SUMMARY

I am a highly experienced Senior Backend Engineer with over a decade of expertise in **Python, C# and ASP.NET**, architecting and delivering sophisticated enterprise-grade software solutions. Over the years, I have led multiple projects, driving substantial improvements in system performance and operational efficiency.

- Collaborated with the cloud architecture team to migrate critical services to **AWS** and **Azure**, reducing infrastructure costs by **30%** and improving system performance by **20%**.
 - Spearheaded the implementation of advanced **microservices** and integrated technologies like **SignalR** and **GraphQL**, achieving a **25%** increase in data processing efficiency.
 - Passionate about designing **scalable** and **secure** C# solutions, mentoring teams, and adopting the latest technologies to create impactful software.
-

EDUCATION

St. Mary's College of Maryland

Bachelor of Science in Computer Science

Aug 2004 – Dec 2008

TECHNICAL SKILLS

Backend: C#, ASP.NET Core, Python, Web API, Entity Framework, LINQ, Microservices Architecture,

Frontend: ReactJS, Angular, Blazor, Razor Pages, AJAX, HTML5, CSS3

Cloud/DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD Pipelines

Databases: SQL Server, MySQL, PostgreSQL, MongoDB

Testing/QA: xUnit, NUnit, Selenium, Jasmine, Karma, Protractor

Methodologies: Agile, Scrum, JIRA

EXPERIENCE

Senior Software Engineer

Constellation

Feb 2022 – Present

- Built backend services using **Python** and **Web API** for robust server-side functionality.
- Managed database interactions with **Python**, improving data access and storage efficiency.
- Set up **Azure Functions**, **Service Bus**, and **API Management Gateway** to improve system communication and scalability.
- Utilized **Jenkins** and **Terraform** to streamline CI/CD pipelines and reduce manual provisioning time by **40%**.
- Developed dynamic and responsive user interfaces using **React.js**, improving user engagement and reducing page load times by **30%**.
- Integrated **RESTful APIs** and **GraphQL** endpoints into React components, enabling seamless data flow between frontend and backend services.
- Implemented state management using **Redux** and **React Context API** to maintain application consistency and scalability.
- Utilized **React Hooks** to simplify component logic and improve code reusability across multiple modules.
- Collaborated with UX/UI teams to build reusable React components and styled them using CSS Modules and Styled-Components for consistent branding.
- **Designed** and **deployed** scalable cloud infrastructure using AWS EC2, S3, and RDS, ensuring high availability and performance across distributed systems.
- Implemented serverless architectures with **AWS Lambda** and **API Gateway**, reducing operational overhead and improving application response times.
- Configured **AWS CloudWatch** for real-time monitoring and alerting, significantly improving system observability and incident response.
- Orchestrated containerized microservices using **AWS ECS** and **Fargate**, streamlining deployment and scaling across environments.
- Automated infrastructure provisioning with **AWS CloudFormation** and **Terraform**, enabling consistent and repeatable cloud deployments.
- Integrated **AWS SQS** and **SNS** for asynchronous messaging and event-driven workflows, improving system decoupling and reliability.
- Designed and deployed cloud infrastructure on **Azure**, reducing operational overhead and ensuring scalability.
- Improved logging and error tracking with **Serilog** and **Application Insights**, enhancing system reliability.
- Built responsive user interfaces with **HTML5**, **CSS3**, **Blazor**, **Bootstrap**, and **Angular**.

Senior Software Engineer

Exelon

Apr 2020 – Feb 2022

- Developed highly scalable **Microservices** using ASP.NET Core and deployed them in hybrid cloud environments.
- Migrated legacy applications to **Azure**, leveraging **Docker** containers and **Kubernetes** for scalability and uptime.
- Built **RESTful APIs** and integrated real-time communication using **SignalR**, improving data processing efficiency by **25%**.
- Automated testing and deployment with **Jenkins** and configured **Terraform** for IAC, improving system uptime by **25%**.
- Optimized **Entity Framework Core** queries for database-heavy workloads, improving application performance.

Senior Software Engineer

CACI International Inc

Feb 2020 – Apr 2020

- Configured **Azure Functions** and **Service Bus Queues**, linked with **API Management Gateway**.
- Built backend services using **ASP.NET MVC**, **Web API**, and **XML** configurations.
- Utilized **Jenkins** and Maven-style build systems for CI/CD pipelines.
- Integrated **Azure Blob Storage** and **Table Storage**, reducing cloud storage costs by **30%**.
- Enhanced logging and debugging with **Serilog** and **Log4Net**.

Backend Developer

Textron Systems

Jun 2008 – Feb 2020

- Developed scalable backend solutions using **ASP.NET MVC** and **Entity Framework**.
 - Built **RESTful APIs** and **AJAX** functionality for real-time data exchange.
 - Led **SQL Server** database design and optimization using stored procedures.
 - Built **DALs (Data Access Layers)** using LINQ to SQL.
 - Deployed applications on **IIS** for high-performance production environments.
 - Used **xUnit** and **Selenium** for full-stack testing.
-
