SUMMARY:

- Business Analyst with 5 years of experience driving data-driven decisions across IT, e-commerce, finance, and healthcare. Skilled in SQL, BI dashboards, and predictive analytics to deliver actionable insights, optimize operations, and support strategic growth initiatives.

SKILLS:

Technical Skills: SQL (MySQL, SQL Server), Python (Pandas, NumPy), Tableau, Power BI, Excel, Informatica, ETL & Data Pipelines, Data Modeling, AWS (S3, Athena, Glue, Lambda), API Integration

Business Intelligence & Analytics: Dashboard Optimization, Data Storytelling, Predictive Analytics, Customer Segmentation, Reporting, Financial & ROI Analysis

Business & Process Analysis: Requirements Gathering, GAP Analysis, SWOT Analysis, Root Cause Analysis, Process Mapping, Stakeholder Management

Documentation: BRD, FRD, PRD, User Stories, Process Flows, RTM, Lucidchart Diagrams

Tools & Platforms: Salesforce, JIRA, Confluence, SAP, Power Automate, Figma, HubSpot

Project Management: Agile (Scrum), SDLC, Change Management, Business Transformation, Process Optimization (Lean Six Sigma)

EXPERIENCE:

Wayfair, IN

Oct 2024 - Current

Business Analyst

- Spearheaded the automation of Power BI dashboard by leveraging AWS S3 for storing e-commerce data, Athena for querying page view logs, and API Integration with Google Analytics to track metrics, checkout page bounce rates, and user age distribution, resulting in a 20% increase in site traffic through targeted promotions.
- Optimized underperforming blog sections by collaborating with marketing, using SEMrush to analyze keyword performance, conducting A/B testing, and creating Lucidchart Diagrams to streamline content workflows, driving an 18% boost in organic search rankings and dwell time.
- Analyzed clickstream data from product listing pages and demographic profiles to build Tableau funnel visualizations, identifying drop-offs stage and optimizing journeys with HubSpot API Integration for personalized email triggers, achieving a 10% uplift in conversion rates for home decor items.
- Leveraged MySQL and Python (Pandas, NumPy) to analyze consumer behavior data from 50,000+ monthly site visitors, delivering insights documented in PRDs that fueled campaigns and informed sofa design updates, resolving top churn drivers (e.g., shipping delays).

Accenture, IN

Nov 2023 – Jul 2024

Business Analyst

- Led a team of 3 analysts to identify inefficiencies in Salesforce processes for a retail client, authoring BRDs to specify lead assignment rules and utilizing AWS Glue to transform 10 GB of sales data, improving order fulfillment speed and profitability by 5%.
- Championed the creation of standardized BRD templates with Figma wireframes for a client onboarding portal and Lucidchart Diagrams to map approval workflows, cutting deliverable finalization time by 40% monthly for a team of 15 consultants.
- Executed GAP Analysis, SWOT Analysis, and Cost-Benefit Analysis to prioritize enhancements for a supply chain dashboard, integrating AWS Lambda to automate inventory updates, achieving a 25% efficiency gain in stock replenishment cycles.
- Collaborated with design, sales, and engineering teams to translate requirements into a supplier tracking tool, using API Integration with procurement systems and HubSpot for vendor communication logs, delivering a solution that reduced delays by 15%.
- Automated insights generation by extracting SAP (ERP) data on purchase orders into ETL pipelines with Informatica, storing results in AWS S3 and documenting in PRDs, saving 40+ hours monthly on manual inventory reporting for a manufacturing client.
- Produced a Power BI reporting system with interactive visuals on sales performance (e.g., regional revenue, top SKUs), integrating external APIs and Lucidchart Diagrams for data flows, slashing manual reporting time by 40+ hours monthly across 3 teams.

CIBC, IN

Aug 2023 – Oct 2023

Credit Analyst

- Led an end-to-end credit risk pipeline migration project at CIBC, transitioning small business loan assessments from SQL to Python (Pandas, NumPy) and querying 5 years of repayment data, reducing daily risk analysis time from 3 hours to 30 minutes and saving \$50,000 annually.
- Managed a financial reporting automation project, developing Alteryx workflows to clean risk tables including late payment flags and credit scores for 1,200 accounts, improving data accuracy by 40%.
- Executed a real-time credit risk monitoring initiative, automating a Power BI dashboard for CIBC's commercial loans to track payment trends, reducing past-due payments by 1% through proactive alerts.

MFine, Bangalore, India

Oct 2022 – Jun 2023

Business Analyst

- Directed an end-to-end CRM integration project at MFine, deploying a system to manage 10,000+ patient records and automate appointment reminders, reducing new user onboarding time by 50%.
- Led a patient feedback transformation initiative, developing a feedback collection process and automating escalation triggers for critical cases, optimizing resource allocation and cutting project delays by 15% across MFine's telehealth teams.

- Managed an ETL pipeline implementation project with Informatica and Talend to process insurance claim data, ensuring data quality for MFine’s monthly billing reports across multiple healthcare providers.
- Executed a customer segmentation project, analyzing 50,000 patients by age and condition with focus group feedback, aligning MFine’s pediatric telehealth services with user needs and improving service adoption.
- Led an operational optimization project, using GAP Analysis to query sample collection logs, resolving phlebotomist delays and driving a \$0.5M revenue increase through improved diagnostics at MFine.
- Conducted a phlebotomist performance analysis project with MySQL and Python, evaluating sample pickup times and error rates, raising CSAT scores from 4.2 to 4.7 through actionable recommendations presented in WBRs.

ClearTax, Bangalore, India

Jan 2020 – Sep 2022

Business Analyst

- Led Agile coordination for migrating Bitrix CRM to Salesforce across 8 business units, streamlining sales workflows, creating BRDs, conducting UAT testing, and delivering end-user training to achieve a 35% reduction in man-hours.
- Customized Salesforce workflows and created custom objects (e.g., Sales Representative, PO Start/End Dates), integrating AWS S3 Athena and developing a data pipeline for seamless data flow.
- Leveraged Google Analytics and data storytelling techniques to map customer interactions, identifying high-impact touchpoints leading to a reduction in churn by 10%; integrated actionable insights into marketing strategies for enhanced engagement.
- Automated data QA processes and ensure data integrity for 4,000+ enterprises by implementing 10+ validation rules in Salesforce, enhancing data accuracy by 30%.
- Designed 30+ dashboards viewed by 500+ users across sales, marketing, and finance, enabling faster decisions and increasing cross-team alignment.
- Provided insights that increased average revenue per user (ARPU) by 5% through cross-selling and a 7% increase in customer acquisition.
- Analyzed Lead data to identify opportunities and created a Salesforce CRM pipeline, enabling sales representatives to effectively target high-potential leads resulting in a 5% increase in ARR upsell and a 6% rise in win-back rates.

EDUCATION:

Master of Science in Business Analytics and Information Management

Purdue University, Daniels School of Business West Lafayette, IN

Bachelor of Technology in Civil Engineering

Vellore Institute of Technology, Chennai, India

Aug 2024

May 2020

HONORS & AWARDS:

Won\$1,000 and secured 1st place in "Love Data Visualization" competition with an insightful LEGO data dashboard.

Finalist among 42 teams in the 2024 “KOLs” ProcDNA Healthcare Consulting Case Competition at Purdue University.
