

Durga Prasad Amballa

Product Leader | AI & GenAI Solutions | Entrepreneur in Residence

Maple Shade, New Jersey, 08052 | +1 (908) 300 7064 | adprasad.amballa@gmail.com

[LinkedIn: linkedin.com/in/durgaprasad-amballa](https://www.linkedin.com/in/durgaprasad-amballa)

PROFESSIONAL SUMMARY

Innovative product leader with 12+ years of experience in building **B2C and B2B technology products, including SaaS platforms**. Expertise in **AI-driven solutions**, product management, and scaling applications for mass adoption. Proven track record in driving operational efficiency and user engagement. Recognized with the **Indian Achievers' Award 2024** for contributions to technology innovation. **Extraordinary Ability** category Green Card approved(I-140).

CORE COMPETENCIES

- Product Management & Strategy
 - AI & GenAI Solutions Development
 - Agile Methodologies & Scrum
 - UI/UX Optimization
 - Go-To-Market Strategy
 - Team Leadership & Collaboration
 - Agentic AI & LLM Orchestration
 - LangGraph & Multi-Agent Systems
 - Vector Databases (FAISS, Pinecone, Weaviate)
 - AI-Powered CRM & Automation
 - LLM Fine-Tuning & Optimization
 - Autonomous Problem-Solving
 - Memory-Augmented AI Systems
 - Data Analytics & Business Intelligence
-

PROFESSIONAL EXPERIENCE

AVP Product Manager

Healthians | August 2021 – Present

- Architecting & Scaling Agentic AI Solutions
 - Designed and implemented multi-agent AI systems using LangGraph for workflow automation, orchestrating autonomous problem-solving across customer service, sales, and healthcare analytics domains
 - Built memory-augmented, context-aware AI agents capable of planning, reasoning, and executing tasks across healthcare diagnostics and patient engagement

- Developed scalable architectures for LLM-powered agents that seamlessly integrated with enterprise CRM and healthcare management applications
- **Hands-On Development & Optimization**
 - **Customer Support Automation:** Engineered an agentic AI system using classification methods with LLaMA on AWS SageMaker to label, retrieve user data, and orchestrate responses across email and Twitter channels, reducing agent time by 80%
 - **Sales Agent Copilot:** Developed a multi-agent LLM system leveraging FAISS and OpenAI API for real-time script generation, rebuttals, and test recommendations, incorporating reinforcement learning techniques to improve suggestion quality
 - **Report Video Analysis:** Created an advanced RAG-based system that retrieves and compares historical health data, generates contextual narratives via OpenAI, transforms to speech with ElevenLabs, and orchestrates final video assembly with FFMPEG
 - **Hygiene Audit:** Implemented an autonomous AI agent system to analyze sales calls, automatically score performance metrics, and coordinate learning recommendations between audit and development teams
 - **Blood Group Identification AI:** Built a similarity search-based AI system with fine-tuned reinforcement learning to accurately identify blood types from image data
 - **Conversational Healthcare Chatbot:** Architected an Agentic-RAG system for symptom analysis and health test recommendations, creating autonomous planning and reasoning workflows for complex healthcare queries
- **AI Strategy & Business Impact**
 - Translated agentic AI capabilities into enterprise healthcare solutions, driving 60% increase in direct booking revenue through algorithm-driven discount models
 - Led multiple AI proof-of-concept projects that demonstrated tangible business impact, scaling successful prototypes into production
 - Implemented knowledge graphs and vector databases to enhance semantic search capabilities, dramatically improving user experience and conversion rates
- **Consumer App Development & Growth**
 - Led complete UI/UX revamp of mobile apps (Android & iOS), implementing AI-driven personalization
 - Executed AARRR framework with ML-powered optimization, improving retention and monetization metrics
 - Implemented Elastic Search with NLP enhancements, optimizing search functionality for conversational queries
 - Designed demographic-based health analysis system using knowledge graphs to create user intent for health tests

