

SUMMARY

- Cyber Security Analyst with 3+ years of experience in identifying vulnerabilities, mitigating digital threats, and implementing robust security measures to protect organizational data and assets.
- Proficient in security tools such as Splunk Enterprise Security, IBM QRadar, and CrowdStrike, achieving a 30% reduction in incident response time and improving overall security posture.
- Expert in vulnerability assessments using Nessus and Burp Suite to identify and eliminate high-risk vulnerabilities, enhancing system security.
- Skilled in network traffic analysis, malware detection, and proactive threat hunting, with a strong foundation in security frameworks like NIST-800, OWASP Top 10, and MITRE ATT&CK.
- Experienced in managing security infrastructure (firewalls, IDS/IPS, secure proxies) and collaborating with cross-functional teams to build secure, scalable, and resilient IT environments.

TECHNICAL SKILLS

- Programming Languages: Python, PowerShell, Bash
- Security Tools: Splunk, Wireshark, Nessus, Metasploit, SIEM Platforms, IBM QRadar, ArcSight, SolarWinds, LogRhythm, CrowdStrike Falcon, Microsoft Defender for Endpoint, Carbon Black, Symantec Endpoint Protection, Bitdefender, AWS Security Hub, Azure Sentinel
- Networking: TCP/IP, VPNs, Firewalls, IDS/IPS, DNS, DHCP, ARP, Network Packet Analysis, VPN Configuration and Management, SSL/TLS Encryption, Secure FTP and SFTP
- Frameworks and Standards: NIST Cybersecurity Framework, ISO 27001, CIS Benchmarks
- Cloud Security: AWS Security, Microsoft Azure Security Center, Google Cloud Security Command Center, CloudTrail, Prisma Cloud
- Incident Response: Malware Analysis, Phishing Mitigation, Threat Hunting, Incident Reporting and Documentation
- Compliance: GDPR, HIPAA, PCI DSS
- Soft Skills: Critical Thinking, Team Collaboration, Risk Analysis
- Other Skills: Endpoint Hardening, Network Segmentation, Patch Management, Encryption Techniques, Security Logging and Monitoring, Backup and Disaster Recovery, Security Metrics and Reporting, Secure Software Development Lifecycle (SDLC), Privilege Escalation Detection

PROFESSIONAL EXPERIENCE

Humana	USA
Cyber Security Analyst	June 2021 – Present
• Implemented and supervised network traffic using SIEM tools to identify security threats and minimize possible breaches. • Carried out vulnerability scans and risk assessments to determine the most significant security threats and to apply adequate measures against them. • Implemented security policies and procedures and adhered to guidelines like NIST and PCI DSS. • Conducted research and addressed cybersecurity threats like phishing and malware to reduce business disruption. • Supported in the design and configuration of network security to enhance security of the secured information. • Implementation of automated security monitoring procedures through Python scripts, leading in cutting down the manual workload by 30%. • Conducted training sessions for the staff to enhance their understanding of security measures and avoid human errors that may lead to security breaches. • Continually performed vulnerability scans and penetration tests, which helped to determine the most significant security weaknesses and apply countermeasures. • Implemented security policies and standards, as well as trained the personnel on security measures to increase security consciousness. • Implemented and supervised firewalls, Intrusion Detection Systems/Intrusion Prevention Systems, and endpoint protection software. • Generated detailed reports and risk analysis for the top management with practical solutions for improvement	

EDUCATION

Bachelor of Science in Cybersecurity Western Governors University, USA	October 2026
Boot Camp Certificate: Davis Cybersecurity Bootcamp University of California, USA	May 2021

CERTIFICATIONS

- CompTIA-A+
- Linux Professional Institute Certification
- Google IT Support Professional
- ITIL 4 Foundations
