

AKSHAY KUMAR N

Full stack .Net Developer

Email: akshaynagiligari@gmail.com

LinkedIn: www.linkedin.com/in/akshaykum-n

Phone Number: 812-310-3771 / 469-210-0473

TECHNICAL SKILLS:

Programming Languages	C/C++, C#, .Net, Java8, Core Java SE 8, Python 3/3.6, Type Script, PL/SQL
Object Oriented Modeling	UML, Rational Unified Process.
Design/Architecture	MVVM, MVC, Microservices, SOLID Principles, Dependency Injection.
IDE	Visual Studio 2012, 2014, 2015, 2017, 2019, 2022, Visual Studio Code.
Web Development	ASP.NET Core 6.0, Asp.Net MVC 4.0-5.0, ASP.NET WEB API, .Net Core, JavaScript, XML, HTML5, DHTML, CSS3, AJAX, XML, Blazor, Razor.
.NET Framework/Libraries	.NET 3.5-4.8, ADO.NET, EF 6.0, NuGet, SignalR, Entity Framework, Django/Flask, ASP.NET Core, .NET Core / .NET 5, Windows Workflow Foundation (WF), NHibernate.
JavaScript Libraries	jQuery, JSON, Bootstrap, JavaScript, React JS, Angular 2/7/8/14/15, RxJS, Vue.js.
Messaging Services	Apache Kafka, AWS SQS, MSMQ.
Databases	MS SQL Server, T-SQL/SQL Server (2005/2008/2012/2014), SSMS2019, CosmosDB, Azure SQL, Oracle 10g, PostgreSQL, Visual Database (VBD), MongoDB, Dynamo DB.
Cloud	Microsoft Azure (Compute, Functions, Logic Apps, Storage, Databases, Security), Azure DevOps, AKS, Azure cognitive services, Azure Worker Roles, AWS, ECR, EKS, EC2.
Infrastructure as Code (IaC)	Azure Bicep, Terraform, Ansible, YAML.
CI/CD Tools	Jenkins, Docker, Kubernetes, Terraform, Ansible, ArgoCD.
Web Server/Application Servers	Apache, Nginx, IIS, Tomcat, Microsoft Azure App Service, WebLogic, Jetty.
Authentication/Authorization	ASP.NET Identity 1.0/2.0, OAuth 1.0/2.0 and OpenID Connect.
Testing/Documentation	NUnit, XUnit.net, Moq, Selenium WebDriver, Postman, Swagger.
Advance Technologies	Prompt Engineering, ChatGPT 3.5/4, LLM (OpenAI, Hugging Face), MLMS, Prompt Engineering.
Other	Agile, Coded UI Automation testing, WCF, WPF, REST, SOAP, Web API, MS Excel, TCP/IP, SharePoint 2000-2005, LINQ, Entity Framework, TDD, CMS, Windows, LINUX, IOS, JDBC, SpringBoot, Spring MVC, Spring IOC, Linux commands, Shell scripting. (Cloud technologies - AWS, AZURE) ERP&CRM(Microsoft Dynamics 365 F&O, MS Dynamics CRM (4.0, 2011, 2013), PowerApps, Power BI, Power Automate)

CERTIFICATIONS:

Microsoft Certified Azure Developer Associate.

Microsoft Certified Solutions Developer.

Amazon Certified AWS Developer Associate

PROFESSIONAL SUMMARY:

