Dublin, Ohio • +1 (220) 238-8571 • siranjivi@gmail.com • [linkedin.com/in/siranjivic](https://www.linkedin.com/in/siranjivic)

Skills

- Oracle PL/SQL
- SAS Studio
- Oracle Developer Suite
- MySQL
- Apex
- Jasper
- Visual Basic 6.0
- SQL
- R Programming
- Data Visualization
- TOAD
- SQL Developer
- HTML
- XML

Professional Summary

- Service-oriented Associate Manager committed to excellence with more than 14 years of experience and effective collaboration promoting Oracle PL/SQL and SQL skills. Proven history of efficiency and reliability.
- Expertise in Oracle PL/SQL programs such as Procedures, Packages, Functions, Triggers and other Database objects
- Technical expertise in creating and maintaining database objects of Tables, Views, Materialized Views, Indexes, Sequences, Synonyms and Directories
- Strong experience working in production and development environments in different RDBMS (in Oracle 19c/12c/11g/10g/9i, MYSQL, MS-Access) and strong troubleshooting skills
- Extensive experience in Oracle 19c/12c/11g/10g/9i Database Development and hands-on experience in writing Oracle PL/SQL and SQL Complex queries
- Responsible for performance tuning using Explain Plan, TKPROF, Auto Trace and Oracle Hints. Used table partitioning in huge tables to increase database performance
- Tuning of SQL and PL/SQL queries to improve the performance of a system. Identify root causes and resolve problems related to system functionality
- Extensively used bulk collect and FORALL statements for manipulating a large amount of data and enhancing performance
- Extensively used Bitmap, B-Tree Index and functional-based index to enhance performance to retrieve data from the database table
- Experience analyzing data using complex SQL joins, Oracle Analytic and Grouping functions for data analysis
- Strong experience in Data Migration, Data Conversion and Oracle PL/SQL scripts
- Extensive experience with Oracle Forms 11g/10g, 9i. 6i. Have developed numerous applications and maintained systems
- Experience performing root cause analysis and communicating to businesses accordingly

- Monitoring of all daily scheduled processes and activities using PL/SQL queries, procedures, functions and scripts daily to ensure smooth operations
- Extensively used for DBMS_SCHEDULER package to automate the execution of programs, scripts, and various tasks at specific intervals or specific events
- Proficient in working on Integrating software components with third-party programs for Digitalization
- Good working experience in Oracle Application Express (Apex), Jasper Report, Visual Basic and Statistical Analysis
- Developed functions to generate output in JSON format by querying multiple tables and using LOBs
- Identified and implemented programming enhancements that increased the rate of daily operations
- Highly adaptable in quickly changing technical environments with powerful organizational and analytical skills
- Experience in using for Oracle built-in packages DBMS_JOB, DBMS_SCHEDULER, DBMS_ALERT, DBMS_SQL, DBMS_AQ and DBMS_OUTPUT
- Extensive knowledge of business-driven projects; acquired a clear understanding of business concepts and practices in Finance, Enterprise and Inventory Applications
- Experience providing technical support to end users related to application support, Release and Change Management etc.
- Experience in providing on-call support for triages, coordinating with various support teams and communicating with business users
- Responsible for understanding, changes in business functionalities, adding new elements in tables and accordingly enhancing PL/SQL stored procedures and triggers
- Performed code reviews as well as optimized code for better performance
- Experience in preparing Test plans, Test Data and execution of Test cases to ensure application functionality meets the user requirements
- Ability to interact effectively with clients, understanding their requirements and providing optimum solution and production support
- Documentation of solution knowledge and process monitoring techniques for re-use by support teams for strong analytical and problem-solving abilities
- Responsible for maintaining and making available up-to-date contact information, supported product lists, technical information regarding products, troubleshooting information, all known fault handling information and other information of general use
- Extensive knowledge of problem-solving oriented in Data Stages, jobs and addressing production issues such as performance tuning and enhancement
- Responsible for application system monitoring, performance monitoring, database monitoring and acknowledging escalations within defined SLA
- Strong leader and problem-solver dedicated to streamlining operations to decrease costs and promote organizational efficiency. Uses independent decision-making skills and sound judgment to impact company success positively

