WORK EXPERIENCE

Byte Solutions, INC – FL (Remote)

Practice Lead / Software Solution Architect | Jun 2023 – Present

- Engineered **5** cloud-native architectures using Django REST Framework, FastAPI, React, AWS, and Azure for enterprise applications across MERN and Python stacks, boosting overall system scalability by **40%** and cutting average response times by **25%**.
 - Modernized **3** legacy systems by migrating from Django Template Language to REST APIs integrated with React, reducing deployment times by **30%** and maintenance overhead by **20%**.
 - Led cross-functional teams to architect CI/CD pipelines using GitHub Actions, GitLab CI/CD, and AWS (via Terraform & CloudFormation), achieving **100%** automated deployments and a **35%** decrease in production release incidents.
 - Delivered immersive VR experiences by integrating WebXR and Three.js into Next.js apps, improving rendering performance by **50%** and cutting average database query latency by **15%** in MySQL.
 - Architected and maintained microservices with design patterns like SAGA for banking/loan systems and API Gateway for logistics, increasing transaction throughput by **60%** and reducing error rates by **20%**.
 - Integrated Large Language Models (LLMs) for real-time transcription of HLS content and YOLOv8-based object detection, broadening product capabilities and cutting manual data processing by **80%**.
 - Created a reusable React component library that accelerated new UI launches by **50%** and ensured consistent design language across **2+** projects.
-

Accelerance – Redwood City, CA (Remote)

Software Development Manager / Architect | Jan 2021 – 2023

- Supervised **20** developers across MEVN, MERN, LAMP, and mobile stacks, delivering **13+** enterprise-grade systems (telecom, emergency response, etc.), improving team productivity by **25%** and reducing average project delivery timelines by **20%**.
- Designed microservices with Node.js, FastAPI, and Kafka, improving real-time processing capabilities by **30%** and cutting system downtime by **25%**.
- Led the development of enterprise solutions (Campaign Management Tool, Flash Call verification, VoIP systems), reducing communication latency by **20%** and saving **15%** in operational costs.
- Collaborated with QA and DevOps on large-scale deployments and robust continuous delivery pipelines, reducing deployment errors by **35%** and boosting system reliability for **24/7** operations.
- Architected a Vue 3, Node.js, MySQL booking management system with CASL.js RBAC, improving role-based security checks by **40%** and speeding up user provisioning by **50%**.
- Scaled infrastructure with Node.js clusters on DigitalOcean with Nginx load balancing, cutting latency by **20%** and ensuring seamless real-time interactions for **5,000+** concurrent users.
- Refactored long-running tasks using Redis-backed Bull Queues in Node.js, cutting background task processing time by **50%** and improving overall app responsiveness by **30%** through WebSocket integrations.
- Optimized Kubernetes pods and SQL connection pooling to reduce infrastructure spend by **20%** and stabilize the application under **3x** peak traffic loads

Accelerance – Redwood City, CA (Remote)

Software Team Lead | Mar 2019 – Jan 2021

- Developed microservices using Node.js, FastAPI, and DRF; automated **10+** repetitive tasks (cron jobs/schedulers), reducing manual intervention by **40%** and operational costs by **15%**.

- Collaborated with software managers to uphold high code quality and scalability across **6** projects, shortening release cycles by **25%** and consistently meeting tight deadlines.

Principal Software Engineer | Apr 2017 – Apr 2019

- Directed the development of REST and SOAP APIs with Laravel, Node.js, and PHP Core, enabling the business to handle a **50%** increase in user traffic and lowering API response times by **35%**.
- Proactively optimized performance and uptime through continuous monitoring, reducing downtime by **30%** and raising user satisfaction scores by **20%**.

Software Engineer | Jan 2016 – Jan 2017

- Contributed to CodeIgniter/PHP-based system enhancements, reducing page load times by **15%** and addressing **80%** of legacy technical debt issues.

Jr Software Developer | Jan 2015 – Jan 2016

- Refactored outdated codebases for better maintainability and collaborated on **4** major feature releases, improving overall release quality by **25%**.

Software Intern – Splunk Jan 2014 – Jan 2015

- Built CRUD applications with ASP.NET and SQL Server, honing full life cycle development skills and reducing bug resolution time by **40%**.

EDUCATION

- **Bachelor of Science in Computer Science**, King's University College | 2013

SKILLS

- **Backend Development:** Python(FastAPI, Django/DRF), Node.js, NestJS, Express.js, GoLang, PHP (Laravel, CodeIgniter), RESTful/SOAP APIs, Microservices, Serverless, Event-Driven Architecture

- **Databases:** MongoDB, MySQL, SQL, Redis, Redis Streams, Pinecone, Chroma DB, DynamoDB
- **Frontend:** React.js, Next.js, Vue 3, Angular, Flutter, Android, Three.js (WebXR), Tailwind, etc. Tsup, Rollup
- **Cloud & Infrastructure:** AWS, Azure, Terraform, Pulumi, DigitalOcean, NGINX
- **DevOps & CI/CD:** Docker, Kubernetes, GitHub Actions, GitLab CI/CD, PM2, Prometheus
- **Tools & Platforms:** OpenAI, Hugging Face, Kaggle, GitHub, GitLab, JIRA, Confluence, Elastic Stack
- **Security & Authentication:** OAuth 2.0, SAML, OKTA, AWS Cognito, HTTPS
- **Testing:** Jest, Mocha, Supertest, Pytest, DjangoTest, Factory Boy
