PROFESSIONAL SUMMARY

Experienced **DevOps Specialist** with 4+ years of hands-on expertise in administering and managing a range of DevOps tools, including **Jenkins, GitHub, Artifactory, SonarQube**, and **XLR/XLD** technologies on **AWS**. Adept at collaborating with development and operations teams to streamline and optimize build, deployment, and CI/CD pipelines. Proven track record in troubleshooting build and deployment issues, upgrading DevOps products, and providing strategic guidance to teams. Strong expertise in managing infrastructure, ensuring high availability, and improving software development and deployment processes.

KEY SKILLS

- **DevOps Tools Management:** Jenkins, GitHub, Artifactory, SonarQube, XLR/XLD
 - **Cloud Infrastructure:** AWS, EC2, S3, IAM, Lambda, CloudFormation, and CloudWatch
 - **CI/CD Pipeline Management:** Design, implementation, and automation of build and deployment pipelines
 - **Version Control Systems:** Git, GitHub
 - **Scripting Languages:** Bash, Python, Groovy (for Jenkins)
 - **Monitoring and Troubleshooting:** Log analysis, debugging CI/CD issues, performance tuning
 - **Versioning and Artifact Management:** Artifactory, Docker, Maven, and Nexus
 - **Automation & Configuration Management:** Terraform, Ansible, CloudFormation
 - **Team Collaboration:** Cross-functional collaboration with software development and operations teams
-

PROFESSIONAL EXPERIENCE:

DevOps Tools Specialist

LexisNexis - Raleigh, NC

JUNE 2023 - PRESENT

Managed and maintained **Jenkins** for CI/CD pipeline automation, including job creation, configuration, and troubleshooting for builds and deployments.

- Administered **GitHub** for version control and continuous integration, ensuring smooth integration with Jenkins, Artifactory, and SonarQube.
- Led **Artifactory** management for artifact storage, versioning, and retrieval to streamline the deployment pipeline and ensure version control compliance.
- Successfully upgraded and patched **Jenkins**, **SonarQube**, **Artifactory**, and other DevOps tools in a timely and efficient manner, reducing downtime and improving system reliability.
- Worked closely with the application and DevOps teams to troubleshoot build and deployment failures, providing actionable insights and resolutions.
- Implemented **XLR/XLD** for release management, automating deployment workflows and improving the efficiency of the software delivery process.
- Designed and optimized the AWS infrastructure (EC2, Lambda, S3, IAM) for hosting DevOps tools, enhancing scalability and availability.
- Developed automated scripts using **Python** and **Groovy** to support Jenkins pipelines, deployment automation, and system monitoring.

DevOps Engineer

DBS Bank – HYDERABAD, INDIA

OCT 2018 – NOV 2021

- Administered and maintained a robust **Jenkins** infrastructure with over 50+ build and deploy jobs.
 - Implemented CI/CD pipelines integrating **GitHub**, **SonarQube**, and **Artifactory** to ensure smooth and continuous delivery of software artifacts.
 - Collaborated with software development teams to resolve complex issues related to build failures, deployment errors, and performance bottlenecks.
 - Managed and optimized AWS EC2 instances to run Jenkins, SonarQube, and other essential DevOps tools, ensuring high availability.
 - Assisted with the configuration and management of **XLR/XLD** for managing releases across multiple environments, ensuring a streamlined process for continuous delivery.
 - Actively participated in upgrading and patching Jenkins and other tools to ensure minimal downtime and maximum uptime for the DevOps environment.
-

EDUCATION

Bachelor of Science in Computer Science and Engineering
GITAM UNIVERSITY - HYDERABAD, INDIA
(JUNE 2017 - APR 2021)

MASTERS IN COMPUTER SCIENCE
CAMPBELLSVILLE UNIVERSITY
LOUISVILLE, KY
(JUNE 2022 - OCT 2023)

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate**
 - **Certified Jenkins Engineer (CJE)**
 - **Docker Certified Associate (DCA)**
 - **Certified Kubernetes Administrator (CKA)** (Optional, if applicable)
-

PROJECTS

Jenkins CI/CD Automation Implementation

- Designed and implemented a robust **CI/CD pipeline** using **Jenkins**, integrating **GitHub**, **SonarQube**, and **Artifactory**.
- Automated build, test, and deployment processes for multiple microservices-based applications.
- Reduced deployment time by 40% by optimizing Jenkins pipeline scripts and utilizing AWS services (EC2, S3).

XLR/XLD Release Automation on AWS

- Managed and configured **XLR/XLD** on AWS to automate release and deployment processes, enhancing the speed and reliability of software releases.
 - Worked with the DevOps and software teams to design and deploy release pipelines that reduced manual interventions.
-

TECHNICAL ENVIRONMENT

- **Operating Systems:** Linux, Ubuntu, CentOS, Windows
- **DevOps Tools:** Jenkins, GitHub, SonarQube, Artifactory, XLR, XLD

- **Cloud Platforms:** AWS (EC2, S3, IAM, Lambda)
 - **CI/CD Tools:** Jenkins, GitHub Actions
 - **Version Control:** Git, GitHub
 - **Scripting Languages:** Bash, Groovy, Python
 - **Containerization & Orchestration:** Docker, Kubernetes (if applicable)
 - **Automation & Configuration Management:** Terraform, Ansible
-

KEY ACHIEVEMENTS

- Successfully reduced build times by 30% by optimizing Jenkins pipelines and implementing parallel processing strategies.
- Enhanced the stability and reliability of Jenkins and other CI/CD tools, reducing downtime and build failures by 25%.
- Streamlined deployment processes by integrating **XLR/XLD** for automated release management, resulting in faster and more consistent releases.
