SUMMARY

MBA Professional with over 14 years of experience in Business Analysis, IT, and Project Management. Certified in Business Analysis (CBAP), Project Management (PMP), and Professional Scrum Master (PSM II) with extensive experience in Agile. Project management experience in ERP migration into SAP. Business Analyst experience in eCommerce and Telecommunications. I am a collaborative team player with outstanding organizational skills and decision-making capabilities with experience at two of the “Big 4” IT consulting companies.

EXPERIENCE

January 2023–Present

Senior Business Analyst • PwC • Texas

- Analyzed client applications and documented business and solution requirements in the form of BRD, SOP, FRD, user stories, features and epics in Azure DevOps to support process improvements, workflow automation, and system enhancements
- Redesigned frameworks and documented capabilities to improve integration and traceability. Created a multi-year roadmap for the implementation of Wireframe.
- Worked with UX/UI teams to create wireframes and mock-ups using Figma.
- Managed UAT and regression testing
- Led systems design and configuration activities, ensuring alignment with business requirements, while providing ongoing product support to optimize system performance and user satisfaction.
- Conducted gap analyses and created traceability matrices.
- Facilitated sprint planning, prioritized tasks, and sprint completion using Agile.
- Documenting As-Is and To-Be processes using BPMN in MS Visio and developing capability maps and value stream models
- Advised senior management on business architecture and trends. Worked with stakeholders to gather and refine requirements.
- Collaborated across all client's departments and functional departments to define business needs and foster strong communication and alignment with stakeholders
- Coached Business Analysts and client teams. Provided oversight for projects and ensured alignment with business goals.
- Provided ongoing functional support by troubleshooting and resolving day-to-day business, system, and user-related issues.

August 2015–December 2022

Senior Business Analyst • Deloitte • Texas

- Mapped security permissions to regulatory control requirements.
- Advised senior management on business architecture, trends, and technologies

Administration

Meerut Institute of
Engineering and Technology
Meerut, India
Bachelor of Technology,
Specialization in Computer
Science

EXPERIENCE (CONT'D)

- Identified and inventoried stakeholders for AEM Portal and Widget Inventory Website. Gathered business requirements, created user stories and use cases in Azure DevOps, and documented processes.
- Led the seamless integration of technology solutions into day-to-day operations, ensuring alignment with business goals and measurable performance improvements.
- Collaborated with cross-functional teams to implement enterprise applications that optimized workflows, reduced manual tasks, and improved data accuracy
- Partnered with application consultants and SMEs to enhance system functionality and improve end-user experience
- Managed third-party system integrations, ensuring seamless data exchange and maintaining system reliability and integrity.
- Oversaw integration of external vendors and applications, safeguarding data consistency and minimizing service disruptions.
- Authored test plans, performed UAT, led bug fixes and regression testing with vendor (CGI) for multiple applications for Widget Inventory Website.
- Provided coaching and mentorship to business analysts and client resources, supported L1 and L2 client requests, and triaged issues to ensure resolution.
- Led project analysis and execution by contributing to the development of Project Charters, Project Plans, and functional specifications based on identified business requirements
- Worked cross-functionally with process managers, service managers, project teams, and technical experts to develop solutions and address business challenges
- Oversaw project schedules, prioritized deliverables, and provided regular updates on progress, risks, and key milestones to ensure transparency and alignment with stakeholders.
- Conducted end-user training sessions and offered technical assistance during system rollouts and new feature implementations to ensure smooth adoption and usability.

January 2010–July 2015

Senior Business Analyst • Tata Consultancy Services • Texas

- Spearheaded business analysis for critical projects, including the User Group and End Customer Information. Conducted thorough stakeholder analysis and gathered comprehensive business requirements, translating complex needs into user stories and process flows, ensuring alignment with organizational goals.

SKILLS

Business Analysis, Project Management, Agile Methodologies, Scrum master Azure DevOps, ERP migration, SAP Business Process Modeling Notation (BPMN), MS-Visio

EXPERIENCE (CONT'D)

- Drove gap analysis to bridge the gap between current practices and new security policies. Redesigned core business processes to enhance operational efficiency, resulting in seamless compliance with updated security standards and policies.
- Collaborated with cross-functional teams in Texas, Germany, and the UK to deliver user-centric designs, wireframes, and mock-ups that elevated the user experience for the User Group and other projects.
- Orchestrated the creation of comprehensive business architecture, functional requirements, and technical documentation. Utilized tools such as JIRA and MS-Visio to ensure accurate documentation and full traceability from requirements through to implementation, achieving sign-off from key stakeholders.
- Led UAT for the User Group website, ensuring that all features met business needs. Managed bug fixes and quality checks, fostering a results-driven testing environment that consistently delivered high-quality outcomes for end users.
- Acted as Scrum Master, fostering collaboration among teams and ensuring smooth delivery cycles. Led sprint planning, backlog grooming, and demos, ensuring product features were delivered on time and to spec.
- Oversaw end-to-end project management, ensuring that all deliverables were completed on time and within scope. Developed deployment plans, tracked project risks, and facilitated weekly stakeholder meetings, ensuring alignment and effective communication across teams. Led a high-visibility Go-Live weekend event, presenting key stakeholders with the successful deployment of the ERP Migration.
