EDUCATION

Bachelors of Science in *Computer Science*

May 2022

University of Missouri - Kansas City

SKILLS

Languages	C#, SQL, Java, Python, JavaScript, TypeScript, HTML, CSS
Frontend	React, Angular
Backend	.NET Core, .NET, .NET MVC
Infrastructure	AWS, Kubernetes, Docker, Github Actions
Testing	NUnit, Selenium
Technologies	Git, REST, JSON

EMPLOYMENT

SS&C Technologies	September 2022 - September 2024	Software Engineer
· Collaborated with a team in an Agile environment, leveraging Jira to coordinate tasks, and participated in code review and planning. · Developed scalable microservice API endpoints for pharmacy claim processing features using .NET Core and C#, ensuring robustness and functionality. · Designed adaptive and responsive UIs using React, ensuring seamless user experiences across various screen sizes. · Followed 'test-driven development', expanding unit test coverage by 40% by adding 20 new test cases. · Engineered an CI/CD pipeline with Github Actions to automate running unit tests and deployment to AWS, reducing bugs by 15% and promoting code quality. · Created database tables and stored procedures for claim processing features using SQL, and refactored existing tables to remove 50+ duplicated columns. · Automated routine database tasks deploying changes to multiple Linux servers with shell scripts, improving reliability by preventing human error and reducing several minutes of work to under 30 seconds.		

Metropolitan Community College	January 2019 - May 2020	Software Engineering Tutor
· Provided personalized assistance to college students to assist them with programming coursework and provided constructive feedback on students' code, and help them better understand object oriented programming.		

PROJECTS

Capstone Project 	Spring 2022
· Engineered a web application for managing transactions, using .NET MVC, C#, and SQL Server. · Hosted on a Azure cloud instance, with a CI/CD pipeline using Github Actions to automatically deploy changes.	
Playlist App 	Spring 2022
· Designed a web app that searches a Spotify playlist, making a new playlist with songs matching a genre. · A REST API using NodeJs accesses Spotify, sending playlist details to the Angular front-end.
