

Frank Rivera

Senior Software Engineer

New Haven, CT 06511 • frankrivera.work316@gmail.com • + 1 (209) 286-6236

ABOUT

Senior Software Engineer with over 9 years of experience in developing scalable, cloud-based applications. Proficient in both front-end and back-end technologies including Python, Go, JavaScript, TypeScript, Node.js and React, Angular and Vue. Skilled in leveraging AWS services and implementing CI/CD pipelines to create secure and efficient solutions. Focused on enhancing user satisfaction and optimizing operational efficiency.

PROFESSIONAL EXPERIENCE

CIBER

Greenwood Village, CO

SENIOR SOFTWARE ENGINEER

JULY 2020 - Present

- Developed a Property Management Platform for a real estate client, enabling centralized management of tenant information, lease agreements, and maintenance requests.
- Built a Lease Agreement Automation Module using Python and Django, reducing administrative workload by 45% by automating lease generation and renewals.
- Utilized AWS Lambda and DynamoDB to store and manage tenant records securely, ensuring high availability and quick access.
- Designed a Tenant Portal in React, allowing tenants to submit maintenance requests and view payment histories, which increased tenant satisfaction by 30%.
- Integrated GraphQL APIs for seamless data retrieval, reducing latency and improving response times for property managers.
- Developed a Maintenance Scheduling System in Go to track and assign maintenance requests, which reduced response times by 40%.
- Implemented CI/CD pipelines with Jenkins, ensuring efficient deployments and minimizing downtime for new feature releases.
- Enhanced security with AWS Cognito for user authentication and role-based access, ensuring data protection and compliance with privacy regulations.
- Collaborated with property managers to tailor features, leading to an 85% satisfaction rating from users for streamlined property management.

PERFICIENT

St. Louis, MO

SENIOR SOFTWARE ENGINEER

SEP 2018 – Jun 2020

- Built a Healthcare Appointment Scheduling System for a hospital network, enabling real-time appointment booking and management.
- Developed a Resource Allocation Engine in Go to match patient needs with available specialists, reducing wait times by 50%.
- Used AWS Lambda and API Gateway to support serverless backend operations, improving system scalability.
- Designed an Automated Reminder System in Node.js that sent notifications to patients, which reduced no-show rates by 30%.
- Integrated REST and GraphQL APIs to enable secure, cross-platform access to patient data and appointment information.
- Built a Patient Portal in Angular, offering a user-friendly interface for scheduling, cancellations, and updates.
- Established automated workflows with AWS CodePipeline, minimizing manual tasks and reducing deployment time by 70%.
- Conducted security assessments to ensure HIPAA compliance, reducing vulnerabilities by 25%.
- Worked closely with healthcare providers to customize features based on patient feedback, improving satisfaction by 40%.

LEIDOS

Reston, VA

FRONTEND DEVELOPER

MAR 2015 – Aug 2018

- Developed an Employee Training and Certification Platform for corporate clients, supporting customized training programs.
- Built a Course Management Interface in React, allowing administrators to create and assign training modules, which reduced setup time by 30%.
- Designed a Certification Tracker using JavaScript and D3.js to monitor employee progress and compliance in real-time.

- Integrated REST APIs to handle real-time data updates, improving platform performance and user experience.
- Implemented Secure Authentication and Role Management with JWT, enhancing platform security for different user roles.
- Created an Interactive Quiz System in Angular, increasing employee engagement and knowledge retention by 25%.
- Developed an Automated Reporting Module using Node.js, which generated progress reports and reduced administrative workload by 20%.
- Established CI/CD processes to ensure rapid deployment of features and updates, leading to higher client satisfaction.
- Collaborated with HR departments to optimize training features, achieving a 90% satisfaction rate from corporate users.

EDUCATION

ILLINOIS INSTITUTE OF TECHNOLOGY

Bachelor of Science, Major in Computer Science

20010-2014

Skills

- Programming Languages: Python, JavaScript, TypeScript, Go, Java
- Front-End Development: React, Angular, Vue, D3.js
- Back-End Development: Node.js, Express.js, Python, Django, Flask, Go
- Cloud Services: AWS Lambda, DynamoDB, API Gateway, Cognito, CodePipeline
- Databases: DynamoDB
- API Integration: RESTful APIs, GraphQL APIs
- DevOps and CI/CD: Jenkins, AWS CodePipeline
- Security: AWS Cognito Authentication, JWT, HIPAA Compliance, Security Assessments
- Other Skills: Serverless Architecture, Automated Workflows, Resource Allocation, Automated Reporting, Agile Methodologies, Cross-Functional Collaboration, Project Management, User Experience Enhancement
