Hello and thank you for taking the time to read this. With over 10 years of experience in cybersecurity, 12 years in technology, military experience, and working for companies like Cognizant and Jefferies Financial Group, I know I'm just getting started and would love to be an asset to your company. I'm an expert in security products, architecture, investigations, and deployments. Currently, I lead security initiatives and manage a team of talented security engineers at Cognizant. My technical proficiency touches many technologies and skills (not just the ones listed), I'm also always looking to learn something new on YouTube or relax with a puzzle. Beyond cybersecurity, I'm passionate about algorithmic trading, web development, options trading, and dashboarding data. I'm also proud to mention I'm an experienced Airbnb host with over 500 reviews! To sum it up, I'm always up for a challenge, as evidenced by completing a marathon, building machines to mine crypto, or a 75-mile 5-day hike to Machu Picchu.

EDUCATION

New York University, NYU School of Law and Tandon School of Engineering
M.S. in Cybersecurity Risk and Strategy (Capstone: Supply Chain Security)

DeVry University, Keller Graduate School of Management
M.B.A. with a concentration in Information Security

Rutgers University, School of Communication and Information
B.A. in Information Technology, minor in Psychology

EXPERIENCE

Senior Manager Cloud Security Engineer, Cognizant Technology Solutions, New York, NY

August 2020 – Present

A well versed, extremely flexible role as a Security Engineering Manager on the Enterprise Cloud Security Team.

- **Led the integration of 10+ acquired businesses** during the mergers and acquisitions process, deploying security tools and securing newly acquired environments.
- **Designed and executed a proof of concept for next-generation endpoint security tools**, which was later templated for IT tools and commercialized for customer offerings.
- **Progressed from an individual contributor to a leadership role**, managing a team of 3+ highly skilled security engineers and driving strategic security initiatives.
- **Single-handedly developed the global deployment framework for Endpoint Detection Response solutions**, securing 400,000+ devices across a multinational organization of 350,000 employees and hundreds of MSSP/MSP customers.
- **Created a comprehensive handbook and deployment templates** for testing new security technology, standardizing the vendor management, getting training to the end user, involving leadership and engineers in decisions, mapping out the deployment and implementation processes of each technology.
- **Engineered custom automation scripts using Python, PowerShell, Bash, Batch, and KQL** to streamline security operations, optimize deployment strategies, and enhance product functionality.
- **Collaborated with vendors to pioneer new deployment methods**, often introducing innovative techniques that influenced product roadmaps and vendor best practices.
- **Designed and delivered security training sessions and presentations** at all organizational levels, from frontline analysts to C-suite executives, ensuring effective adoption of security tools.
- **Mastered SIEM platforms, security dashboarding, and multi-cloud environments**, leveraging data analytics to enhance threat detection, response, and operational efficiency in a multi-tenancy environment on a global level.
- **Quickly adapt to emerging technologies**, consistently demonstrating a deep technical acumen and an ability to drive enterprise-scale security transformations.

Associate Security Engineer, Jefferies Group, Jersey City, NJ

May 2016 – August 2020

Focusing on enterprise security, architecture, investigations, and deployments for a global financial institution

- **Subject matter expert** on various anti-virus, endpoint detection and response, and data loss prevention technologies
- **Lead responsibilities** include the entire Symantec endpoint protection and Data Loss Prevention suite, Microsoft Defender ATP, CrowdStrike, Ivanti Device and Application Control, and PowerShell security
- **Implement and maintain** technologies from proof of concept to purchase in platform security, building development, quality assurance, and production environments for proper testing and deployment
- **Analyze** and query SIEM technologies to develop human readable and user-friendly dashboards for ease of hunting
- **Spearheaded** initiatives such as PowerShell code signing, and Microsoft Defender XDR architecture in Azure
- **Architect** environments for proof of concepts with the latest technologies for optimal security
- **Backup** support for MobileIron platform when Lead Engineer needs additional assistance
- **Proficient** in Python, SQL, KQL, SPL, PowerShell, and Unix Command Line

Section Leader, provided guidance and training for junior sailors, Active Secret Clearance

- **Trained and lead** service members on critical missions to increase operational security both overseas and stateside
- **Conducted and maintained** physical security checks, random anti-terrorism measures, and intrusion detection systems
- **Upheld** federal and state penal codes to maintain base integrity and show leadership to junior enlisted Sailors

IT Specialist, Credit Union of New Jersey, Ewing, NJ

May 2014 – May 2016

Support technician for a state sponsored financial institution

- **Administered** virtual machines of various operating systems with an uptime average of over 99%
- **Installed** and managed a newly implemented Voice over Internet Protocol phone system to over six locations in New Jersey while training over 150 users on the operating procedures for the new system
- **Created** VLAN's for the VoIP phone system and VPN connections between networks throughout different locations
- **Configured** Cisco and HP switches, routers, and firewalls for integration with hardware and software in the network
- **Completed** level 2 tier help desk tickets with an average success rate of 125 tickets a month
- **Upgraded** and maintained a software suite utilizing DLP, email filter, and web security using Websense Triton Security
- **Managed** and optimized Microsoft Exchange on virtual servers with Database Availability Group integration

IT Administrator, International Brain Research Foundation, Flanders, NJ

June 2012 – May 2014

Consult on IT as needed at a non-profit that assists patients with traumatic brain injuries, to include PTSD stricken veterans

- **Provided** server maintenance, email management, website upkeep, and end-user support
- **Set** policies using Group Policy Management and manage users in Active Directory
- **Onboarded** new staff about the brain mapping software used and how we can remotely monitor brain activity

PROFESSIONAL ACHIEVEMENTS

Trainings Completed – Symantec SEP/SPE/ATP/DLP, CrowdStrike, Cylance, Palo Alto, Azure, AWS Fundamentals, and much more

Bluejacket of the Year – Awarded to one sailor per installation for outstanding career achievements that year

Navy and Marine Corps Achievement Medal (2) – Awarded to sailors that go above and beyond job parameters

Good Conduct Medal (3) – Awarded to service members with 3 consecutive years of good service

Organizations/ACTIVITIES

Drug Education for Youth – Camp counselor for youth that have parents serving in the military

Leukemia and Lymphoma Society – Raising awareness and fundraising for the fight against cancers

NJPIRG Hunger and Homelessness Campaign – Organized events to gather food from donators and distribute to food kitchens

Portland Public Parks Afterschool Program Math Tutor – Volunteer once a week to tutor math to grade school students

KEY SKILLS

Azure
AWS
GCP
Splunk
Tanium
PowerShell
Microsoft Defender XDR

APIs
HTML/CSS
CLIs/Bash/Batch
KQL
Python
Linux
Dashboarding Extraordinaire

Team Management
Project Management
Incident Response
Threat Hunting
Data Loss Prevention
SQL
Architecture
