PROFESSIONAL EXPERIENCE

Teaching Assistant

Illinois Institute of Technology, Chicago.

February 2024 – Present

- Assisted Professor Brian Vanderjack in Project Management, clarifying student queries on Scrum, Agile, and Waterfall methodologies, enhancing understanding and application of these critical project management principles.
- Reviewed and graded assignments and facilitate interactive discussions, deepening expertise in project management while contributing to students' academic development through constructive feedback and personalized support.
- Ancillary Professor Mark Campbell in Business Innovation, engaging and clarifying student queries and providing constant feedback.

Support Engineer

Microsoft Corporation India Pvt Ltd, Bangalore.

May 2022 - July 2023

- Teamed with Technical Excellence and Collaboration at Microsoft and played a pivotal role in the CSS DAS Browser team, ensuring an optimal customer experience across Internet Explorer, MS Edge browsers, and IE mode on MS Edge technologies. Handling over 35 critical cases, collaborated seamlessly with cross-functional teams, addressing diverse issues within Service Levels. Participating in Swarming Technical Cases and Triage, constant learning through training sessions, and further honing technical expertise. The following commitment to staying abreast of the latest technologies and troubleshooting methods allowed me to provide practical solutions to various technical issues.
- Customer Recognition and Award-Winning Performance: dedication to solving technical challenges, ranging from Active Directory to Networking, Windows OS, HTML, CSS, JavaScript, and application errors, earned an award for best case management. Beyond accolades,

acknowledged heartfelt emails from customers acknowledging the efforts in providing top-notch solutions and solidifying reputation for exceeding expectations at Microsoft.

Support Engineer

Arcserve, Hyderabad.

March 2021 - March 2022

- Proactive troubleshooter in Disaster Recovery: At StorageCraft, gave crucial support for backup and disaster recovery application, "DRaaS," catering to small and medium businesses, including MSPs. Mitigated production loss, solved critical cases on both On-Premises and On-Cloud platforms, ensuring the recovery of users' data. The technologies involved ranged from Shadow Protect-SPX and AWS S3 Storage to Cross-platform recovery Environment, covering a spectrum of applications such as Microsoft Azure, O365, and GSuite.
- Versatile Expertise and Recognized Performance: Utilizing a diverse array of tools and applications, including Hyper-V, VMware EXSi, and Exchange Server Granular Recovery, conducted training sessions for trainees and answered queries on StorageCraft products and VSS backup. designed a Training module on Cloud Apps Backup for new trainees, displaying commitment to knowledge sharing. My efforts were recognized with the prestigious "Best Performer of the Month" award for July and August 2022.

Technical Support Engineer

Druva Data Solutions, Pune.

March 2020 - November 2020

- Strategic Support in Data Recovery Solutions: Engaging with the Druva InSync project, a comprehensive Data Recovery solution for Endpoints and Cloud Apps: O365 and GSuite contributed a pivotal role in providing technical assistance to enterprise customers. The prompt resolution of tickets spanned across InSync's on-premises Data Recovery Solution and Cloud/Gov Cloud variations. The diverse applications and technologies involved, such as DLP, SQL Queries, and Cloud Technologies such as Microsoft Azure and O365, displayed versatile expertise.
- Efficient Problem Resolution and Technical Proficiency: Utilizing tools: Mobaxtream and Postman, SAML Message Decoder and Wireshark, I navigated intricacies in Data Deduplication, Compaction, and Retention. Additionally, proficiency extended to Integrated Mass Deployment, SCIM, and SSO (Single Sign-On) solutions. The following multifaceted approach to technical problem-solving, combined with tools: SFDC and RD-Manager, underscored my commitment to delivering effective solutions in the dynamic landscape of data recovery and cloud applications.

Technical Support Engineer

Symantec Software Solution Pvt Ltd, India, Pune.

January 2019 - January 2020

- Critical Support for Global Enterprises: As a valuable member of the Symantec Endpoint Protection Team, contributed technical support to enterprise customers, resolving critical issues for major accounts such as Coca-Cola, Serco, and Standard Chartered. My efforts were particularly notable when addressing incidents affecting over 75,000 endpoints. The appreciation received for contributions underscored my dedication to delivering effective solutions.
- Technical Proficiency and Collaborative Tools: Engaging with technologies such as Symantec Endpoint Protection Manager, Live Update Administrator Server, and Symantec Endpoint Protection Cloud, demonstrated technical proficiency in the security landscape. Leveraging tools such as WINDBG for Dump analysis, Cisco Webex for remote sessions, and Salesforce Tool for case management, ensured a comprehensive approach to problem-solving. it included utilizing Netmon-Wireshark, Perfmon, and other tools, showcasing versatility in managing cases, conferences, and technical analysis within the Symantec ecosystem.it

Support Engineer

Convergys India Pvt. Ltd, Pune.

March 2017 - January 2019

- Versatile Support in Microsoft EPS Environment: As part of Microsoft - EPS 24/7, played a crucial role in SLA-based LOBs, focusing on the Small Business Server Team (SBS) and Essentials Server. A hands-on exposure to diverse technologies, including MS Exchange Server, IIS, SharePoint, Windows Server Backup, Active Directory, and Networking, showcased expertise in critical areas of server management.
- Excellence in Customer Satisfaction and Crisis Management: I conducted regular technical presentations on these technologies and received recognition for achieving maximum customer satisfaction from September to November 2017. Additionally, was awarded the title of best performer from September to October 2018. During the tenure, I demonstrated resilience by expertly handling over 100 ransomware cases in 2017 and assisting customers in mitigating server issues. 2018, strongly managed an insurgence in case flow, resolving 150 cases related to network outages, directory services, performance, and mail flow issues from February to June 2018.
