SUMMARY

Ex-TikTok Data Science Intern. Recent MS in Business Analytics grad from Emory. Seeking Full-Time Data Scientist/Analyst position. Experienced in Python, SQL, Machine Learning & AWS.

WORK EXPERIENCE

- TikTok**, Data Scientist Intern (TikTok Shop) June 2024 – August 2024
- Developed a **K-means** user clustering model in **Python (Pandas, scikit-learn)** to identify high-lifetime-value segments, implemented personalized engagement campaigns, boosting repeat purchases by 15%.
 - Implemented **time-series (SARIMA)** and **LSTM deep learning models** to accurately forecast demand fluctuations on TikTok Shop, leading to pricing and promotional tactics that elevated GMV by 10%.
 - Established an **A/B testing** framework to compare multiple recommendation algorithms, enabling a 12% improvement in conversion rate through refined traffic allocation.
 - Built multiple **product metrics** and designed a performance dashboard in **Power BI** to track engagement, retention and content virality, refining key KPIs and enhancing insights for marketing teams.
- Pennybacker Capital**, Data Scientist Contractor Jan. 2024 – May 2024
- Built an **ETL pipeline** in SQL Server and Python to consolidate 8+ years of internal real estate data (Azure SQL Database) and external economic data (CSV). Wrote **SQL queries** for efficient data integration.
 - Utilized **Python** to train ML models (**Linear Regression, Random Forest, XGBoost**), uncovering primary real estate valuation drivers and identifying five undervalued properties with a potential 20% appreciation.
 - Implemented classification techniques using **scikit-learn** and **XGBoost** to predict tenant churn, enabling preemptive retention strategies.
 - Leveraged **time-series analysis** to estimate seasonal occupancy fluctuations, driving a 5% lift in occupancy rates and a 10% rise in NOI through optimized leasing schedules.
- Guotai Asset Management**, Data Scientist Intern May 2023 – July 2023
- Wrote **SQL queries (Oracle)** to extract and analyze financial market data from Bloomberg, which were fed into reports to guide asset allocation and investment decisions.
 - Utilized **ARIMA** forecasting to predict monthly revenue patterns for a flagship investment fund, achieving 75% accuracy and revealing key seasonal drivers.
- Haitong Securities**, Business Analyst Intern June 2021 – July 2021
- Analyzed data from 2,000+ customer surveys to uncover financial product trends, using **Tableau** visualizations that informed product development and targeting strategies.
 - Streamlined reporting workflows by automating **Python-based data pipelines**, reducing manual effort and accelerating strategic decision-making.

PROJECTS

- AWS-Powered Neural Style Transfer & Art Generation** artifyai.cc
- Implemented neural style transfer using **TensorFlow** and pre-trained models (e.g., Magenta) to transform user-uploaded images into artistic styles (Van Gogh, Picasso).
 - Deployed model on **AWS EC2** with GPU for real-time, high-performance style transfer.
 - Engineered data pipelines for 500+ WikiArt/COCO images (resizing, normalization) to optimize model input.
 - Integrated **AWS S3** and **API Gateway** for seamless image storage/processing, achieving 5s latency end-to-end.

EDUCATION

- Emory University** Atlanta, GA
- Master of Science in Business Analytics (MSBA)* July 2023 – December 2024
- Bachelor of Business Administration (BBA), Finance/Marketing* August 2020 – May 2023

SKILLS

Tools and Languages: Python, SQL, R, PySpark, Excel, Tableau, Power BI, AWS

Methods: A/B Testing, Hypothesis Testing, Bayesian Inference, Regression Analysis, Time-Series Forecasting
