hibernate, Oracle DB, JBoss 7 EAP, SVN.
 - Eclipse IDE, PMD, SonarQube.
 - CSS, JS, HTML, jQuery, Ajax.
 - LDAP active directory.
 - Microsoft Office for documentation and presentation, JIRA tool for defect tracking.

Education:

Master of Computer Applications [Uttar Pradesh Technical University] – [Lucknow, Uttar Pradesh, India] [2005].

Bachelor of Science [Chhatrapati Shahu Ji Maharaj University] – [Kanpur, Uttar Pradesh, India] [2002]

Certifications:

- Certified ScrumMaster (CSM)
