(623) 565-9402 | brian@basmith.net | linkedin.com | basmith.net

A results-driven Senior Solutions Architect with 8 years of experience driving customer-oriented product innovation and technical implementation in fast-paced B2B2C SaaS environments. Proficient at translating user needs into profitable solutions across B2B and B2C-like environments, with a passion for leveraging AI, automation, and UX to create delightful customer experiences. Proven track record leading the full product lifecycle from customer discovery and requirements gathering to roadmap planning, feature delivery, and go to market optimizations.

EXPERIENCE

Pallet, San Francisco, CA – *Senior Solutions Architect*

Sep 2024 - March 2025 · 7 mos

Pallet is a modern SaaS, AI-powered logistics platform for transportation and warehouse management.

- Served as a technical expert, providing both pre-sales and post-sales consultation for Pallet's logistics TMS software solutions.
- Completed in depth audits and product discovery with clients to uncover product gaps and opportunities.
- Prepared detailed Statements of Work (SOWs) that outlined project scope, deliverables, timelines, and budgets, ensuring clear expectations and alignment with client objectives.
- Created and tracked product requirements and user stories for new modules, ensuring alignment with customer needs and business goals.
- Collaborated with Product and Engineering teams to identify, prioritize, and deliver key features across Pallet's multiple logistics products for both local and cross-country transportation and warehouse management.
- Partnered with clients and internal stakeholders to optimize onboarding experience, reducing onboarding time by 2 months and increasing customer satisfaction and retention.
- Drove revenue growth by providing critical sales support for a diverse portfolio of clients, ranging in annual recurring revenue (ARR) from \$10K to \$200K.
- Partnered with C-suite executives at major enterprise companies to understand priorities and align product strategy with key business objectives.

SmartRent, Scottsdale, AZ – *Senior Solutions Architect*

Oct 2021 - Sep 2024 · 3 yrs

SmartRent is an enterprise SaaS smart home automation and IoT platform for the multifamily industry.

- Orchestrated cross-functional alignment between \$10M+ ARR clients and product/engineering to deliver platform enhancements that increased product adoption and expanded wallet share.
- Strategically leveraged customer insights and usage data to drive product improvements, achieving a hardware uptime of approximately 95% and decreasing the volume of escalated hardware support inquiries by ~50%.
- Facilitated third-party API integrations by acting as the central point of contact, managing communication between partners and engineering, maintaining API documentation, and contributing to API product development.
- Drove feature development and rollout of new smart home IoT capabilities across 100K+ units, impacting both end-user satisfaction and system performance.
- Spearheaded implementation of customer feedback loop using Jira Service Desk, improving product iteration cycles and aligning roadmaps with real-world needs.

OptimumHQ, Mesa, AZ – *Solutions Architect*

Apr 2018 - Oct 2021 · 3 yrs

OptimumHQ provides a no-code custom ERP platform for SMBs

- Served as a technical expert, providing both pre-sales and post-sales consultation for OptimumHQ's platform.
- Owned the complete project lifecycle from discovery, design, requirements, architecture, to turning user stories into functional systems.
- Designed and implemented custom front-end and back-end business workflows for multiple clients using the OptimumHQ low code platform.

SmartPractice, Phoenix, AZ – *Data Analyst*

Dec 2010 - Apr 2018 · 7 yrs

SmartPractice provides patient communications, marketing, and services to dental & dermatology practices.

- Designed and developed standard and custom reports/dashboards using Cognos, Excel, Access, and Sybase SQL, providing actionable insights to marketing, data, sales, and product teams.
- Increased data accuracy by implementing data validation and quality control processes.

SELECT PRODUCT ACHIEVEMENTS

- Oversaw the development of a System Health Dashboard for enterprise clients, acting as Product Manager from concept through launch. The feature provided real-time hardware status insights, increased hardware uptime to ~95%, reduced escalated hardware support calls by 50%, and significantly improved customer satisfaction and trust.
- Supported multiple new hardware and software products through development, testing, go to market, and rollout, increasing total unit count by 100K+, and increasing annual recurring revenue (ARR) by \$400K+.
- Led the team that created the entire custom ERP for a veterinary lab's testing and treatment products, including customer portal, order entry, integration with specialized lab testing equipment, manufacturing treatment products, warehouse fulfillment, shipping, billing, and accounting integration.

CERTIFICATIONS

Certified Scrum Product Owner (CSPO), Scrum Alliance

Certified ScrumMaster (CSM), Scrum Alliance

- Experienced with a variety of project management methodologies, including Agile (Scrum, Kanban), Waterfall, and Lean, and how to foster improved teamwork and alignment throughout the project lifecycle.
