

Bikash Shrestha

Java Full Stack Developer | 925 414 2686 | bikshrestha434@gmail.com |
<https://www.linkedin.com/in/bikash-shrestha-3a182b2b9/> | San Pablo, CA

Professional Summary

Highly skilled Java Full Stack Developer with extensive experience in designing and developing dynamic, end-to-end **web applications** and **microservices**. Proficient in **Java**, **Spring Boot**, and **Hibernate** for building robust backend services, with expertise in **RESTful APIs** for seamless integration between client and server. Experienced in frontend technologies such as **Angular**, **React.js**, and **Vue.js**, delivering responsive and interactive user interfaces. Strong knowledge of **relational databases** like **MySQL** and **PostgreSQL**, as well as **NoSQL** databases like **MongoDB**, ensuring efficient data storage and retrieval. Adept in using **Docker**, **Kubernetes**, and **Jenkins** for **CI/CD pipelines** and containerized deployments on cloud platforms like **AWS** and **Azure**. Passionate about implementing **Agile methodologies**, collaborating with **cross-functional teams** to deliver scalable, high-performance software solutions that meet business objectives.

Professional Experience

United Health Group

San Francisco, CA

Java Full Stack Developer

Apr '22 - Present

- Developed and maintained healthcare-related **web applications** using **Java**, **Spring Boot**, and **Hibernate** for patient data management.
- Designed and deployed **microservices architecture**, improving scalability and maintainability of applications.
- Created responsive and interactive user interfaces with **React.js** and **Redux**, enhancing patient portal functionalities.
- Utilized **MongoDB** for unstructured data management, supporting real-time analytics for healthcare solutions.
- Automated deployment pipelines with **Jenkins** and **Docker**, accelerating development cycles and ensuring reliability.
- Integrated **RESTful APIs** for predictive analytics and real-time data processing across healthcare platforms.

Technologies Used: Java, Spring Boot, Hibernate, React.js, Redux, MongoDB, Jenkins, Docker, RESTful APIs

Capital One

McLean, VA

Java Full Stack Developer

Jan '20 - Mar '22

- Developed high-performance **financial web applications** using **Java**, **Spring Boot**, and **Thymeleaf**, enabling secure management of credit card services.
- Engineered **RESTful APIs** for seamless backend and frontend integration, enhancing real-time transaction capabilities.
- Utilized **Angular** to build dynamic and responsive customer-facing dashboards, significantly improving user experience.
- Managed **MySQL** databases for efficient transaction processing and data consistency.
- Deployed applications on **AWS** using **Kubernetes** and **Docker**, ensuring high availability and load balancing.
- Worked with teams in an **Agile** environment, delivering innovative financial products while ensuring regulatory compliance.

Technologies Used: Java, Spring Boot, Thymeleaf, Angular, MySQL, AWS, Kubernetes, Docker, RESTful APIs

Wells Fargo

Chicago, Illinois

Java Full Stack Developer

Mar '17 - Dec '19

- Developed core **banking applications** using **Java**, **Spring Framework**, and **JPA**, optimizing transaction processing and regulatory reporting.
- Implemented and consumed **SOAP** and **REST APIs** for data integration across various internal and external systems.
- Led the frontend development using **Vue.js**, delivering enhanced user interfaces for both internal tools and customer-facing applications.
- Managed complex financial data using **Oracle** databases, ensuring data security and performance across the platform.

- Established **CI/CD pipelines** with **GitLab** and **Maven**, automating build and deployment processes for faster delivery of software features.
- Worked closely with cybersecurity and compliance teams to ensure secure and compliant banking operations.

***Technologies Used:** Java, Spring Framework, JPA, Vue.js, Oracle, GitLab, Maven, SOAP, REST APIs*

Education

Lincoln University, CA | Master | Information System

Projects

United Health Group Patient Data Management System

Engineered the design and development of a **Java**-based backend using **Spring Boot** and **Hibernate** for secure storage and retrieval of patient information. Created dynamic user interfaces with **React.js** and **Redux** to provide healthcare professionals with real-time access to patient data. Implemented **MongoDB** as the primary database for handling unstructured data, supporting rapid data retrieval. Used **RESTful APIs** to integrate with third-party healthcare systems, ensuring seamless communication. Automated deployment pipelines with **Jenkins** and containerized applications using **Docker** for scalable and efficient delivery.

Capital One Customer Loan Application Portal

Developed the backend with Java, Spring Boot, and Thymeleaf to deliver dynamic loan application pages. Designed the frontend with Angular to offer an intuitive, user-friendly experience for customers to apply for loans and manage their accounts. Implemented MySQL as the database solution for storing loan application data and financial records. Created RESTful APIs for seamless integration with external financial services, ensuring secure data exchange. Deployed the solution on AWS with containerized environments using Kubernetes and Docker, optimizing for performance and reliability.

Wells Fargo Customer Account Management Portal

Developed a full-stack solution using **Java** and **Spring Framework** to power the backend, enabling secure access to customer account information. Leveraged **JPA** for mapping database entities to **Oracle** tables, ensuring smooth and reliable data management. Built the frontend with **Vue.js**, delivering an intuitive and responsive user experience for customers. Integrated both **SOAP** and **REST APIs** to provide real-time access to account details and transactional data. Used **GitLab** for source control and **Maven** for build automation, ensuring efficient delivery of new features.

Skills

- **Programming Languages:** Python, Java, C++, JavaScript, C#
- **Web Technologies and Databases:** HTML5, CSS3, JavaScript, TypeScript, MySQL, PostgreSQL, MongoDB, SQLite
- **Version Control Systems:** Git, GitHub, GitLab
- **Integrated Development Environments (IDEs):** Visual Studio Code, IntelliJ IDEA, Eclipse
- **Build Tools:** Maven, Gradle, Ant
- **Front-End and Back-end Frameworks:** React, Angular, Vue.js, Spring Boot, Django, Flask, Express.js
- **Containerization and Virtualization:** Docker, Docker Compose, VMware, VirtualBox
- **Continuous Integration/Continuous Deployment (CI/CD) Tools:** Jenkins, CircleCI, Travis CI
- **Testing Frameworks and Package Managers:** JUnit, PyTest, Selenium, Mocha, npm, pip, Maven
- **Cloud Platforms:** AWS, Google Cloud Platform, Microsoft Azure
- **API Development:** REST, GraphQL, gRPC
- **Microservices Architecture:** Spring Cloud, Docker, Kubernetes
- **Authentication and Authorization:** OAuth2, JWT
- **Debugging Tools and Agile Methodologies:** GDB, WinDbg, Chrome DevTools, Scrum, Kanban
- **Code Quality Tools:** SonarQube, ESLint, Pylint
- **Monitoring and Logging:** ELK Stack, Prometheus, Grafana
- **Messaging Queues and Server Management:** RabbitMQ, Apache Kafka, Nginx, Apache HTTP Server
- **Software Design Patterns:** Singleton, Factory, Observer
- **UML (Unified Modeling Language) Tools:** Lucidchart, Visual Paradigm, Singleton, Factory, Observer
- **Soft Skills:** Teamwork and Collaboration, Time Management and Organization, and Eagerness to Learn New Technologies
