Summary

I have over 30 years of experience in Information Technology. I started my career as a software developer and for the past 22 years, I have worked as a test engineer and business analyst. My passion is testing so I'd like to return to a purely testing position. During my career I gathered business requirements, developed software, created workflows, tested and implemented systems. I have been working in an agile environment for 13 years.

Professional Experience

Yesdi Inc, Westminster, MD

July, 2018 – present

Business Analyst and Test Engineer

Gathered requirements and tested web-based systems for a client in the aerospace industry. Wrote requirements, requirements traceability matrix and test cases and executed them. Worked closely with developers to resolve issues and tracked defects in Jira. Led daily scrum meetings.

Wrote IT systems and services proposals for government contracts. Renewed small business certifications for US Small Business Association 8(a) and HUBZone and Maryland Department of Transportation MBE/DBE/SBE programs.

Four Square Solutions LLC, Hampstead, MD

April 2011 - August, 2017

Partner

Tested a web application, vehicle diagnostic hardware and mobile devices for a GIS system. Developed user stories, test plans and test cases on a scrum team. Tracked defects in JIRA. Worked closely with developers to resolve defects.

Wrote detailed specifications for a medical instrument that runs diagnostic tests. Facilitated meetings with business users, user interface designer and software developers to gain consensus. Created project schedule and updated team with status. Wrote test plans and test cases. Executed tests and tracked defects in JIRA.

Wrote requirements, test plan, requirements traceability matrix, test cases and test summary for an infection prevention system. The system imports HL7 files from hospitals and health care clinics and exports XML files for upload to the Centers for Disease Control (CDC). Managed process to incorporate new requirements from the National Healthcare Safety Network (NHSN) for the clients. Performed system, regression, performance, and integration testing. Tracked defects in JIRA. Wrote instructions for the user guide.

AllSource PPS, Sparks, MD

June, 2008 - March, 2011

Quality Assurance Consultant

Developed a test plan and test cases for a roadside assistance application, the company's first mobile app. Executed tests using Blackberry, Windows Mobile, iPhone, and Android emulators. Conducted usability, system, and user acceptance testing.

Carol Reeves

Westminster, MD 21157 | 443-605-3285 | cjreeves607@gmail.com

Planned, wrote, and executed test cases for a Business Intelligence dashboard. Offered suggestions to business users to make it more effective by analyzing the data rather than just reporting it. Managed workload to meet the bi-monthly deadlines for the agile project. Designed error handling module for a web-based bulk data load system. Created test documentation and executed test scripts.

XLHealth, Baltimore, MD

October, 2006 - May, 2008

Software Application Tester

Tested a disease management system for chronically ill Medicare and Medicaid patients. Wrote test plans and test cases for the .Net, C++ application. Performed database testing using SQL. Deployed new software builds to test, business, and migration environments on web servers. Recorded and tracked issues in Test Track. Performed Test Track administration.

MD Dept. of Public Safety & Corrections, Baltimore, MD

June, 2005 - September, 2006

Quality Assurance Specialist

Served as test lead for an automated fingerprinting system. Participated in requirements analysis. Created test plan and test cases from system requirements. Executed test cases and facilitated daily meetings to resolve defects. Coordinated with vendors, developers, and project managers to deploy certified machines in State of Maryland law enforcement agencies. Wrote detailed test plan and test cases for a web-based Violation of Parole/Probation system for the State of Maryland.

Four Square Solutions LLC, Westminster, MD

August, 2002 - November, 2004

Partner

Designed, developed and implemented Livelink document management systems. Facilitated system design meetings with users. Developed custom modules using Livelink OScript, JavaScript and HTML. Created user training manuals and conducted training sessions.

Developed a tabbed user interface for a credit card approval system. Defined work processes and translated them into Livelink workflows. Created event scripts to update credit decision data during the workflow process.

Morningstar Systems Inc, Owings Mills, MD

September, 2000-August, 2002

Technical Consultant

Created a custom Livelink module for the American Psychiatric Association's manuscript review process. Developed a shopping-cart style user interface for editors to select qualified reviewers. Upgraded a custom product from Livelink 9.0 to 9.1 and moved content between versions.

Modified a C++ program and Livelink OSpace to move new objects to 9.1. Created xml files for import into a new version.