Work History

Senior Database Developer, 11/2010 to 02/2024

Sundaram Finance – Chennai, India

- Company Overview: Sundaram Finance is an end-to-end, flexible and state of the art financial software solution for non-banking finance companies that exactly fits into the large and medium loan/leasing companies and helps them to do their daily routines with ease and perfection
- Design, develop, and maintain database objects such as tables, views, materialized views, indexes, clusters, sequences, synonyms, roles, and privileges
- Developed efficient stored procedures using Oracle PL/SQL for complex business logic, reducing processing time and improving system stability.
- Optimized existing PL/SQL routines using performance tuning techniques such as indexing, query optimization, and partitioning strategies
- Automated routine tasks by creating custom scripts, boosting team productivity and increasing application stability by troubleshooting and resolving complex PL/SQL issues promptly.
- Reduced data redundancy by designing normalized database schema and enforcing referential integrity constraints
- Implemented advanced error handling techniques in PL/SQL code, resulting in robust applications with minimal crashes
- Developed efficient stored procedures for seamless data retrieval and manipulation, increasing application response time
- Key Responsibilities as part of daily activities are as follows: Check email Alerts, Notification emails and any tickets in queue with their priority
- Proactively monitor the operations of the production system and help in resolving any live problems detected/reported
- If any jobs run for a longer time or fail, check why stored procedures/jobs are taking a lot of time to run or fail and provide a permanent fix to avoid repeating in the future
- Identify the Root Cause of issues, document RCA and provide a permanent fix for the issue
- Co-ordination with various third-party vendors during business-impacting changes and deployments
- Understanding and troubleshooting the complex issues in the production environment, responsible for identifying any bugs occurring in the applications as well as fixing them
- Critical Situation Analyst: Defused hot situations and got quick technical resolution, identified the issue and either resolved or escalated to the appropriate team responsible for the components affected
- Manage Incidents and Problems: Triaging, logging, prioritizing, tracking, communicating, and resolving, from beginning to end, the resolution of all incoming support requests
- Involved in the continuous enhancements and fixing of production problems
- Designed, implemented and tuned interfaces and batch jobs using PL/SQL
- Participate in disaster recovery planning and monitoring by testing applications on multiple servers to ensure the servers can handle the applications and the applications are mirrored on each server
- Participate in database design and architecture reviews
- Providing Technical support to end users for any Application or Data Related issues
- Source Control is used in SVN and PVCS and Change logs are to be maintained
- Resolved complex business issues, proposing long-term solutions to avoid repeat problems

Software Engineer, 08/2009 to 10/2010

i3s Infosol Private Limited – Coimbatore, India

- Company Overview: I3S INFOSOL's Global Delivery Model for Software Product Development enables product development companies to reduce their cost of software product development dramatically while keeping control of the product architecture
- It also enables easy ramping up and ramping down of product teams based on business priorities
- Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), and Supply Chain Management (SCM) are areas where I3S INFOSOL's has been engaged in providing solutions to customers for a decade
- Application Interfaces and Reports to be developed based on requirement specifications
- Create and maintain database objects including: tables, views, primary keys, indexes, constraints, sequences, grants and synonyms, triggers, type objects, packages and procedures based on the design document
- Gathered user requirements and created the business requirements documents
- Prepared test plans, user manuals and technical support manuals
- I3S INFOSOL's Global Delivery Model for Software Product Development enables product development companies to reduce their cost of software product development dramatically while keeping control of the product architecture
- It also enables easy ramping up and ramping down of product teams based on business priorities
- Consistently met project deadlines by effectively managing time and prioritizing tasks according to importance
- Reduced system downtime by proactively addressing potential issues through regular maintenance activities
- Tested and deployed scalable and highly available software products
- Designed and developed forward-thinking systems that meet user needs and improve productivity

Education

Bachelor of Engineering: Information Technology

Karunya Institute of Technology and Sciences - Coimbatore, Tamilnadu, India

Work Authorization – Visa status

L2S

Awards & Scholarships

- Excellence of Delivery, Sundaram Finance, 11/2022
- Best Performer of the Year, Sundaram Finance, 06/2018
- Best Performer of the Year, Sundaram Finance, 07/2012

Training & Certifications

SAS Data Analyst, Backerlabs Technologies Inc, USA, 10/2024 to 1/2025

Data Science Using Python, NTPC School of Business, India, 01/2021