- Highly accomplished **Full Stack .NET** Developer with 9+ years of experience leading modernization initiatives and building **cloud-native** applications.
- Expertise in **.NET development ASP.NET Core 5/6/8, Azure SQL**, and modern UI design using Material Design.
- Proven ability to drive cross-functional teams, **redesign UX/workflows**, and implement **CI/CD** pipelines using GitHub Actions.
- Hands-on expertise in building **robust, scalable applications using JavaScript, Angular 16 and RX JS**, and have led successful implementations within **Agile/Scrum environments**.
- Highly proficient in **Azure DevOps, Jenkins, Terraform, and Docker/Kubernetes, Azure Cloud, CI/CD pipelines**, and API testing, with a strong focus on quality and performance.
- My experience spans **full-stack development, API integrations, and cloud architecture**, driving both technical and business goals using **.NET microservices** framework like **Azure Service Fabric**.
- Proficient in **front-end** technologies using JavaScript frameworks like **Angular, ReactJS, Vue.js, and TypeScript** for building responsive UIs.
- Strong background in **database design, optimization, and security** with **SQL Server, MongoDB, CosmosDB**, and AWS services.
- Proven track record in building secure and scalable applications for public sector and large enterprises, including working **with PCI DSS and FERPA** compliance.
- Implemented Information privacy and security across the system based on **FERPA** requirements
- Demonstrated expertise in implementing microservices, **service-oriented architecture** (SOA), and **cloud-native solutions** with emphasis on security, performance, and maintainability.
- Proficient in **system analysis** and **design development** experience in **C#, VB .NET** within depth Knowledge of **OOA, OOD** and **OOP** concepts.
- Experience in install, configure, upgrade and customization in **MS Dynamics CRM 4.0, 2011, 2013**.
- Experience in designing databases, **SSIS, SSRS** in **SQL-Server, AWS DMS/SCT & SQL Azure**.
- Experience in database design in **SQL Server** Stored Procedures and **Triggers**.
- Experience on **Micro Services, Developed Micro Services** using **ASP.Net Core, EC2, RDS, Dynamo DB, S3, Cloud watch**, and **Docker** for its various advantages like loose coupling and design pattern and **python** to collect usage data from different data centers to bill clients of their cloud usage.
- Extensively developed **UNIX Shell Scripts** and managed User administration like Create, delete, modify users and groups with setting up **sudoers** Access Privileges reset/create passwords on **LINUX** Hosts.
- Analyzing current **UNIFACE** application as a proof of requirement Engineering and prepared artifacts such as Screen notes, functional Design Requirements documents Detailed requirement list.
- Scheduled report generation jobs through **HangFire** and **Autosys** for batch scheduled processing on jobs like fire and forger jobs to send emails to clients, process files, long tasks, etc.
- Experienced in developing Webservices including **SOA** applications using **C#.NET** Serviced Components, **.NET WCF** Services & **Microsoft Azure** with **Microservices**.
- Generate Adhoc .pdf reports. This includes gathering the required data from several data source and generating .pdf reports using **ITEXTSHARP**, a third-party tool to generate PDF files using C#. Provide guidance to client on **PCI DSS** awareness
- Deep understanding of **SharePoint** functionalities, including site collections, lists, **libraries, workflows**, and the ability to customize them using SharePoint **Designer, PowerShell scripting**, and the **SharePoint Framework (SPFx)**.
- Experience on configure, **SCM, Build/Release Management**, and developing **YAML** based infrastructure as a code (**IAC**) pipeline using **bicep, terraform, Azure DevOps, Jenkins** and **Jules** to serve release operations for production on cross platform.
- Experience in using tools like **Visual Studio .Net, VSTS, VSS, CVS, SVN, TFS, GIT & Bitbucket**.
- Proficient in understanding architecture requirements and ensuring effective design, development, and analysis of the code.
- Extensive experience in developing **UI** applications using **Angular, ReactJs, Blazor, HTML, Java script, jQuery, CSS, PWA & Typescript**.

EDUCATION:

- Bachelor of Science in Computer Science - Osmania University (2015).

- Masters in computer science at University of New Haven (2024).

PROFESSIONAL EXPERIENCE

Client: PAYPAL, TX.

