EDUCATION

The University of Georgia

Aug 2020 - May 2024

Bachelor of Business Administration in Economics IB co-major

Athens, GA

- Relevant Coursework: Software Development, Systems Programming, Web Programming
- Overall GPA: 3.6

Skills

Programming & Data: Python, SQL, R, Tableau Java, Bootstrap, Javascript

Data Visualization: Tableau, Power BI, Excel, Seaborn, Looker

Data Processing & Analysis: ETL Pipelines, A/B Testing, Business Intelligence (BI), Regression Models

Cloud & Big Data: AWS (S3, Lambda, DynamoDB, Athena), MapReduce, Kubernetes, Terraform

Other: Git/GitHub, Agile/SCRUM, REST APIs

PROJECTS

Shopping App Database for Kohl's

Nov 2024 - Present

- Modeled a **relational database** schema for an e-commerce shopping app, ensuring referential integrity and reduced data redundancy by 50% through normalization techniques, improving database efficiency and scalability
- Constructed complex **SQL queries** to analyze customer purchasing behavior, sales trends, and product performance, leading to a 45% improvement in targeted marketing efforts
- Interpreted transaction records, identified high-value customers and top-selling products, leading to a 25% improvement in decision-making for promotions and inventory management

Serverless To-Do List Application

Aug 2024 - Nov 2024

- Engineered an automated data pipeline using **AWS Lambda, API Gateway, and DynamoDB**, improving scalability
- Automated deployment and monitoring using event-driven architecture and AWS CloudWatch, reducing deployment time by 40% and ensuring 99.9% uptime through alerting and scaling
- Applied AWS Well-Architected Framework principles, reduced API response times by 25% and preventing unauthorized access by enforcing least-privilege IAM policies

BedDot Vitals Monitoring System

Jan 2024 - May 2024

- Managed a cloud-ready vitals-monitoring system, integrated **real-time data** collection from patient sensors and designed a **structured database** to store, process, and analyze health metrics
- Conducted user testing and analyzed feedback data from medical staff, reducing navigation errors by 30% and increasing workflow efficiency through **data-driven** UX improvements
- Optimized project workflows by aligning team members' responsibilities, exceeding project goals by 40%

EXPERIENCE

KJ Sourcing (UGA Export GA)

Jul 2023 - May 2024

Project Manager

Athens, GA

- Utilized AWS S3 to host static assets as part of a website redesign, reducing load times by 40% and enhancing user experience
- Coordinated and managed 15+ daily tasks, including content updates, **database optimization**, and troubleshooting technical issues, ensuring timely project delivery
- Propelled product sales in foreign markets by 20% through **market analysis** and targeted recommendations, significantly expanding regional market share

Certificates

AWS Solutions Architect Associates

Issued: Nov 2024

- Demonstrated proficiency in designing and deploying scalable, cost-effective, and secure AWS solutions

New Media

Issued: May 2024

- Acquired hands-on experience in prototype development and user testing
