Profile

I am a senior Frontend Developer who has specialized in React.js and Vue.js. And also have solid experience with hybrid mobile development using React Native, with a strong focus on user experience and performance optimization. Passionate about creating efficient, high-quality code and collaborating with cross-functional teams to deliver innovative solutions.

Professional Experience

Senior Frontend Developer, *inKind* 12/2023 – 01/2025

- Led the development of the Food & Drink application, utilizing React.js, React Native, and TypeScript to create seamless and intuitive user experience.
- Implemented core functionalities, including reservation systems, payment scenarios, cashback logic, and other key features, ensuring a robust and user-friendly application.
- Initiated and led efforts to optimize web application performance, resulting in significant improvements in load times and overall user experience.
- Configured CI/CD pipelines script
- Participated in developing API gateways and cloud solutions.
- Wrote Integration and Unit Testing using Cypress & Jest
- Actively mentored junior engineers, imparting best practices and guiding them through complex coding challenges. Contributed to setting coding standards and reviewing pull requests to maintain high code quality.

Senior Frontend Engineer, System Architect, *Gemstone Lights* 01/2021 – 11/2023

- AWS Infrastructure and Growth: Engineered a customized ERP system using AWS services such as Cognito, DynamoDB, Amplify, IoT Core, Simple Email Service, Lambdas, RDS, and CloudFormation. This system significantly contributed to increasing company sales from \$22million (2021-2022) to \$37 million (2022-2023).
- Lifecycle Management: Orchestrated the end-to-end development lifecycle, from conceptualization and requirement documentation to deployment, maintenance, and feature enhancements. Leveraged GitHub, Jira, and Agile methodologies to optimize development processes, resulting in a 20% boost in efficiency.
- Operational & Manufacturing Efficiency: Automated manufacturing and warehouse operations using QR/barcode scanners, printers, and computer interfaces; developed custom analytics and logging, leading to a 30% improvement in manufacturing efficiency.
- Technical Proficiency & System Architecture: Managed the entire development process, creating a modular and scalable ERP system with 20 backend microservices and multiple frontend React/NextJS services. Utilized JavaScript, TypeScript, NoSQL, SQL, and infrastructure-as-code frameworks.
- Collaborated Cross-Functionally: Facilitated seamless cooperation with the IoT development team to implement analytics, logging, and other functionalities that directly integrated into our ERP system. Coordinated release schedules to ensure the timely achievement of project milestones, promoting unified results in a complex technical environment.
- Security & AWS Collaboration: Enhanced security for our web-based ERP system by securing over 400 endpoints, implementing custom middleware, and integrating token management with AWS Cognito. Collaborated with third-party consultants and AWS solutions architects, significantly reducing security vulnerabilities.
- Strategic Planning & Cost-Effective Migration: Guided roadmap creation, led cross departmental collaboration, managed budgets, and successfully executed a WordPress to AWS transition via lift and shift method.

Frontend Engineer, *SpinSci Technologies* 06/2016 – 12/2020

- Developed and enhanced patient engage portal for omni-channel patient self-service solutions with real-time Electronic Health Record (EHR) integration.

- Collaborated with cross-functional teams to deliver AI-enhanced patient engagement platforms, improving healthcare access and communication.
- Led initiatives to optimize patient workflow efficiency, contributing to enhanced patient experiences and satisfaction.
- Participated in strategic partnerships with major healthcare providers, helping expand the adoption of patient engagement technologies across the industry.
- Managed and maintained the myHusky Android app, regularly publishing updates to Google Play Store that included new features, SDK upgrades, and built-in library enhancements. These efforts contributed to a 15% growth in the app's user base.
- Collaborated with product managers in strategic discussions to define app strategies aimed at increasing user engagement and expanding the user base.

Full Stack Engineer, Streamline Healthcare Solutions

06/2015 – 05/2016

- Developed Healthcare Software frontend using React.js
- Translating design team's UX wireframes and mockups into responsive, interactive features, using HTML/CSS, JavaScript and React
- Building apis using Node.js, Express.js
- Worked on Mobile app development using React Native
- Used Material UI for component library
- Wrote Unit Testing using Mocha and Chai

Education

Bachelor of Science in Computer Science,

2011 – 2015 | Austin

The University of Texas at Austin

Skills

Frontend Development

- React
- React Native
- Angular
- Vue.js
- HTML5
- CSS/SCSS
- Javascript/Typescript

Mobile App Development

- Android - Kotlin/Java
- iOS - Swift/Objective C/SwiftUI
- React Native
- Flutter

Cloud

- AWS(EC2, S3, Lambda, RDS, Amplify, IoT)
- Google Firebase
- Azure

Backend Development

- Node.js
- Express.js
- C#
- Python
- ASP.net

Database

- MySQL
- PostgreSQL
- MongoDB
- DynamoDB