Sept 2024 - Till Date

Role: Sr. Full Stack.Net Developer

Responsibilities:

- Spearheaded the modernization of a legacy system to a modern, cloud-native solution using ASP.NET Core 6, Azure SQL, and Angular with a Material Design library.
- Led the migration of on-premises applications to **Azure, leveraging Azure App Service, Azure SQL, and Azure Storage**, ensuring seamless transition and improved scalability.
- Migrating the database from Legacy SQL OnPrem to Azure SQL, improving performance and scalability.
- Leveraged **RxJS observables** to manage asynchronous operations in **single-page applications (SPAs)**, enhancing user experience and application responsiveness.
- Optimized **legacy codebases** by resolving performance bottlenecks, improving maintainability, and migrating version control to **Git** for streamlined collaboration and code integration.
- Collaborated on **SQL database architecture**, including schema design, performance tuning, and query optimization for **Oracle, MSSQL, and MongoDB**.
- Developed and tested **REST APIs** using **.NET Core** and built **identity microservices** with **AWS Lambda** for secure, scalable solutions.
- Designed and implemented **responsive, cross-browser-compatible user interfaces** using **HTML, CSS, JavaScript, Bootstrap, and Angular**, ensuring visually appealing and functional designs.
- Utilized **ASP.NET MVC** features like routing, model binding, and action filters to streamline request handling and enhance application performance.
- Develop custom **SharePoint** web parts to enhance functionality within a sit and integrate third-party applications with **SharePoint** using APIs
- Design and implement **custom SharePoint lists and views** to optimize data management and create responsive SharePoint user interfaces using front-end frameworks
- Automate repetitive tasks using **PowerShell scripts** within the **SharePoint** environment
- Implemented **application validation, exception handling, and logging components** using **MS Dynamics CRM** to improve system reliability and maintainability.
- Applied **Object-Oriented Programming (OOP)** and **Object-Oriented Analysis and Design (OOAD)** principles using **C#** and **VB.NET** on Windows platforms.
- Automated **Office 365 tasks** using **PowerShell scripts**, improving operational efficiency.
- Developed applications using **Visual Studio Code** and **Visual Studio** with **MVC 5/6, WebAPI, .NET Core, TypeScript, and SASS** for a robust development environment.
- Configured and maintained **WSO2 API Manager**, including creating, promoting, and publishing APIs, and granting access to application teams.
- Upgraded **WSO2** from version **2.4.0** to **2.6.0** and configured it across lower and production environments.
- Followed **Agile methodologies** to track progress, resolve issues, and ensure timely delivery of high-quality products. Participated in **ServiceNow instance upgrades** and cloning activities across multiple environments.
- Designed complex front-end interfaces using **.NET, MVC, Bootstrap, jQuery, and LESS**, incorporating **NuGet packages** and **jQuery plugins** for advanced functionality.
- Performed **ETL processes** using **SSIS packages** with **C#.NET 3.5** and **Visual Studio 2010** to transform and load data from native databases to SQL Server.
- Expertise in **ADO.NET** and **ORM frameworks** like **Entity Framework** and **LINQ to SQL** for efficient data access and manipulation.
- Applied **security lockdown measures** for **Linux and Windows servers** to meet compliance standards before migrating to public networks.
- Developed **governance standards** using **TOGAF** to define business and architectural capability models.
- Created and optimized **stored procedures, views, and functions** in **Oracle 12C/10g** and **SQL Server** for efficient database operations.
- Mentored team members, reviewed development activities, and provided guidance to enhance their technical skills.
- Utilized **VSTS** and **Git** for version control and deployed builds across **Dev, QA, UAT, and Prod**

environments.

- Wrote **unit, integration, and automation test cases** to ensure application quality and reliability.
- Participated in the full **project development lifecycle**, from requirements gathering and system architecture design to implementation, testing, and deployment.
- Enabled **Open ID** and Windows Live authentication in **Azure** cloud applications for secure user access.
- Debugged and tested APIs using **Postman** and **Swagger**, ensuring seamless integration and functionality.
- Built and managed **application pipelines** for **Build & Release** using **Azure DevOps**.
- Accessed and analyzed telemetry data through **Azure Event Hubs** for actionable insights.
- Created and optimized **MongoDB documents** and indexes to enhance database performance.
- Resolved **UAT/PROD issues** promptly, providing effective solutions to ensure system stability.
- Participated in **sprint planning, requirement analysis, and architectural discussions** to align development efforts with business goals.
- Configured and managed **Azure AD Connect** and **Microsoft Azure Active Directory** for secure identity management.

