SUMMARY

A software engineer with 10+ years of experience using Python, JavaScript, and PHP to efficiently produce secure and reliable applications and APIs. With a love for automating processes, he is always looking for new tools and techniques to improve not only the code we write, but the way we write it and the path it takes from our local machines to our production servers.

Many years of experience with diverse technologies on several projects have given him the knowledge to quickly and cleanly design, build, test and deliver high-quality applications. He has a strong understanding of software best practices and DevOps principles, combined with a technical proficiency in coding applications, the infrastructure they sit on and the pipelines which link them together.

Let's collaborate and bring your ideas to life, transforming your vision into a digital experience that makes a positive impact. Get in touch, and together, we can create remarkable solutions tailored to your unique requirements.

EXPERIENCE

Technical Lead

GenomAI

📅 06/2023 - Present

- Led the development of MVP version of healthcare product from scratch using Python, React.js, Node.js, Express.js, and GCP Firestore, enabling healthcare providers to manage patient data efficiently.
- Ensured HIPAA-compliant data handling, and optimized Firestore queries and indexing strategies to speed up medical data retrieval and minimize database costs.
- Developed a patient intake platform that uses NLP models to extract medical history from unstructured forms and populate EMR systems, reducing manual data entry errors by 70%.
- Worked with ML engineers to deploy AI models on AWS SageMaker, setting up API endpoints to integrate model predictions into the platform.
- Integrated OpenAI API and third party services for email automation and payment processing.

Senior Software Engineer

MojoTech

📅 09/2021 - 06/2023

- Designed and developed a scalable loyalty platform for web and mobile, enabling seamless customer rewards management and engagement.
- Optimized mobile API performance, reducing response times and improving app efficiency.
- Integrated third-party payment gateways and CRM systems, enhancing customer transactions and loyalty program interactions.
- Participated in Agile workflows, leading sprint planning, backlog grooming, and retrospectives to drive continuous improvement.

Founding Software Engineer

Armorerlink

📅 06/2019 - 09/2021

- Revamped the outdated legacy PHP application by migrating it to a modern Laravel and Vue.js stack, increasing performance and improving maintainability.
- Identified and resolved complex performance bottlenecks, optimizing database queries, caching strategies, and server response times.
- Enhanced security by collaborating with the DevOps team to set up a firewall in front of the application, preventing unauthorized access and mitigating threats.
- Integrated Single Sign-On (SSO) authentication using Okta and Azure, streamlining login processes and improving security for enterprise users.
- Implemented multi-tenancy support, ensuring proper data isolation, role-based access control, and tenant-specific configurations.

Software Engineer

AWS

📅 07/2016 - 06/2019

- Worked in AWS EC2 Security Groups team.
- Contributed to internal tooling for monitoring security group changes, improving observability and real-time auditing capabilities.
- Optimized security group rule propagation, reducing the time required for rule updates to take effect across AWS regions.
- Improved distributed system performance by refining data consistency models, caching strategies, and event-driven architectures.
- Collaborated with a team to develop the frontend for an internal chatbot using React and TypeScript, enhancing customer service operations and accelerating incident resolution.

EXPERIENCE

PHP Developer

Zoolatech

06/2015 - 07/2016

Project: www.ten-x.com

Ten-X Commercial is the nation's leading commercial real estate marketplace where investors and brokers can buy and sell properties with ease.

- Worked in a team and independently depending on the tasks.
- Debugged and resolved critical issues in production using Xdebug reducing downtime and improving user experience.
- Wrote unit and integration tests using PHPUnit, improving code quality and maintainability.
- Optimized SQL queries and database interactions, reducing query execution time and improving system efficiency.

EDUCATION

B.S. in Computer Science

University of California, Berkeley

2011 - 2015

SKILLS

Python	Django	React.js	React Native	Node.js	Express.js	PHP	Laravel	AWS	GCP	
PyTorch	TensorFlow	Firebase	Stripe	Docker	Kubernetes	Angular	Vue.js	JavaScript		
Typescript	Next.js	Nest.js	GraphQL	CMS	WordPress	Drupal	Rest APIs	PostgreSQL		
MongoDB	CI/CD	Jest	Cypress	PHPUnit	Enzyme	Git	Github Actions	Jira	Agile	
OOP	MVC	SOLID	Webpack	HTML	CSS	SCSS	jQuery	DHTML	Figma	Sketch
Responsive Design		Apollo								

CERTIFICATION

JavaScript Algorithms and Data Structures Certification

freeCodeCamp

Certified Secure Software Lifecycle Professional (CSSLP)

ISC2

Node.js Developer Certification

OpenJS Foundation

MY LIFE PHILOSOPHY

Take ownership. Lead with impact.
