---

## SUMMARY

Experienced Java Backend Developer with around 5 years of experience specializing in developing, testing and deploying robust, scalable and efficient server side applications. Proficient in creating Restful APIs and micro services using Java, Spring Boot, and related technologies. Experienced in working with agile methodologies, collaborating with cross-functional teams, and utilizing tools like JIRA for project management.

---

## WORK EXPERIENCE

### Java Backend Developer, Technocentra

Aug 2023 - Present

- Developed and maintained Restful APIs using Spring Boot, enabling secure and efficient messaging functionality for the application.
- Designed and implemented authentication and authorization using Spring Security and JWT, securing user interactions and message exchanges.
- Developed Microservices that interact with each other using Rest APIs for synchronous communication and Apache Kafka for asynchronous communication.
- Implemented Hibernate ORM framework for efficient database interactions, reducing boilerplate code and improving data persistence performance.
- Utilized Spring Data JPA for seamless integration with MongoDB, managing efficient data storage and retrieval operations.
- Designed and implemented DTO (Data Transfer Object) and DAO (Data Access Object) patterns in Spring Boot Application to streamline database operations and improve data transfer efficiency.
- Used AWS S3 with a Spring Boot application to manage access, store, and retrieve files securely.
- Used LOG4J as logging framework.
- Developed unit tests using JUnit and Mockito to guarantee complete coverage and dependable code while efficiently resolving problems.
- Integrated CI/CD pipelines using Git for version control and Jenkins for automating build, test, and deployment processes, ensuring faster delivery cycles and enhanced code quality.
- Developed and maintained comprehensive API documentation with Swagger for clear communication for specification.

### Software Engineer, Infosys

Mar 2020 - Apr 2023

- Developed Controller and Service classes using Spring and configured them in spring configuration file.
- Designed and implemented high-performance Restful APIs for managing orders, helping improve the speed and efficiency of the e-commerce platform by handling a lot of orders quickly.
- Designed and implemented scalable micro services and APIs for downstream operations, ensuring seamless integration with existing system.

- Used Hibernate and Spring Data JPA to handle database operations, ensuring the data was stored correctly and efficiently, and optimizing the system to work well with MongoDB.
  - Utilized Spring Batch for handling large-scale data processing jobs.
  - Developed interactive and user-friendly web interfaces using HTML and CSS, focusing on responsive design principles to deliver seamless user experiences across multiple devices.
  - Managed code using Git and GitHub, making sure the whole team could collaborate, keep track of changes, and manage different versions of the project.
  - Worked on DevOps pipelines for continuous integration and deployment using Jenkins and GitLab CI/CD.
  - Monitored system performance and optimized APIs to reduce latency and enhance scalability.
  - Provided technical support for production issues, debugging code, analyzing logs, and working closely with QA teams to ensure high-quality software delivery.
  - Participated in Agile/Scrum ceremonies including sprint planning, daily stand-ups, and retrospectives.
- 

## EDUCATION

**Master of Science in Cyber Security and Information Assurance**

**2024**

University of Central Missouri, USA

**Bachelor of Science in Computer Science and Engineering**

**2021**

Rajeev Gandhi Memorial College of Engineering and Technology, India

---

## TECHNICAL SKILLS

- Languages: Java, C, Python, JavaScript
- Frameworks and Libraries: Spring, Spring MVC, Spring Boot, Hibernate, Spring Data JPA, Spring REST, Spring Security
- Web Services: RESTful APIs
- Miscellaneous: Micro services
- Web Technology: HTML, CSS, JavaScript
- Java Technologies: JDBC, Servlets
- Database: SQL, MySQL, MongoDB
- Version Control & Build Tools: Git, GitHub, Bit bucket, Maven
- Tools: Eclipse, IntelliJ, STS, JIRA, JUnit, Mockito, Postman, Swagger
- Methodology: Agile, SCRUM
- Cloud Technologies & DevOps: AWS(S3, EC2, Elastic Beanstalk, Dynamo DB, Lambda, RDS ), OCI, Jenkins, CI/CD
- Containerization: Docker, Kubernetes
- Messaging Tools: Apache Kafka
