Summary

Senior Software Engineer with extensive experience in backend and data engineering, specializing in building scalable, high-performance applications. Passionate about leveraging modern technologies to develop robust and efficient solutions. I enjoy problem-solving, collaborating with talented teams, and continuously learning new technologies to enhance my skills.

Highlights

- 8+ years of experience in designing, developing, and optimizing backend systems and data-driven applications.
- Strong expertise in Elixir, Python, and React for full-stack development.
- Experience in designing and developing RESTful APIs and GraphQL services.
- Proficient in frontend development using React, TypeScript, and modern UI frameworks.
- Experience in distributed systems, microservices architecture, and event-driven design.
- Proficient in SQL and NoSQL databases, including PostgreSQL and DynamoDB.
- Hands-on experience with cloud platforms such as AWS and GCP.
- Extensive knowledge of CI/CD pipelines, Docker, Kubernetes, and Terraform for infrastructure automation.
- Strong background in payment processing systems, data engineering, and analytics.

Education

The University of Texas at Austin
Bachelor's Degree, Computer Science (2013 - 2016)

EXPERIENCE

Senior Software Engineer

[Discord](#)

 09/2021 – Present

 San Francisco, CA - Remote

Used Tech: Elixir, Python, PostgreSQL, Kafka, AWS, Kubernetes, React, TypeScript, GraphQL, FastAPI

- Developed and optimized data-driven products to enhance platform insights using Python and React.
- Designed and implemented scalable backend services using Elixir and Python.
- Built high-performance data pipelines and real-time analytics dashboards.
- Designed and developed RESTful APIs for data retrieval and user interactions.
- Developed frontend components using React and TypeScript to visualize analytics.
- Improved system reliability and observability using monitoring and alerting tools.

- Collaborated with cross-functional teams to enhance Discord's data ecosystem.

Senior Full Stack Engineer

[Expedia Group](#)

 03/2019 – 06/2021 (2 years 5 months)

 Austin, TX

Used Tech: Java, Spring Boot, PostgreSQL, DynamoDB, Kafka, AWS Lambda, Terraform, React.js, TypeScript, Python, Django

- Led the backend payments team at Expedia for Vrbo, ensuring high availability and security of payment transactions.
- Designed and developed RESTful microservices for secure payment processing.
- Integrated third-party payment providers and optimized transaction processing for better latency.
- Developed internal tools using React.js and TypeScript for transaction monitoring.
- Actively mentored junior engineers and participated in knowledge-sharing initiatives.

Software Engineer

[HomeAway](#)

 01/2017 – 03/2019 (2 years 4 months)

 Austin, TX

Used Tech: Python, Java, Spring Boot, AWS, MySQL, REST APIs, PostgreSQL, Kubernetes, Django Rest Framework

- Enhanced payment transaction workflows and implemented fraud detection mechanisms.
- Developed and maintained RESTful APIs for booking and payments services.
- Actively engaged in Agile processes and sprint planning.
- Built and maintained payment processing services, integrating with multiple gateways.
- Designed and implemented API-driven architecture for payments processing.
- Ensured PCI and HIPPA compliance and security best practices.
- Engaged with product managers to enhance payment features and user experience.

Internship

[SailPoint](#)

05/2016 – 08/2016 (4 months) | Austin, Texas

[Icon Information Consultants](#)

12/2015 – 01/2016 (2 months) | Houston, Texas

Languages & Frameworks:

- Backend: Elixir, Python (Django, FastAPI, Flask), Java, C#, Node.js
- Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Next.js, Tailwind CSS, Material UI, Vue.js, Redux, Redux Toolkit, React Query, React Hook
- Databases: PostgreSQL, DynamoDB, MySQL, Redis, SQL Alchemy,
- API Development: RESTful APIs, GraphQL, gRPC
- Messaging & Event Processing: Kafka, RabbitMQ, Microsoft Message Queueing (MSMQ)
- Cloud & DevOps: AWS (Lambda, S3, ECS, RDS), GCP, Docker, Kubernetes, Terraform, Jenkins, Azure
- Security & Authentication: OAuth2, JWT, SAML
- Testing & Automation: PyTest, JUnit, Cypress, Postman, Jest, React Testing Library, Cypress
- Version Control & Build Tools: Git, GitHub Actions, Maven, Gradle
- Agile & Project Management: JIRA, Confluence, Scrum, Kanban
