[linkedin.com/in/benjamin-liu-37371853](https://www.linkedin.com/in/benjamin-liu-37371853)

With over 12 years of experience in IT and software development, I specialize in the **.NET framework**, delivering scalable and high-performance solutions for enterprise applications. My expertise spans system analysis, technical leadership, and project management, with a strong focus on architecting complex applications across industries such as ERP, healthcare, finance, HR, banking, e-commerce, inventory, and accounting. Skilled in data migration, technical documentation, UML design, and application architecture, I adhere to Agile methodologies, test-driven development, and software engineering best practices.

SKILLS

C# / Node.js, .NET Framework 6/4.5/4.0, ASP.NET MVC 5, ASP.NET Core/MVC, ADO.NET, Entity Framework, React (16, 18) / TypeScript, Angular (8, 12, 14), Vue.js / React Native, MongoDB / Couchbase / Cosmos DB, SQL Server / PostgreSQL / MySQL / Oracle / DynamoDB, Azure (App Service, Functions, Logic Apps, Virtual Machines, Blob Storage, SQL Database, Virtual Network, DevOps), AWS (S3, EC2, Lambda, RDS, EKS), GCP (GCE, GKE, GCS, BigQuery), Docker / Kubernetes, RabbitMQ / Apache Kafka, Redis / Jenkins / GitLab, Selenium / JUnit / Mockito, Swift / Vapor, ASP / Blazor / BizTalk, Visual Basic / VBScript, HTML5 / CSS / JavaScript / Less, Agile Product Management / Scrum / Sprint, REST APIs / Web API.

PROFESSIONAL EXPERIENCE

SmartiStack

.NET Full Stack Engineer and Senior Software Engineer

Aug 2019 - Jan 2025

Los Angeles, CA, USA

Project 1: HIBOOKS

<https://hibooks.com/>

- HIBOOKS is an intuitive platform designed to help small businesses manage their bookkeeping, financial transactions, and reports seamlessly.
- Developed the core backend system using **ASP.NET** and **Entity Framework**, ensuring high performance, scalability, and secure handling of financial data.
- Utilized **SQL Server** to manage data, leveraging **Stored Procedures**, **Triggers**, and **Views** for efficient data processing and complex querying. Deployed the application on **Microsoft Azure**, utilizing cloud services such as **Azure App Services** and **Azure SQL Database** to ensure high availability and performance.
- Tech Stack: **ReactJS, HTML5, CSS3, JavaScript, TypeScript, SignalR, ASP.NET, C#, Entity Framework, ASP.NET Web API, OAuth Authentication, SQL Server, Azure SQL Database, Stored Procedures, Triggers, Microsoft Azure, Azure App Services, Azure Monitor, Azure Load Balancer, SSL/TLS, OAuth, ASP.NET Identity, Power BI, Azure Application Insights, Jenkins, Git, GitHub, Stripe, PayPal, Sentry**

Project 2: UIHNA

<https://www.uihna.com/>

- UIHNA is a healthcare and insurance management platform that provides policy administration, claims processing, and member services for individuals and businesses.
- Built the platform using **ASP.NET Core** and **C#**, ensuring high-performance, secure, and scalable backend architecture for handling insurance policies and claims.
- Deployed the application on **Windows Server** with **IIS (Internet Information Services)**, optimizing configurations for speed and security.

- Utilized **SQL Server** for structured data storage, implementing **Stored Procedures, Indexing, and Entity Framework Core** to enhance data retrieval efficiency.
- Designed and developed **RESTful APIs** using **ASP.NET Web API**, enabling seamless integration with third-party healthcare providers, payment gateways, and partner systems.
- Tech Stack: **ASP.NET Core, C#, ASP.NET Web API, Entity Framework Core, IIS, Windows Server, SQL Server, Stored Procedures, Indexing, AWS (EC2, S3, Lambda, ALB, Auto Scaling), OAuth 2.0, JWT, SSL/TLS, HIPAA Compliance, AWS CodePipeline, Jenkins, GitHub Actions, AWS CloudWatch, Application Insights, Power BI, ELK Stack, Amazon ALB, AWS Auto Scaling, Twilio API, Amazon SES, Stripe, PayPal**

EffectiveSoft

Senior Backend Developer

May 2016 - Aug 2019

San Diego, CA, USA

Project 1: LOCALDISCOUNTS

<https://www.localdiscounts.com>

- LOCALDISCOUNTS is a digital marketplace connecting businesses with local customers by offering location-based deals, discounts, and promotions.
- Built using **ASP.NET Core** and **C#**, ensuring a high-performance backend that efficiently manages business listings, user accounts, and promotional offers.
- Implemented **SQL Server** for structured data storage, optimizing queries and indexing for fast retrieval of deals and user preferences.
- Tech Stack: **ASP.NET Core, C#, SQL Server, Bootstrap, HTML5, CSS3, IIS, Windows Server, Google Analytics, SSL/TLS, RBAC, Authentication Mechanisms, SEO, Caching, Performance Enhancements**

Project 2: LOCALDISCOUNTS

<https://iconfigurators.app>

- ICONFIGURATORS is a dynamic product visualization and configuration tool that enables users to customize and preview products in real time before making a purchase.
- Developed a **scalable** and **high-performance backend** using **ASP.NET Core**, ensuring robust data processing and real-time configuration updates.
- Implemented **WebSockets** for real-time product configuration updates, allowing users to see instant changes based on their selections.
- Tech Stack: **ASP.NET Core, SQL Server, PostgreSQL, Bootstrap, HTML5, CSS3, WebSockets, AWS, Amazon ALB, Windows Server, IIS, OAuth 2.0, JWT, RBAC, Redis, CDN, Caching Mechanisms, AWS CloudWatch, Log4Net, ELK Stack, Selenium, JUnit, Jenkins, AWS CodePipeline, WebGL, Three.js**

Monster

C#(.NET) Developer

May 2013 - May 2016

Weston, MA, USA

- **Adopted** the Scrum methodology with one-week sprints, accelerating development by 20% and shortening project delivery timelines by 15%.
- **Refactored** the data access layer, reducing its footprint by 50%, which improved data retrieval speed by 13% and decreased database load times by 18%.
- **Unified** multiple Business Logic (BL) class libraries into a single, reusable component, cutting maintenance overhead by 28% and boosting code reusability by 22%.
- **Integrated** automated end-to-end (E2E) testing, increasing test coverage by 32%, lowering defect rates by 18%, and enhancing overall software stability.

EDUCATION

University of California, Davis

Bachelor of Science - Computer Science Engineering

2009-2013 | Davis, California 95616, USA
