

ERIK STROM

Senior Software Engineer

+1 (707)213-3212 • estrombuilder@gmail.com • Github: <https://github.com/legendy4141> • Oakland, CA

Summary

Senior Software Engineer with over a decade of experience building intelligent, user-focused platforms in the real estate and property tech sector. Specialized in full-stack development using **React**, **Next.js**, **TypeScript**, **Node.js**, **Python**, **Ruby on Rails** and **Go** to deliver high-performance web and mobile applications. Proven success integrating **LLM-powered assistants**, contextual chat, and automation workflows to enhance user engagement and operational efficiency. Skilled in architecting scalable systems with **AWS**, **Docker**, and **GraphQL**, and implementing real-time features like **WebSockets** and geolocation. Adept at optimizing application performance, driving UI/UX excellence, and collaborating across design, product, and AI teams to build responsive, data-driven digital experiences for millions of users.

My Life Philosophy

If I have seen further, it is by standing on the shoulders of giants.

— Isaac Newton

Education

Yale University

B.A. in Computer Science

2008 - 2012

Experience

reAlpha

Senior Software Engineer

Remote, United States

08/2021 - 01/2025

- Built and maintained the core **web platform** using **TypeScript**, **React**, **Next.js (v14)**, **Tailwind CSS**, and **Radix UI**, delivering a fast, responsive, and modern user experience optimized for performance and accessibility.
- Designed scalable and maintainable UI components with **shadcn/ui**, leveraging **Lucide** icons and **Open Graph** standards to support both visual consistency and SEO.
- Integrated **Claire**, an AI-powered assistant, into the platform using **Python** with **LLM-based APIs** and contextual chat features to provide users with personalized, real-time guidance and support.
- Managed application performance through **Webpack optimizations**, **Priority Hints**, **HTTP/3**, and **Amazon CloudFront CDN**, ensuring fast load times and improved user engagement.
- Implemented interactive map features using **D3.js** and **Google Maps API**, supporting property exploration and dynamic geolocation filtering across the platform.
- Deployed and maintained the platform using **AWS services**, with focus on scalable infrastructure and secure delivery practices aligned with **HSTS** standards.
- Collaborated closely with design, product, and AI teams to iterate on user-centric features and integrate intelligent systems into core workflows.

TurboTenant

Senior Software Engineer

Remote, United States

09/2019 - 06/2021

- Developed and maintained full-stack features using **TypeScript**, **React**, and **Node.js**, powering TurboTenant's web and mobile platforms used by hundreds of thousands of landlords and tenants.
- Built mobile-first experiences using **React Native**, delivering high-quality interfaces and responsive design across iOS and Android environments.
- Designed and integrated **GraphQL APIs** for efficient client-server data handling, and implemented backend services with **PostgreSQL**, **SQL**, and **Sequelize** ORM.
- Participated in agile sprints and cross-functional team collaboration, contributing to all phases of the development lifecycle including **code reviews**, **testing**, and **continuous delivery**.
- Enhanced real-time user engagement with **WebSocket** integrations and notifications, supporting key product workflows like messaging and updates.
- Collaborated with product, design, and QA teams to deliver intuitive, user-centered features in a fast-paced startup environment..
- Contributed to internal engineering improvements, including **codebase refactoring**, **component reuse**, and **performance optimization**, aligning with company growth goals.

Experience

 Opendoor

San Francisco, United States

Senior Full Stack Engineer

05/2016 - 07/2019

- Built full-stack user-facing features using **React**, **TypeScript**, **GraphQL**, **HTML5**, and **CSS**, delivering high-impact digital experiences for home buyers and sellers.
- Designed modular, reusable UI components and scalable architecture within a modern **React + Next.js** ecosystem, contributing to Opendoor's evolving multi-product platform.
- Contributed to backend feature development and debugging using **Ruby on Rails** and **Go**, enabling seamless product integration and system consistency across services.
- Designed and implemented automated solutions using **Python**, **JavaScript**, and **TypeScript**, reducing manual workload and improving operational efficiency across real estate workflows.
- Built and maintained no-code/low-code automations using **Zapier**, enabling rapid iteration of internal tools and reducing turnaround time for business-critical processes.
- Integrated various APIs and third-party services through **XML**, **custom scripting**, and Opendoor's internal systems to streamline data syncing and task automation.

 Zillow

Seattle, United States

Full Stack Software Development Engineer

06/2012 - 04/2016

- Led end-to-end development of web features using **React**, **TypeScript**, **ES6**, and **GraphQL**, enhancing Zillow's real estate platform for millions of monthly users.
- Built and maintained scalable backend services and APIs using **Python**, **C#**, **Java**, **Node.js**, and **Go**, improving performance and reliability across listing, search, and transaction systems.
- Designed solutions using both **relational (PostgreSQL, MySQL)** and **non-relational (MongoDB, DynamoDB)** databases to support flexible and efficient data access strategies.
- Actively participated in Agile processes, contributing to sprint planning, architecture discussions, and continuous delivery using **CI/CD pipelines** and modern development tools.
- Advocated for engineering best practices in **testing**, **system design**, **security**, and **maintainability**, helping raise the technical bar across multiple engineering teams.

Skills

Frontend Development:

React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Radix UI, shadcn/ui, Lucide Icons, Webpack, MUI, Bootstrap, Remix, Vue.js, Angular, jQuery, Zone.js, ARIA, Priority Hints, Open Graph, Responsive Design

Backend Development & APIs:

Node.js, Express, Go, Ruby on Rails, Python (Flask, FastAPI), GraphQL, RESTful APIs, Sequelize ORM, WebSockets, OAuth, gRPC, API Gateway

Machine Learning & AI:

LLMs, NLP, Conversational AI, Python, OpenAI APIs, LangChain, LangGraph, Chatbots, Automation, Recommendation Systems, Contextual Chat, Feature Engineering

Data Engineering & Analysis:

PostgreSQL, MySQL, DynamoDB, MongoDB, SQL, Data Modeling, Real-Time Data, ETL Pipelines, Zapier, Data Automation, Web Analytics

Cloud & DevOps:

AWS (CloudFront, EC2, S3, Lambda), Docker, GitHub Actions, CI/CD Pipelines, HTTP/3, HSTS, Linux, Agile, Performance Optimization, Infrastructure as Code (IaC), No-code/Low-code Automation

Testing & Quality Assurance: Jest, ESLint, Prettier, TDD, Unit Testing, E2E Testing, Linting, QA Best Practices, A/B Testing Infrastructure

Tools & Workflow:

Git, GitHub, JIRA, Confluence, Figma, Markdown, Swagger/OpenAPI, Builder.io, Zapier, Make.com, Agile/Scrum, SDLC, Component Libraries
