Summary

I am a highly motivated, highly organized data analyst with a diverse skill set, including: data manipulation, data analysis, data visualization, public speaking, training, project management, customer service, and more. I am comfortable working with an array of powerful software tools, such as Excel, Python, SQL, Power BI, PowerPoint, and others.

One of my greatest strengths is my ability to think analytically and critically. I have a demonstrated knack for identifying better ways to accomplish tasks, and building the necessary tools to automate workflows. I am a capable and confident public speaker, and I have a natural affinity for teaching and communicating information. I also have a strong eagerness to learn and grow in each role I take on.

I am interested in roles that require data retrieval, data manipulation, analysis, and visualization. While the largest chunk of my career has been focused around pharmaceuticals, I find all businesses interesting in their own ways, and I would be happy working in virtually any industry.

Experience

Trialbee / Patient Recruitment Data Specialist

November 2024 - February 2025, Remote

Trialbee is a company that transforms patient recruitment with their Honey Platform, which centralizes recruitment activities and provides real-time tracking, high-quality referrals, and robust ROI reporting, supported by data-driven Precision Recruitment experts.

- Supported the Sales Strategy team with business intelligence by creating funnel projections for clinical research recruiting, utilizing internal and external data resources (TrialHub, Globaldata, and other internet resources) to provide benchmarks for comparison
- Created automated reports in Excel to efficiently transform data

Thermo Fisher Scientific / Database Marketing Specialist

January 2022 - July 2024, Remote

Thermo Fisher Scientific is the world leader in serving science. They support customers across various domains, including life sciences research, diagnostics, and pharmaceutical development, through innovative technologies and industry-leading brands such as Thermo Scientific, Applied Biosystems, and PPD.

- Supported marketing team by extracting data from Oracle database for patient recruitment efforts (according to data requirements), utilizing SQL and Python programming languages to retrieve lists of demographic information in the form of Excel and CSV files
- Improved process efficiencies by automating with Python including, but not limited to: retrieving data from various sources (e.g., Oracle database, spreadsheets, text files, etc.), creating various types of files (e.g., text, Excel, CSV, SQL, Python, etc.), updating Oracle database, data cleaning and transformation, etc. (reducing process time by over 50%)
- Created automated Excel reports utilizing various functions, and maintained data through SQL and Python
- Conducted ad hoc analysis and reporting, utilizing Excel and SQL
- Created Python and Excel tools to assist colleagues in day to day activities (e.g., time tracking, data cleaning, data collecting, etc.)

ChoiceOne Pregnancy & Sexual Health Resource Centers Inc /

"Let's Talk" Presenter/Coordinator

May 2017 - June 2021, Levittown, PA

ChoiceOne is an organization that provides free reproductive health support and education to its surrounding communities.

- Led "Let's Talk" presentations for High School and Jr. High audiences (virtually and on-site), educating youth on healthy sexual choices
- Trained new presenters in public speaking and relevant information
- Developed and updated PowerPoint presentations to convey data and communicate a relevant narrative

Digital Sign ID (DSID) / Business Manager (Photo Booth)

November 2015 - March 2017, Richboro, PA

DSID is a complete digital signage solution with a focus on healthcare specialties, designed for waiting rooms, treatment areas, and window displays.

- Created automated spreadsheets, utilizing various functions in Google Sheets, to track customer hardware (reducing retrieval time by over 90%)
- Conducted training sessions for clients, detailing photo booth hardware and software usage
- Provided customer support and troubleshooting services to clients, daily
- Managed multiple tasks simultaneously through Trello project management software and personally developed spreadsheet tools

Source One Management Services / Sourcing Analyst

April 2015 - October 2015, Willow Grove, PA

Source One has been rebranded to Corcentric. They are the leading Procurement, Supply Chain, and Spend Management consultants who help customers to spend smarter, save more, and generate maximum value across sourcing and purchasing activities.

- Retrieved files, compiled data, and utilized Excel to analyze purchasing from clients and their incumbent suppliers in a collaborative team environment
- Interviewed client stakeholders to glean information regarding current purchasing operations, business requirements, best practices, ways to improve procurement, etc.

UniTek Global Services / Operations Analyst - Industrial Engineering

February 2014 - April 2015, Blue Bell, PA

UniTek Global Services is a company that focuses on providing comprehensive broadband infrastructure services in the telecommunications industry. Their offerings include planning, design, permitting, and project management for broadband infrastructure.

- Extracted company performance metrics from Oracle-based websites and other similar client sites for processing, analysis, and reporting in a fast-paced, data driven environment
- Provided data insights by updating daily, weekly, and monthly Excel summary reports to meet required deadlines, utilizing various Excel functions and pivot tables
- Aided daily planning efforts by delivering quantitative data analysis to senior management and distributing throughout the organization

Health Strategies Group / Project Integrity Coordinator

May 2011 - December 2013, Lambertville, NJ

Health Strategies Group has transformed into EVERSANA, an integrated commercialization platform that combines global life science services. EVERSANA's services, spanning patient experience, pricing, market access, marketing, and more, create value for patients, prescribers, and payers throughout the product lifecycle.

- Reviewed surveys in detail, including testing programming logic, checking for general errors, and making recommendations for improvements
- Assisted analysts by using statistical data analysis tools such as SPSS and Excel to analyze qualitative and quantitative data, maximizing data quality while meeting deadlines
- Reviewed final client deliverables and presentations in PowerPoint to confirm that data presented corresponded with data in analysis
