ABOUT ME

Experienced Cloud/DevOps Engineer with over 9 years in the field and 11 years in IT, specializing in the management and deployment of IaaS, PaaS, SaaS, and on-prem infrastructures. Expertise spans cloud solutions architecture, automation, and end-to-end deployment processes across physical, virtualized, and containerized environments. Skilled in migrating legacy systems to cloud platforms, optimizing infrastructure with tools like Terraform, Kubernetes, and Ansible, and automating CI/CD pipelines to improve system reliability and reduce deployment times. Proficient in designing scalable, multi-cloud environments using AWS, Azure, and GCP, and implementing cost management frameworks that significantly reduce cloud expenditures. Demonstrated success in improving system performance, enhancing uptime, and ensuring 99.9% SLA compliance through advanced monitoring and alerting solutions. Strong problem-solving abilities and a quick learner, passionate about embracing new technologies and overcoming technical challenges.

WORK EXPERIENCE

Cloud Devops engineer

Dominion Systems [11/2021 – 11/2024]

City: Texas

- Designed and implemented automated CI/CD pipelines using Jenkins and GitLab, reducing deployment times by 50% and improving system reliability.
- Led the migration of legacy systems to AWS and Azure cloud platforms, enhancing system uptime by 25% and reducing infrastructure costs by 40% through efficient utilization of EC2, S3, and Azure Functions.
- Automated cloud resource scaling in AWS and Azure environments with Terraform and Kubernetes, boosting operational efficiency by 30% and minimizing resource-related downtime.
- Created a multi-cloud cost management framework leveraging AWS Cost Explorer and Azure Cost Management, reducing monthly cloud expenditure by 20% through resource optimization.

Cloud engineer

CACI [11/2020 – 11/2021]

City: Arlington, Virginia

- Designed scalable cloud infrastructure solutions utilizing AWS services such as EC2, S3, and Lambda, reducing costs by 30% and enhancing system performance and reliability by 50%.
- Developed and deployed cloud automation frameworks using Terraform and Ansible, increasing deployment efficiency by 40% and enabling seamless scaling across multi-cloud environments.
- Led cloud migration projects to AWS for diverse clients, successfully transitioning over 500 applications with zero downtime and improving operational efficiency by 60% through services like EC2, RDS, and VPC.
- Architected and implemented high-availability solutions on AWS using Elastic Load Balancing and Auto Scaling, achieving 99.99% uptime and ensuring consistent user experiences across global applications.
- Designed a multi-cloud architecture leveraging AWS, Azure, and Google Cloud Platform to enhance data redundancy and compliance, reducing latency by 20% for critical applications.

Cloud Devops Engineer

Tekglobal [04/2017 – 10/2020]

City: Lanham, MD

- Automated deployment pipelines using AWS CloudFormation and Jenkins, reducing deployment time by 50% and improving system reliability across multiple client projects.
- Developed robust CI/CD workflows with Terraform and Kubernetes, decreasing release cycle durations by 40% and enabling seamless feature integration in diverse environments.
- Optimized infrastructure provisioning through Infrastructure as Code (IaC) with Terraform, achieving a 60% reduction in deployment times and ensuring consistency across client environments.
- Led the adoption of serverless architecture with AWS Lambda, API Gateway, and DynamoDB, cutting infrastructure costs by 50% and improving scalability for diverse client applications.

AWS Architect

TEKsystems [02/2015 – 04/2017]

City: Maryland

- Designed and deployed scalable cloud architectures leveraging AWS services such as EC2, S3, and Lambda, increasing infrastructure efficiency and reducing operational costs by 30% across multiple client projects.
- Automated deployment pipelines with AWS CodePipeline and CloudFormation, increasing deployment frequency by 50% and ensuring consistent infrastructure provisioning across diverse environments.
- Migrated legacy systems to AWS cloud using services like RDS and DynamoDB, enhancing database query performance by 25% and improving application uptime by 20%.
- Architected a multi-region disaster recovery solution using AWS Route 53 and CloudFront, reducing failover time by 60% and ensuring business continuity for critical applications.
- Enhanced security protocols with AWS IAM and CloudTrail, reducing unauthorized access incidents by 50% and ensuring compliance with industry standards across deployments.

System Administrator

Vintage CAM [01/2013 – 02/2015]

City: Cameroon

- Deployed automated monitoring tools to streamline server operations, reducing downtime by 25% and improving system reliability across 150+ servers.
- Designed and implemented a centralized backup solution, cutting data recovery time by 50% and ensuring robust disaster recovery capabilities for critical business applications.
- Led a cloud-based infrastructure migration project, transitioning over 200 virtual machines to enhance scalability and reduce operational costs by 30%.
- Developed and enforced a comprehensive network security protocol, increasing threat detection by 40% and protecting critical data for over 500 users with advanced firewall configurations and intrusion detection systems.
- Optimized system performance for 300+ servers by implementing load balancing and resource allocation strategies, improving processing efficiency by 35% and minimizing latency issues.

EDUCATION AND TRAINING

Bachelor in Math and Computer Sciences

University of yaounde 1 • Yaounde, Cameroon [2012]

Certifications

Certified AWS Solution Architect Professional

Amazon Web Services • 2023

Certified AWS Devops Professionnal

Amazon Web Services • 2023

Comptia Security +

Comptia • 2022

Skills

- Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP), Multi-Cloud Solutions, Terraform, AWS CloudFormation, Ansible, Chef, Puppet, Azure Resource Manager (ARM), Docker, Kubernetes, Amazon ECS/Fargate, Google Kubernetes Engine (GKE), Azure Kubernetes Service (AKS), VPC (Virtual Private Cloud), DNS, Load Balancers, CDN (Content Delivery Networks), Firewalls & Security Groups, Hybrid Networks, CI/CD Tools (Jenkins, GitLab CI, GitHub Actions, CircleCI, Travis CI), Version Control (Git), GitOps, Pipeline Automation, Shell Scripting (Bash, PowerShell), Python, Go, Terraform HCL (HashiCorp Configuration Language), SQL Databases (AWS RDS, Azure SQL, Google Cloud SQL), NoSQL Databases (DynamoDB, MongoDB, Firebase), Data Warehousing & Analytics (AWS Redshift, Google BigQuery, Azure Synapse Analytics), Object Storage (AWS S3, Google Cloud Storage, Azure Blob Storage), Data Migration, Cloud-native Monitoring (AWS CloudWatch, Google Operations Suite, Azure Monitor), Log Management (ELK Stack, AWS CloudTrail, Google Cloud Logging), Alerting and Incident Management (Prometheus, Grafana, AWS CloudWatch Alarms, PagerDuty, Opsgenie), Application Performance Monitoring (Datadog, New Relic, Dynatrace), Identity & Access
