

SAMMY ANDRAWOS

Quality Engineer

Pennsylvania | US Citizen | 484-397-8996 | Sammyandrawos@gmail.com | <https://www.linkedin.com/in/sammy-andrawos/>

BACKGROUND HIGHLIGHTS:

Versatile Quality Engineer with over 6 years of hands-on experience in both manual and automated software testing. Adept at using tools such as **Selenium WebDriver**, **Java**, **JUnit**, and **Cucumber** to streamline test processes and boost software quality. Proven ability to implement test automation frameworks that enhance test coverage and accelerate release cycles.

SIGNIFICANT CONTRIBUTIONS:

- Automated a complex suite of regression tests using **Selenium WebDriver**, reducing manual effort by **70%** and significantly improving time to market.
- Boosted productivity by **30%** through AI-assisted test development and intelligent code optimization.
- Led the integration of **RESTAssured Library** for API validation, enhancing backend test coverage and improving overall system reliability by **40%**.

SPECIALIZED EXPERTISE

Java | **Python** | **Selenium** | **JavaScript** | **TestNG** | **Junit** | **Cucumbed BDD** | **Rest Assured** | **API** | **Postman** | **JDBC** | **MySQL** | **Maven** | **GitHub** | **Git** | **SQL** | **Jenkins** | **PlayWright** | **Gherkin** | **IntelliJ** | **Oracle** | **DDT** | **Bamboo** | **Jira** | **Bitbucket** | **CI/CD** | **Perplexity AI** | **Tabnine AI** | **Page Object Mode** | **Agile Scrum** |

CAREER PROGRESSION

Software Test Automation Engineer	MGM Resort International – Las Vegas, NV	Jan 2023 - Present
- Developing, and maintaining automated test scripts for functional testing. - Automating 70% of the test cases for web-based applications using Java, Selenium WebDriver, and TestNG, reducing manual testing cycles. - Identifying, log, and track defects using Jira, and collaborate with development teams to ensure timely resolution - Collaborating with teams in utilizing version control systems BitBuket to manage test scripts and ensure version traceability. - Analyzing comprehensive smoke and regression test suites using bamboo, ensuring software quality and stability across new feature releases and system updates. - Conducting code reviews and ensure compliance with coding standards and best practices within the test automation team. - Providing mentorship, training, and support to junior QA engineers, fostering skill development and knowledge sharing within the team. - Conducting functional testing on new features and bug fixes to ensure expected results in various environments. - Maintaining version control using Git and Bitbucket; ensured consistent deployments via Bamboo.		
Test Automation Engineer	Rally Health - Washington D.C.	Jun 2021 – Dec 2023
- Conduct manual testing, develop test cases for web application reliability and stability using Jira Xray. - Automated UI testing for web applications using Selenium WebDriver and Java, and JUnit increasing test efficiency. - Provide clear and concise reports and collaborate with development team to ensure high-quality application. - Engineered and executed a Behavior-Driven Development (BDD) framework integrated with Cucumber, delivering exceptional results with a 95% test coverage rate, fortifying quality assurance practices and bolstering product reliability. - Conducted extensive API validations using Postman and implemented automation tests with Java and REST Assured, ensuring functionality, performance, and reliability across multiple endpoints.		
Quality Assurance Engineer	M&T Bank - Buffalo, NY	Aug 2018 – May 2021
- Conducted manual and automated functional testing of web-based platforms using Java and Selenium WebDriver. - Established developing, maintaining, and executing comprehensive test cases, leading to notable improvements in software quality and a significant reduction in post-release defects. Mastered TestNG for structuring effective test suites. - Coordinated with cross-functional teams to meet project timelines and quality benchmarks while enhancing regression test coverage with reusable automation scripts. - Built a modular automation framework in Java, leveraging JDBC for efficient database validations and backend testing, including SQL query validation to support end-to-end test scenarios. - Revised failed test cases and supporting CI/CD pipelines using Jenkins and GitHub to ensure smooth deployment and continuous monitoring.		

Education: Northampton community college
