Objective

Experienced Full-Stack Developer with 11 years of expertise in building scalable and efficient web applications. Looking to leverage my comprehensive knowledge of both front-end and back-end technologies in a senior role where I can contribute to innovative software development projects.

Professional Experience

Lead Full-Stack Developer

Netflix, Inc. – Los Gatos, CA

November 2021 – Present

- Spearheaded the development of Netflix's content management system, utilizing React.js for the front-end and Node.js for the back-end.
- Designed and implemented a microservices architecture that improved the system's scalability and reduced deployment time by 40%.
- Collaborated with the data engineering team to integrate real-time analytics into the platform, enhancing decision-making processes for content curation.
- Optimized video streaming performance, reducing buffering time by 25% through advanced caching and load balancing techniques.

Full-Stack Developer

LinkedIn Corporation – Sunnyvale, CA

June 2017 – October 2021

- Developed and maintained LinkedIn's internal tools for data management, using Angular.js for the front-end and Java/Spring Boot for the back-end.
- Played a key role in the migration of legacy systems to modern web technologies, significantly improving application performance and user experience.
- Implemented RESTful APIs and integrated third-party services, expanding the functionality and interoperability of the platform.
- Participated in the full software development lifecycle, from requirement gathering to deployment, ensuring timely and high-quality deliverables.

Junior Full-Stack Developer

Innovatech Solutions – Miami, FL

August 2013 – May 2017

- Contributed to the development of web applications for a range of clients, utilizing JavaScript, PHP, and MySQL.
 - Created responsive front-end interfaces, ensuring compatibility across different browsers and devices.
 - Assisted in the development of back-end services, focusing on database design and API development.
 - Worked closely with senior developers to refine and optimize code, leading to improved application performance and reduced development time.
-

Education

Bachelor of Science in Computer Science

Florida State University – Tallahassee, FL

Graduated: May 2013

Technical Skills

- **Languages:** JavaScript, Java, PHP, Python, SQL, TypeScript
 - **Frameworks/Libraries:** React.js, Angular.js, Node.js, Spring Boot, Express.js, Laravel
 - **Databases:** MySQL, PostgreSQL, MongoDB, Cassandra
 - **DevOps:** Docker, Jenkins, AWS, Kubernetes, CI/CD
 - **Tools:** Git, Webpack, Babel, NPM, Jira, Jenkins
-

Certifications

- **Certified Java Developer**
 - **AWS Certified Solutions Architect – Associate**
-

Projects

Content Management System for Streaming Media

Led the development of a comprehensive content management system for Netflix, integrating various microservices to manage and curate streaming content. Used React.js and Node.js to create a seamless user experience for content managers.

Internal Data Management Tools

Developed and optimized LinkedIn's internal tools for handling large datasets, focusing on both front-end usability and back-end efficiency. The tools significantly improved the speed and accuracy of data processing tasks.

Volunteer Experience

Tech Lead Volunteer

TechBridge Tampa – Tampa, FL

May 2015 – Present

- Provided technical leadership for community-driven software projects, focusing on developing solutions for local non-profits.
- Mentored junior developers in full-stack development, helping them build their skills and contribute effectively to projects.
