

PROFESSIONAL EXPERIENCE

JP Morgan Chase & Co.

Jersey City, NJ
Aug 2022 - Dec 2024

Role: Associate Product Analyst

- Designed workflows and operations charts to document procedures, reducing time spent on offline processes by 20%.
- Managed agile metrics (sprint velocity, burndown charts) and delivered executive-level reports, including Product reviews and Management reviews.
- Created epics, user stories, and acceptance criteria for stakeholder alignment, ensuring 96% on-time delivery by mitigating engineering roadblocks.
- Acted as the liaison between product, and IT, to understand business demand for new features and new potential workflows to be built.
- Collaborated with Product Owners, Engineering Leads, and Analytics teams to define sprint goals; this strategic alignment resulted in delivering 15+ key features on schedule while maintaining a high-quality assurance standard.
- Conducted full workflow testing from staging to production & performed UAT (User Acceptance Testing), and provided demos for business users post-production.
- Fostered communication between stakeholders, engineering, and marketing, resulting in improved speeds of feature development life-cycle by 26% year over year.
- Utilized Microsoft Visio & Balsamiq tools for creating wireframes, use case diagrams & system diagrams.
- Facilitated communication and approval processes for Legal, Risk, Compliance, and Controls forums, ensuring audit compliance and timely decision-making.

Piper Jaffray, NY

New York City, NY
Aug 2017 - July 2020

Role: Business Analyst

- Spearheaded the adoption of Scrum ceremonies within the team, leading daily stand-ups and sprint planning sessions; improved team accountability and increased task completion rate by 25% within the first quarter.
- Collaborated with stakeholders to align sprint sequencing with product goals, achieving 90% sprint completion rate.
- Experience in Project management with proficiency in understanding SDLC, Requirement gathering, performing testing, and reviewing test cases and test scenarios.
- Worked on Change Request prioritization, taking meetings with the business leads, explaining the Scope of Change Requests, and getting feedback on technical limitations and other dependencies.
- Expertise in handling and planning Change requests and product Backlog also helped in Sprint Planning.
- Collaborated with stakeholders across departments to ensure seamless communication and project execution.
- Reviewing the requirements with various stakeholders to help the group understand the functionality of the product.
- Performed GAP analysis, AS-IS /TO-BE analysis, and defect tracking using JIRA.
- Understanding of Defect life cycle. Acting as a liaison for Business and IT to provide a clear understanding of the requirements.
- Proficiency in Tracking, fixing, and assigning it to the appropriate team using Integrity.
