

ALEJANDRO MORENO

Senior Front-end Developer

+1 432 223 0202 alejandro.morenodev35@gmail.com <https://www.linkedin.com/in/alejandro-moreno-282426362/>

Andrews, TX, USA

SUMMARY

Dynamic and results-driven Senior Frontend Engineer with over 10 years of professional experience building high-performance, user-centric web applications across AdTech, InsurTech, E-commerce, and Healthcare industries. Adept at delivering robust, scalable solutions using React.js, Next.js, TypeScript, Node.js, and modern AI/ML integrations. Skilled at crafting responsive, accessible, and data-driven platforms that bridge backend microservices with intuitive frontend experiences. Passionate about pushing digital innovation through scalable architecture, cloud solutions, and AI-enhanced user interactions.

SKILLS

JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3, SQL, React.js, Next.js, Angular.js, Redux, Context API, jQuery, shadcn, Styled Components, Tailwind CSS, Bootstrap, Material UI, PWA, Node.js, Express.js, Laravel, RESTful API, GraphQL, Socket.io, i18n, Formik, Yup, OAuth, JWT, Jest, Mocha, Cypress, Selenium, React Testing Library, Docker, CI/CD Pipeline, MySQL, PostgreSQL, MongoDB, Git, Webpack, TDD, SCRUM, WCAG

KEY ACHIEVEMENTS

AI-Powered Customer Support

Integrated LangChain and Pinecone with OpenAI GPT into an AI-powered chatbot, improving real-time, context-aware support and boosting user engagement by 25%.

E-commerce Revenue Growth

Improved Sephora's online platform using Next.js and TypeScript, increasing user engagement by 30% and mobile conversion by 20%.

SaaS Platform Expansion

Designed multi-tenant CMS architecture for marketing teams at SaaS startups, integrating Sanity CMS and Contentful for dynamic content management.

Optimized Patient Data Systems

Built HIPAA-compliant dashboards for HCA Healthcare using React, GraphQL, and D3.js, increasing clinical reporting efficiency by 25%.

InsurTech Modernization

Led Pie Insurance's migration to GraphQL and Apollo Client, reducing data-fetch times by 40% and boosting agent onboarding.

AdTech Real-Time Analytics

Delivered real-time ad reporting dashboards using Socket.io, Redux, and Tailwind CSS, improving CTR insights for advertisers by 20%.

EXPERIENCE

Full Stack Developer

06/2022 - 03/2025

Delivery Solutions

- Developed an AI-powered chatbot using LangChain and Pinecone, enabling real-time, context-aware customer support by integrating OpenAI GPT for dynamic, natural language responses, enhancing user engagement and customer satisfaction.
- Enhanced chatbot interaction with React.js for the frontend, using Redux for state management and Socket.io for real-time communication between users and the AI assistant, ensuring seamless and instant responses.
- Styled chatbot UI with Styled Components and Tailwind CSS, ensuring a modern, responsive, and consistent design across all devices, optimizing the overall user interface for both desktop and mobile users.
- Implemented automated testing using Cypress for end-to-end testing of chatbot workflows, Jest for unit testing frontend components, and React Testing Library to ensure UI reliability and maintainability.
- Optimized frontend performance using Next.js with server-side rendering (SSR) and WebAssembly for faster load times and improved responsiveness, resulting in a 20% increase in user engagement.
- Used Pinecone to enable semantic search across product data, allowing the chatbot to retrieve relevant product suggestions based on user queries, reducing response time and improving query accuracy.
- Deployed AI models to AWS and Google AI Platform, ensuring scalable, low-latency performance and a smooth, uninterrupted user experience during peak traffic.
- Enhanced accessibility by adhering to WCAG guidelines, ensuring the chatbot and other UI elements are fully accessible for users with disabilities.