Environment: VS 2022, .NET 5.0/6.0, .NET Core, C#, Web API, PWA, Angular 16, RxJS, SQL Server, MongoDB, TDD, Kafka, Azure DevOps, Azure AD, Azure Cloud, Terraform, EF, WCF, MVC, MS CRM, SSIS, AWS Lambda, Bootstrap, jQuery, LESS, TS, SASS, Git, VSTS, Postman, Swagger, JIRA, Oracle 12C/10g, LINQ, ADO.NET, PowerShell, WSO2, SN, Open ID, Win Live Auth, Linux, Win Servers, TOGAF, Agile, CI/CD, IaC, Azure Event Hubs, NuGet.

Client: State of NEW MEXICO Department of Health, NM

Sept 2023 – Aug 2024

Role: Sr. Full Stack .Net Developer

Responsibilities:

- Developed **REST APIs** and **microservices** using **.NET Core** and **Azure Service Fabric**, ensuring scalable and efficient solutions.
- Led multiple projects involving **.NET Core, MS SQL Server, and Entity Framework** for enterprise-grade applications.
- Automated **API integration tests** and wrote scripts to ensure seamless service integration.
- Participated in the design and deployment of cloud-native services within **Azure** to enhance scalability and performance.
- Enhanced application performance by implementing material UI, routing, advanced **NgRx state management** techniques.
- Ensured code integrity and version control using **Git** and **Azure DevOps CI/CD pipelines**.
- Developed **SSIS scripts** and components to call wrapper classes, reducing code complexity.
- Rewritten to showcase Azure and .NET experience with quantifiable achievements. Uses action verbs and the STAR method.
- Created **SharePoint site** functionality to meet business requirements and integrated SharePoint with other **enterprise applications** and systems.
- Involved in deployment activities for **QA, Dev, and Prod environments** using **TFS**.
- Implemented **.NET Security features** such as **authentication (AuthN)** and **authorization (AuthZ)** using form-based and Windows-based authentication, role management, and user account impersonation.
- Applied **OOP concepts** like encapsulation, inheritance, polymorphism, and abstraction. Participated in **requirement analysis** and **architecture planning** discussions for sprint planning.
- Developed a serverless application using Azure Functions and Azure Logic Apps to automate business processes.
- Designed **business processes** and **data flows** between **MS Dynamics CRM** and third-party applications. Created **procedures, tables, and views** for **Cosmos DB, Oracle, MSSQL, and SQL Server databases**.
- Developed **ERP solutions** using **microservices architecture**.
- Served as an architect for **CA APIM implementations**, including online banking strong authentication and omnichannel solutions.

- Collaborated with the **UNIFACE architectural team** and **SMEs** to perform feasibility studies and project implementations.
- Used **C# .NET** within SSIS script tasks to call **SOAP API methods** for data export/import and flat file management.
- Developed **TypeScript objects**, including components, modules, providers, services, interfaces, and classes.
- Analyzed user needs and applied testing procedures using **DevOps tools** like **Rally, JIRA, Jenkins, and GitHub**.
- Utilized **N-tier architecture** for presentation, business, and data access layers.
- Involved in **ServiceNow instance migrations** using update sets.
- Designed **cross-browser-compatible interfaces** using **Bootstrap, JavaScript, CSS3** and **Angular**.
- Created **relational databases, tables, stored procedures, packages, views, and functions** in **Oracle 12C/10g** and **SQL Server**.
- Resolved **UAT/PROD issues** to ensure seamless application performance.
- Skilled in writing **unit, integration, and automation test cases** to validate functionality and quality.
- Implemented **authentication technologies** such as **AD FS, SAML, SSO, and OAuth**. Proficient in **Visual Studio 2017, .NET 3.5/4.0, .NET Core, GIT, AngularJS, Azure DevOps, Azure Cloud, Terraform, Docker, and Kubernetes**.
- Demonstrated excellent **problem-solving** skills, **teamwork**, and the ability to deliver high-quality software under tight deadlines.