- Achieved 5M+ downloads, contributing 25% of total revenue and 30% revenue from app-generated leads
- **AI Platform Development & Integration**
 - Built a comprehensive AI platform integrating cloud telephony (Amazon Connect, Genesys CX, Exotel) with in-house CRM for an omnichannel experience
 - Developed real-time dashboards with predictive analytics for sales optimization and performance improvement
 - Created automated follow-up systems using reinforcement learning techniques to reduce drop-offs and improve conversion
 - **Mentorship & Capability Building**
 - Led and mentored cross-functional teams in AI engineering, data science, and product development
 - Established best practices for model evaluation, responsible AI deployment, and real-world implementation
- **Consumer App Development & Growth**
 - Led complete **UI/UX revamp** of the mobile app (Android & iOS), enhancing user experience.
 - Implemented AARRR framework for growth, leading to improved retention and monetization.
 - Successive discount model implementation resulted in a **60% increase in direct booking revenue.**
 - Launched **Refer & Earn** program, significantly boosting new user acquisition.
 - Integrated **digital wallet** for seamless transactions.
 - Implemented **Elastic Search**, optimizing search functionality for improved user experience.
 - Developed **Calorie Tracker**, enabling users to track their diet plans effectively.
 - Introduced **one-click booking** for self and assisted bookings, reducing call time for agents.
 - Designed demographic-based health analysis to create user intent for health tests.
 - Achieved **5M+ downloads**, contributing **25% of total revenue and 30% revenue** from app-generated leads.
- **Wellness & Supplement Store Launch**
 - Developed **AI-based personal diet plans**, reducing consultation time and adopted by **1M+ users.**
 - Enabled **revised diet plans** based on calorie consumption, introducing a paid plan option.
 - Launched **supplement store** on the web and CRM, integrating wellness advisor recommendations.

- Built **AI-driven recommendation engine** for herbal supplements based on blood test reports.
- **Stakeholder Management**
 - Directly reported to the **CEO/Founder**.
 - Prepared **annual and quarterly roadmaps** aligning with business goals.
 - Regularly collaborated with **Marketing, Sales, and Engineering** teams to identify opportunities.
 - Managed **Engineering Managers** across Consumer, Sales, Marketing, and Support functions.

Product Manager

Vigyaa | January 2021 – August 2021

- Led the **MVP launch** of the social platform built on **Next.js and Django** with **FastAPIs**.
- Defined and executed the **product roadmap**, including consumer posting, admin analytics, and moderation features.
- Implemented **ML-based sentiment analysis, labeling, and profane filtering** to maintain a healthy ecosystem.
- Designed a **suggestion algorithm** to dynamically change content recommendations based on post sentiment.
- Optimized **SEO & SEM strategies**, improving organic traffic and page rankings.
- Led roadmap creation, user stories, epics, backlogs, and sprint management.

Product Manager

Pregnative Technologies | January 2017 – December 2020

- Led the creation of **SUNO**, an innovative fetal monitoring device for expectant mothers.
- Managed end-to-end product development, including **hardware, mobile apps, and certification processes**.
- Developed the **NBirth, a B2B platform**- onboarding certified experts and launching educational webinars.
- Launched the NBirth store- **an e-commerce portal**, offering a curated selection of mom and baby merchandise, expanding our reach and services.

Product Manager

Mobinor Technologies | June 2016 – December 2019

- Built EasyB, a **SaaS platform** for cab drivers, offering cab management, location tracking, and booking management system.
- Developed Cabulo, India's first transparent outstation **cab booking platform**, enhancing accessibility and affordability.
- Introduced **EMI options** for cab services, revolutionizing the market.
- Designed scalable **SaaS-based infrastructure**, enabling seamless operations for cab businesses.

Android Developer

Ducere Technologies | April 2013 – June 2016

- Developed **BLE-enabled Android applications** for assistive navigation solutions.
- Designed **GPS-based tracking systems** improving location accuracy.
- Optimized app performance, reducing latency in real-time BLE communication.

Android Developer

Comspark Info India Pvt Ltd | December 2012 – April 2013

- Engineered **GPS-enabled Android applications** with geofencing capabilities.
- Developed custom UI components to enhance Android app usability.

EDUCATION

Bachelor of Technology (Computer Science and Engineering)

JNTUK, India | Graduated December 2012

TECHNICAL SKILLS

- AI/ML & Generative AI
- Agile & Scrum Methodologies
- Android, iOS, Python, SQL, JavaScript
- JIRA, Confluence, Asana, Notion
- UX/UI Prototyping (Figma, Adobe XD)
- Cloud Computing (AWS, GCP)
- Large Language Models (OpenAI, LLaMA)
- Business Intelligence (Metabase, Tableau)
- Vector Databases (FAISS, Pinecone)
- Cloud Telephony (IVR, Twilio, Exotel)
- CRM & Lead Management Systems
- Performance Marketing & Growth Hacking
- Search Optimization (Elastic Search, NLP)