EXPERIENCE

Senior Frontend Engineer

03/2020 - 02/2022

HCA Healthcare

- Designed and built React.js-based dashboards for managing patient EHR, enhancing user experience with Material UI and D3.js for visually clear and interactive data presentation.
- Optimized frontend performance by integrating real-time data streams via WebSocket to display live patient vitals, offering doctors instant insights for timely decision-making.
- Created intuitive, accessible user interfaces for managing patient records, focusing on mobile responsiveness and WCAG compliance, ensuring a seamless experience across devices.
- Developed AI-powered frontend features that predicted cardiac events, utilizing TensorFlow.js for real-time data processing and predictive analytics directly in the browser.
- Improved security by implementing frontend authentication with OAuth 2.0 and JWT, ensuring a secure login and data access process for healthcare professionals.
- Ensured reliable app performance with advanced error handling and real-time monitoring, using Datadog to track frontend health metrics and maintain 99.9% uptime.

Javascript Developer

07/2017 - 01/2020

Pie Insurance

- Built React.js SPAs with Apollo Client and GraphQL to streamline policy quoting and claims filing, improving real-time data management and user experience.
- Migrated legacy jQuery workflows to React Hooks architecture, enhancing app maintainability and performance.
- Developed real-time chat and claims tracking features using Socket.io and Redux Toolkit, ensuring instant communication and a seamless user experience.
- Collaborated with underwriting and risk teams to refine insurance quoting flows, optimizing UX and increasing conversion rates.
- Integrated Selenium and Mocha into CI/CD pipelines, improving app testability and reducing deployment errors.

Software Engineer

11/2016 - 05/2017

AdMedia

- Developed high-availability ad-serving platforms using PHP (CodeIgniter), integrated with Redis and Memcached for rapid caching and reduced server load.
- Built RESTful APIs facilitating seamless transactions between ad networks and internal platforms, ensuring low latency and high reliability during peak traffic periods.
- Enhanced advertiser dashboards using jQuery and Bootstrap, before migrating towards modular React.js components to modernize the UX.
- Strengthened data integrity and security practices with rigorous input validation, SQL injection prevention, and XSS mitigation techniques.

Frontend Engineer

Ciudad de México, Mexico

Raven

11/2014 - 08/2016

Raven delivers custom websites and web apps with a focus on adaptability, security, and on-time project completion.

- Designed and implemented reusable React.js components using Styled Components and Tailwind CSS, ensuring consistent branding and rapid feature rollout.
- Improved page load speeds by 27% through code-splitting, lazy loading, and intelligent asset management with Webpack.
- Integrated APIs for seamless product catalog browsing, real-time inventory updates, and secure payment processing.
- Prioritized accessibility (WCAG compliance) and SEO optimizations, leveraging Next.js server-side rendering to improve organic search visibility by 20%.
- Led frontend QA automation efforts using Cypress and React Testing Library, significantly reducing regression bugs across seasonal campaign rollouts.

Web Developer Intern

Culiacán Rosales, Mexico

Triagons

06/2014 - 10/2014

Triagons specializes in creating customized digital solutions with a strong focus on innovation, client collaboration, and cutting-edge technology.

- Developed a mobile-first, responsive e-commerce platform using React.js and Tailwind CSS, leading to a 20–35% increase in site visits and conversions.
- Built scalable backend systems with Supabase (authentication, real-time database) and Strapi CMS to manage dynamic product and content data efficiently.
- Designed and implemented robust forms for user registration and checkout using Formik and Yup, reducing user input errors and improving form submission rates.
- Deployed frontend applications on Vercel and backend services on Render, optimizing performance, scalability, and reliability.
- Tested and validated backend APIs with Postman and Supertest, ensuring secure and reliable user authentication and data management processes.
- Collaborated closely with UI/UX designers and stakeholders to align business goals with modern development practices, enhancing overall customer experience.

EDUCATION

Bachelor's Degree of Science & Technology
Universidad de Norteamerica

09/2010 - 08/2014