Environment: .NET Core, Azure SF, MS SQL Server, EF, REST APIs, Microservices, Azure, NgRx, Git, Azure DevOps, CI/CD, SSIS, Kafka, TFS, .NET Security (AuthN/AuthZ), OOPS, MS CRM, Cosmos DB, Oracle, MSSQL, SQL Server, ERP, CA APIM, UNIFACE, C#, SOAP API, TypeScript, DevOps (Rally, JIRA, Jenkins, GitHub), N-Tier Arch, SN, Bootstrap, JS, CSS3, Angular 2/4, AD FS, SAML, SSO, OAuth, VS 2017, .NET 3.5/4.0, GIT, AngularJS, Terraform, Docker, Kubernetes.

Client: **WALGREENS, NJ.**

Mar 2023 – Aug 2023

Role: **Full Stack.Net Developer**

Responsibilities:

-
- Reduced application load time by **30%** through optimized use of **RxJS** in **Angular** projects.
 - Migrated legacy codebases to **Angular 16+**, enhancing maintainability and user experience.
 - Designed and deployed **scalable cloud solutions**, reducing infrastructure costs by **25%**.
 - Proficient in developing applications using **ASP.NET, C#.NET, ReactJS, Java, Web API, and GAIA Cloud**.
 - Expertise in understanding **architecture requirements** and ensuring effective **design, development, migration, validation, and support activities**.
 - Extensive knowledge of **Microsoft Azure Service Fabric** for packaging, deploying, and managing scalable **microservices** and containers.
 - Troubleshooted and solved bugs related to SharePoint sites in Enterprise production environments.
 - Created **procedures, tables, and views** for **Oracle, SQL Server, and MSSQL** databases.
 - Worked with **Autosys** and **Control-M jobs** for backend interfaces.
 - Developed **unit test cases** and requirement understanding documents to assist the testing team during **system integration testing (SIT)**.
 - Designed complex **SSIS packages** to transfer data from flat files to **SQL Server** using **Business Intelligence Development Studio (BIDS)**.
 - Used **Kibana** for visualizing **Kafka topic messages** to identify failures or search data streams.
 - Partnered with cross-functional teams to ensure programs aligned with **PCI compliance** requirements.
 - Developed **XSLT** and **C#.NET** techniques in **BizTalk** maps to process **HIPAA** and **EDI** data.
 - Skilled in developing **REST APIs** with **Azure Service Fabric stateless microservices** using **ASP.NET Core**. Set up development environments using **Blazor, .NET, and ASP.NET Core**.
 - Familiar with creating **reusable components** and **guards** to enhance web application functionality.
 - Developed **front-end components** using **HTML5, CSS3, Bootstrap 3, and PWA**. Strong knowledge of technology and domain, with the ability to lead teams toward achieving goals.
 - Involved in **requirement analysis** and **architecture planning** during sprint discussions.

- As a **HIPAA EDI Manager**, reviewed functional and technical specifications for messages.
- Skilled in **reverse engineering** by deconstructing business entities into smaller, independent microservices.
- Expertise in deployment activities for **QA, Dev, and Prod environments**, including support and deployment of builds using **Jenkins/Jules**.

Environment: RxJS, Angular 16+, ASP.NET, C#.NET, ReactJS, Java, Web API, GAIA Cloud, Azure SF, Microservices, Oracle, SQL Server, MSSQL, Autosys, Control-M, SSIS, BIDS, Kibana, Kafka, PCI, XSLT, BizTalk, HIPAA, EDI, REST APIs, ASP.NET Core, Blazor, HTML5, CSS3, Bootstrap 3, PWA, Jenkins, Jules, SIT, OOP, N-Tier Arch, CI/CD, Git, JIRA, Rally, Docker, Kubernetes.

Thomson Reuters, Hyderabad.

