aaronpeterson0316@gmail.com

Education

Tennessee Technological
University
BS in Computer Science
May 2015

Key Skills

- Front End: React, Angular, Vue.js, Next.js, Nuxt.js, TypeScript, JavaScript, Material UI
- Back End: Go, Python (Django, Flask, FastAPI), Node.js (Express.js, NestJS)
- API Architecture: gRPC, GraphQL, REST, SOAP
- DevOps & Cloud: Kubernetes, GCP, CI/CD (Jenkins, GitHub Actions)
- Database: MySQL, PostgreSQL, MongoDB, DynamoDB
- Other: Linux Administration, Agile Methodology, OAuth 2.0, OpenID Connect,

Objective

Innovative Senior Software Engineer with over 8 years of experience in developing scalable and high-performance web applications. Successfully led projects that enhanced team efficiency and reduced deployment times. Proficient in cloud-native architectures and data pipelines, with a proven ability to manage large-scale data and improve system reliability.

Experience

JUN 2023 - PRESENT

Senior Software Engineer | Avanade – Seattle, WA

- Developed and deployed scalable React applications integrated with Python backends for clients in healthcare and finance, enhancing operational efficiency by 35%.
- Engineered microservices using Go and Python on GCP, improving system reliability and scalability.
- Designed secure RESTful APIs, facilitating seamless data exchange across client systems.
- Led cloud migration projects, transitioning legacy applications to GCP, resulting in a 30% reduction in infrastructure costs.
- Automated CI/CD pipelines with Jenkins and GitHub Actions, decreasing deployment times by 25%.
- Created interactive data visualization dashboards using React and D3.js, enabling clients to make data-driven decisions faster.
- Improved system observability by implementing Prometheus and GCP Monitoring, achieving 99.95% uptime for mission-critical applications.
- Partnered with cross-functional teams to develop tailored solutions aligning with client objectives.
- Mentored junior engineers and delivered internal training sessions to improve team proficiency with modern tech stacks.

Technologies Used: React, Python (Django, Flask), Go, GCP (Cloud Functions, BigQuery, Cloud Storage, Spanner), Kubernetes, Prometheus

Microservices
Architecture

- Soft Skills: Leadership, Team Collaboration, Problem-Solving, Communication, Critical Thinking, Time Management, Attention to Detail

NOV 2022 – MAY 2023

Senior Software Engineer | Google - Mountain View, CA

- Modernized internal tools for task and budget management, leveraging Python and React to improve performance by 30%.
- Architected GCP-based solutions for data tracking and reporting, increasing operational transparency by 40%.
- Automated testing and deployment workflows using Kubernetes, reducing system downtime by 20%.
- Enhanced user experience with custom React components, achieving a 15% increase in tool adoption across teams.
- Integrated advanced analytics capabilities into internal dashboards, improving data-driven decision-making processes.
- Led a transition to TypeScript, reducing bugs and improving code maintainability by 25%.

Technologies Used: React, Python (FastAPI, Flask), TypeScript, GCP (BigQuery, Cloud Functions, Cloud SQL), Kubernetes, Docker

NOV 2020 – OCT 2022

Software Engineer | Zendesk – San Francisco, CA

- Developed React and Angular web applications, increasing user engagement by 30%.
- Architected Python microservices, enhancing scalability and reducing operational costs by 25%.
- Improved CI/CD pipelines, cutting deployment times by 40%.
- Delivered custom API solutions for enterprise clients, improving data integration processes.
- Migrated legacy systems to GCP, enhancing performance and reducing downtime.

Technologies Used: React, Angular, Python (Django), GCP (Cloud Run, Pub/Sub, Cloud Spanner), Jenkins, GitHub Actions

JUN 2016 – OCT 2020

Full Stack Developer | HealthStream – Nashville, TN

- Built full-stack applications using Python, React, and Vue.js for healthcare platforms, boosting user satisfaction by 15%.
- Designed REST APIs for seamless integration with front-end components, improving data flow.
- Enhanced database performance with caching strategies, cutting load times by 20%.

- Collaborated with UX teams to refine user interfaces, driving a 10% increase in usability ratings.
- Led efforts to adopt microservices architecture, improving scalability and system robustness.

Technologies Used: React, Vue.js, Python (Flask), PostgreSQL, MongoDB, Docker
