3. **Automation tools:** Playwright, Selenium, JMeter
4. **DB(Sql/NoSql):** Oracle, PostgreSQL, MongoDB
5. **Cloud & DevOps:** AWS, Kubernetes, Docker, Jenkins
6. **Other:** Postman, TestRails, Jira, Confluence, Git, GitHub, CI/CD, Agile/SCRUM,

Professional Experience:

Schaumburg Marketplace,Inc. USA, IL

Software Development Engineer in a Test

May 2022 - Present

- Integrated automated tests into CI/CD pipeline using Jenkins/GitHub Actions, enabling automatic test runs on every pull request.
- Increased test coverage from 25% to 45% during the first year, improving overall product stability.
- Created over 25 Confluence guide documents to help QA engineers and developers quickly and easily set up environments, understand new features, and work with key systems.
- Built a robust and scalable test automation framework using Python + Playwright, enhancing code reusability and maintainability.
- Reduced production bugs by 10% through implementation of smoke and sanity testing.
- Optimized regression testing pipeline, reducing execution time from 6 hours to 3 hours.
- Contributed to the creation and maintenance of test documentation, including Test Strategy, Test Plans, Test Cases, RTM, and bug reports using Jira/TestRail/Confluence

- Collaborated closely with developers and product managers to refine acceptance criteria, ensuring feature alignment with business needs.
- Actively participated in Agile/Scrum ceremonies, including grooming sessions, sprint planning, and daily stand-ups.

Incesive. Warsaw, Poland
QA Testing Specialist

November 2020 - March 2022

- Developed a system for creating test cases, which contributed to improving the quality and speeding up the regression testing process.
- Covered 50% of the development with test cases, improving test coverage and ensuring higher quality in the software.
- Participated in product design development to determine requirements for product usability
- Performed smoke, functional, non-functional, and UI testing to identify bugs and create detailed bug reports
- Performed API testing using Postman, Python

Rozetka, Kyiv, Ukraine
QA Engineer

August 2019 – September 2020

- Used SQL queries to validate data in over 10 databases, ensuring test data was accurate and reflected real business scenarios
- Created and executed manual test cases for web applications, covering key user flows and edge cases, which helped improve test coverage and reduce escaped bugs.
- Participated in daily stand-up meetings with developers to discuss open issues and test results, which led to a 15% drop in critical defects during user acceptance testing.
- Reported bugs and worked closely with the dev team to verify fixes, helping speed up the release cycle and improve software stability.

Education: BACHELOR'S Degree FINANCE, BANKING AND INSURANCE