Sept 2018 – Jan 2023

Role: .Net Developer

Responsibilities:

- Designed, analyzed, and implemented code using **ASP.NET MVC, Angular, AngularJS, Web API, and Microsoft Azure Cloud**.
- Proficient in developing and maintaining applications with these technologies, ensuring high performance and scalability.
- Developed and maintained **SQL Server jobs**, optimizing database operations and performance.
- Expertise in writing **unit test cases** and **integration test cases**, ensuring code quality and reliability.
- Conducted **functional testing** using the **Visual Studio Test Suite**, ensuring robust application performance.
- Coordinated **release management** activities, ensuring smooth and timely deployments.
- Created **VSO Build and Release definitions**, streamlining CI/CD pipelines.
- Utilized **TFS** and **VSO** for **source control**, ensuring efficient version control and collaboration.
- Deployed and supported applications on **Microsoft Azure**, leveraging **Azure Cosmos DB** for database operations, including **CRUD** functionalities.
- Managed **source control** and **version control** using **Team Foundation Server (TFS), Git, and SVN**, ensuring code integrity and streamlined workflows.
- Integrated applications with **SAP systems**, enabling seamless data exchange and system interoperability.
- Delivered **high-quality code** on time and within budget, adhering to **SDLC processes** and methodologies.
- Developed and optimized **SQL queries** and **stored procedures** in **SQL Server**, enhancing database performance and efficiency.
- Analyzed **business requirements** and translated them into functional applications, ensuring alignment with stakeholder needs.
- Troubleshoot complex issues, identifying root causes and implementing effective solutions.
- Demonstrated strong **team collaboration** and **leadership skills**, guiding teams toward achieving project goals.
- Communicated effectively with clients and stakeholders, ensuring clear understanding and alignment on project objectives.
- Applied **analytical** and **problem-solving skills** to address challenges creatively and effectively.

Environment: ASP.NET MVC, Angular, AngularJS, Web API, Microsoft Azure Cloud, JSON, SQL Server, Visual Studio Test Suite, VSO Build/Release, TFS, Git, SVN, Azure Cosmos DB, SAP, CRUD Operations, SDLC, CI/CD Pipelines.

Client: Zetagile Info Solutions Pvt. Ltd., Hyd.

Jan 2015– Sept 2018

Role: Software Engineer - .Net

Responsibilities:

- Designed, analyzed, and implemented code using **ASP.NET MVC, AngularJS, Web API, and Microsoft Azure Cloud**.
- Developed, configured, and maintained **SQL Server jobs** and optimized database queries for performance.

- Analyzed business requirements and implemented solutions using **.NET technologies**, ensuring alignment with stakeholder needs.
- Participated in **code reviews** to enhance code quality and performance.
- Presented **demos** to team members and clients to showcase software features and functionality.
- Utilized **WCF services, JavaScript, jQuery, LINQ, Lambda expressions, XML, and XSLT** to implement features and improve application functionality.
- Achieved project deadlines through efficient **time management** and **team collaboration**.
- Developed innovative solutions for complex problems, enhancing software performance and functionality.
- Identified and resolved software **bugs** and issues, improving overall system performance.
- Stayed updated with the latest **.NET technologies** and frameworks to ensure modern development practices.
- Wrote **unit test cases** and conducted **integration testing** to ensure code quality and stability. Prepared **technical documents** to help teams and clients understand software functionality.
- Worked with **Visual Studio 2012, .NET 3.5/4.0, ASP.NET, Web Forms, C#.NET, SQL Server 2008, and SVN**. Used **NCR in-house tools** for **POS development**.
- Demonstrated strong **communication skills, quick learning ability, and team collaboration**.
- Proactively suggested improvements to the software development process and workflow.
- Worked in an **Agile development environment**, adapting to changes in the software development lifecycle. Contributed to company growth by delivering **high-quality software solutions**.

Environment: VS 2012, .NET 3.5/4.0, ASP.Net, Web Forms, ASP.Net MVC, C#.Net, LINQ, WCF, HTML5, JavaScript, ASP.NET, Unit Test Cases, SQL Server 2008, SVN and NCR in-house tools used for POS Development.
