

CONNOR MCCARL

Senior Software Engineer

📞 (661) 237-8134 @ connormccarl513@gmail.com 🌐 www.linkedin.com/in/connormccarl 📍 Mission Viejo, CA

SUMMARY

Innovative and results-driven Senior Software Engineer with over 12 years of experience in designing, developing, and deploying high-performance applications using C# .NET and React.js.

I am also well-versed in Python and Go, with extensive experience in AI development. I have a proven track record of leading complex projects from inception to completion, mentoring development teams, and leveraging modern technologies to drive business success.

EDUCATION

Bachelor of Science - BS,
Computer Science & Business
Administration

Chapman University

📅 08/2012 - 05/2016

CERTIFICATION

SQL, SQL Server

TestDome(2023)

SKILLS

Programming Languages

C#	JavaScript	Python
Go	SQL	C/C++
PHP	HTML5	tailwind CSS

Backend

.NET Core	ASP.NET	MVC
JWT	ASP.NET Web API	
Entity Framework	LINQ	
OAuth2	Node.js	NestJS
Flask	Django	GIN

EXPERIENCE

Senior Software Engineer

Finaeon

📅 09/2024 - Present 📍 Irvine, CA

- Designed and implemented new processes to the existing system using ASP.NET and React.js while collaborating with the Sales team and other business stakeholders.
- Developed and configured OLTP and OLAP databases along with their respective data environments to reduce query response times.
- Analyzed and interpreted data from third-party sources to align with existing database structures.
- Built and maintained .NET web APIs to create endpoints and modify business logic.
- Executed a range of front-end coding tasks, including the creation of reusable components and the design and implementation of intuitive user interfaces (UIs) to enhance user experience and interface functionality.
- Addressed production issues and coordinated with the team to implement live fixes.
- Led Agile workflows and maintained technical documentation in Atlassian Jira while mentoring junior developers.

Senior Full Stack Engineer

CreativCodes

📅 02/2017 - 07/2024 📍 Orange, CA

CreativCodes is a software development firm helping clients all over the nation from Fortune 100 to startup.

- Lead the design, development, and deployment of scalable C# .NET Core and Angular applications with 3-20 person teams, ensuring high performance and robust architecture.
- Architected and implemented microservices using Go, improving application performance and reducing downtime by 25%.
- Implemented and maintained secure authentication and authorization mechanisms using JWT, OAuth, Federated SSO, and other security protocols.
- Created efficient RESTful APIs and gRPC services, integrating RabbitMQ and Kafka for real-time data processing to achieve superior scalability and performance.
- Identified and resolved data discrepancies in multiple Salesforce commission reports, significantly improving reporting accuracy.
- Developed high-performance frontend and mobile applications using React, Next.js, and Angular, employing the MVVM design pattern to optimize load times, improve SEO, and ensure a smooth, responsive user experience.
- Leveraged cloud services such as AWS (mostly) and Azure (some) for application hosting, storage, and scalability.
- Utilized modern DevOps practices to automate deployment processes, leveraging tools such as Docker, Kubernetes, and CI/CD pipelines.
- Collaborated with cross-functional teams to integrate AI solutions into existing products and workflows.
- Built and optimized a chatbot using Python, TensorFlow, and Large Language Models (LLMs), implementing Transformers to design and train custom models for context-aware, dynamic conversations, thereby enhancing user engagement through intelligent, real-time interactions.
- Implemented robust unit tests and integration tests with xUnit and Jest, ensuring software reliability and reducing bugs.
- Developed and standardized comprehensive Standard Operating Procedures (SOPs) for existing and new business processes.
- Collaborated with product managers and stakeholders to gather and refine requirements, translating them into technical specifications.
- Stayed updated with the latest industry trends and technologies, continuously enhancing technical expertise and applying new knowledge to projects.

SKILLS

Frontend

React.js	Next.js	Angular
Vue	MAUI	Blazor
Razor		

Database Management

MS SQL Server	PostgreSQL
MySQL	Oracle
MongoDB	
Redis	Neo4j
AWS DynamoDB	
Azure Cosmos DB	ORM

DevOps & Infrastructure

Azure	AWS	GCP
Jenkins	Docker	Kubernetes
GitHub Actions	Terraform	

API Integration & Data Analytics

RESTful APIs	GraphQL
gRPC	WebSockets
Power BI	Power Platform
Power Query	SQL
DAX	
SSRS	SSIS
SSAS	

Testing & Quality Assurance

Jest	Selenium	NUnit
MSTest	Cypress	Mocha
PyTest	Jasmine	

EXPERIENCE

Senior Software Developer

South Coast Computers

📅 08/2016 - 01/2017 📍 Anaheim, CA

South Coast Computers is 30-year-old full-service IT outsourcing company with major clientele in the apparel industry like Karen Kane and Celebrity Pink/Liverpool Jeans.

- Guided and mentored a team of 2 direct reports, driving successful project completion through mentorship and leadership.
- Managed and oversaw all development projects for the company including contracted software development help.
- Took charge of a stalled A2000 ERP migration and EDI implementation, orchestrating its successful conclusion within a demanding 5-month timeframe through focused oversight.
- Identified and corrected errors within complex ETL data pipelines and processes, leading to the resolution of a substantial \$1.2 million financial reporting discrepancy recognized by the client's CFO.
- Applied Scrum/Agile methodologies to resolve 72 VB6 and C# ASP.NET Windows Application software bugs, effectively unblocking billing processes amounting to \$300,000+ per month for 2-3 months.
- Developed, customized, and optimized 21 SSRS, Power BI, and Crystal reports to deliver comprehensive and insightful business intelligence.
- Engineered, fixed, and enhanced over 50 SSIS packages and PowerShell scripts, facilitating seamless data manipulation across seven (7) distinct MS SQLServer Instances and five (5) separate servers.
- Systematically addressed intricate bugs within complex SQL stored procedures and user-defined functions to ensure data accuracy and reliability.

Full Stack Developer

Chapman University

📅 09/2013 - 06/2016 📍 Orange, CA

Chapman University is a prominent private university in Southern California.

- Orchestrated seamless communication between tutoring project stakeholders, adeptly translating business requirements into technological solutions and ensured adherence to Agile methodologies throughout tutoring project lifespan.
- Spearheaded a comprehensive online tutoring project utilizing C# .NET MVC 5, overseeing the entire project lifecycle from initial conceptualization to successful deployment and post-launch training.
- Leveraged technologies such as Bootstrap 3 for responsive design, jQuery for enhanced interactivity, and Entity Framework for efficient data management.
- Strategically designed, normalized, and documented an advanced backend infrastructure with five database tables to enable intelligent mapping between tutors and tutees.

Software Developer Intern

Phoenix Afterglow

📅 05/2012 - 05/2013 📍 Irvine, CA - Hybrid

Phoenix Afterglow is a local software development house specializing in WordPress and PHP websites for clients.

- Developed and deployed 5 custom websites using WordPress and PHP, delivering tailored solutions that met diverse client needs and enhanced their online presence.
- Worked closely with designers to ensure a 95% consistency between design and development, translating UI/UX designs into fully functional websites using HTML, CSS, jQuery, and Bootstrap.
