

BRANDON MOORE

Senior Software Engineer | Python, TypeScript, C#

brandoamoore@gmail.com | (323) 275-1783 | Orlando, FL 32819

SUMMARY

Results-driven Senior Software Engineer with 10+ years of experience designing and developing scalable web applications, APIs, and cloud-based solutions using Python and modern frameworks. Passionate about clean, maintainable code and optimizing system performance. Adept at collaborating with cross-functional teams to deliver high-quality software solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C#, Node.js

Frameworks & Libraries: Django, Flask, FastAPI, Celery

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS (Lambda, S3, EC2, RDS), Docker, Kubernetes, Terraform, CI/CD (Jenkins, GitHub Actions)

Tools & Other: Git, Open API, RESTful APIs, GraphQL, RabbitMQ, Microservices Architecture

EXPERIENCE

DoorDash

Senior Software Engineer | Remote

Mar 2022 – Present

Tech Stack: Python, FastAPI, Django, Redis, Celery, AWS Lambda, Docker, Kubernetes, PostgreSQL, Elasticsearch, GitHub Actions

- Architected and maintained a high-performance API gateway using FastAPI and AWS Lambda, optimizing request routing and reducing latency by 35%.
- Assisted in the refactoring of a monolithic Django system into a microservices-based architecture, enabling independent service scaling and increasing system reliability.
- Designed an advanced caching layer with Redis and Celery, significantly reducing database loads and improving response times by 40%.
- Implemented CI/CD automation with GitHub Actions and Docker, reducing manual deployment efforts and accelerating release cycles by 50%.
- Integrated Elasticsearch for real-time search capabilities, enhancing product discovery and reducing query times by 60%.
- Developed and optimized asynchronous task processing pipelines, increasing efficiency in large-scale order processing.
- Partnered with UX and product teams to develop intuitive frontend experiences using React.js, improving user engagement.
- Conducted peer code reviews and system architecture discussions, ensuring adherence to best practices in software development.
- Designed a comprehensive monitoring and alerting system with Prometheus and Grafana, ensuring proactive issue resolution.

Zendesk

Senior Software Engineer | Remote

May 2018 – Feb 2022

Tech Stack: Python, Flask, Django, PostgreSQL, React.js, Kafka, RabbitMQ, AWS ECS, Lambda, RDS, OAuth2, JWT, GitHub Actions, PyTest

- Designed and maintained customer support automation systems, optimizing chatbot responses and ticket routing using Python, Flask, and Django.
- Developed real-time messaging APIs that powered Zendesk's live chat feature, improving response times and user experience.
- Implemented event-driven architectures using Kafka and RabbitMQ, ensuring reliable asynchronous processing of customer support events.
- Built a custom analytics dashboard using React.js and PostgreSQL, providing customer service teams with actionable insights into ticket trends and response efficiency.
- Enhanced API security and authentication by implementing OAuth2 and JWT-based access control, ensuring compliance with industry standards.

- Led the migration of on-premise services to AWS, leveraging ECS, Lambda, and RDS for better scalability and cost efficiency.
- Optimized database queries and indexing strategies, improving API response times by 40% and reducing system load.
- Developed automated testing pipelines with GitHub Actions and PyTest, increasing code reliability and test coverage from 60% to 90%.
- Collaborated with cross-functional teams to enhance Zendesk's integrations with third-party CRMs, increasing product adoption among enterprise clients.

BlueWave Software

Software Engineer | Florida

Jan 2014 – Apr 2018

Tech Stack: Python, Django, Flask, FastAPI, PostgreSQL, AWS, React.js, TypeScript, REST APIs, Agile Development

- Developed custom web applications for clients in healthcare, finance, and e-commerce, using Django and Flask to build scalable, secure solutions.
- Built and maintained backend APIs using Python and FastAPI, improving data exchange efficiency and response times.
- Designed and optimized PostgreSQL database schemas, improving query performance and application responsiveness.
- Developed automated data processing scripts to streamline data migration, validation, and transformation across multiple sources.
- Assisted in modernizing legacy web applications by implementing responsive UI components with React.js and TypeScript.
- Deployed and maintained AWS-based infrastructure, ensuring high availability and security compliance.
- Participated in Agile development cycles, working closely with stakeholders to define requirements and deliver incremental software improvements.
- Conducted code reviews and implemented best practices, ensuring maintainability and adherence to software engineering standards.
- Created detailed technical documentation and system design blueprints, supporting knowledge transfer and onboarding of new team members.

EDUCATION

University of North Florida (Jacksonville, FL)

BA in Computer Science | Nov 2009 – Dec 2013
