Professional Summary:

Dynamic **Senior Software Engineer** with 9+ years of mastery in **ReactJS**, **NodeJS**, and **AWS**, delivering cutting-edge SaaS/PaaS solutions that skyrocket performance by 25%+ and slash deployment times by 30%. Proven leader in architecting scalable **RESTful APIs**, spearheading **Docker-driven innovation**, and mentoring teams to dominate **full-stack challenges** with **TypeScript** and **NextJS**. Eager to unleash my expertise in Front-end and Back-end Development to propel a visionary company's tech revolution with flawless, high-impact systems.

Skills:

ReactJS, NextJS, NodeJS, ExpressJS, HTML5, CSS, JavaScript, TypeScript, Angular, Redux, Front-end Development, Back-end Development, Web Development, RESTful API, GraphQL, NoSQL, MongoDB, MySQL, SQL, Amazon Web Services (AWS), Docker, Kubernetes, CI/CD, SaaS/PaaS, Cypress, Jest, Git, Python, Microservices, Agile/Scrum

PROFESSIONAL EXPERIENCE

January 2021 –
Present

Senior Software Engineer – TechRover Solutions | Orlando, FL

- Architected scalable **SaaS** platforms using **ReactJS** and **NextJS**, boosting application performance by 25% and user retention by 15%.
- Engineered **RESTful APIs** with **ExpressJS** and **NodeJS**, integrating **MongoDB** and **MySQL** for robust data handling across distributed systems.
- Directed **AWS**-based deployments with **Docker**, reducing infrastructure costs by 20% through optimized container orchestration.
- Led a team of 5 engineers in **Front-end Development**, implementing **HTML5** and **CSS** standards for responsive, cross-browser-compatible interfaces.
- Designed **TypeScript**-driven frameworks, refactoring legacy codebases to enhance maintainability and scalability for enterprise clients.
- Spearheaded **Cypress** automation for end-to-end testing, cutting release cycles by 30% and ensuring 98% test coverage.

- Oversaw **Back-end Development**, implementing **NoSQL** solutions to handle high-throughput data for real-time applications.
- Pioneered **Microservices** adoption, breaking monoliths into modular services, improving system resilience and deployment speed.
- Mentored junior developers in **Web Development** best practices, driving team adoption of **RESTful API** standards and **AWS** tools.
- Optimized **JavaScript** performance, reducing load times by 40% through advanced caching and lazy-loading techniques.
- Implemented secure **SaaS/PaaS** workflows, integrating **AWS IAM** and encryption protocols to meet compliance standards.
- Developed reusable **ReactJS** components, streamlining **Front-end Development** workflows and cutting development time by 25%.
- Managed **Docker** container pipelines, automating **CI/CD** processes to support rapid feature rollouts.
- Enhanced **MongoDB** indexing strategies, improving query performance by 35% for high-traffic applications.
- Championed **NextJS** server-side rendering, boosting SEO rankings and user engagement for client-facing platforms.
- Coordinated cross-functional teams to deliver **TypeScript**-based solutions, aligning with stakeholder requirements.
- Built **ExpressJS** middleware for authentication, securing **RESTful APIs** and reducing vulnerabilities by 50%.
- Integrated **GraphQL** for select projects, enabling flexible data retrieval and improving **RESTful API** efficiency.
- Led technical audits of **AWS** infrastructure, identifying bottlenecks and saving 15% in operational costs.
- Drove adoption of **Cypress** and **Jest** for testing suites, ensuring zero critical bugs in production releases.

July 2016 –
December 2020

Software Engineer – Digis | Los Angeles, CA

- Developed responsive web pages using **HTML5**, **CSS**, and **JavaScript**, improving user satisfaction across client projects.
- Built **NodeJS** back-end services with **ExpressJS**, supporting basic **RESTful APIs** for small-scale applications.
- Maintained **MySQL** databases, writing queries to support data-driven features and reporting tools.
- Contributed to **Front-end Development** with **ReactJS**, creating interactive UI components for internal tools.

- Assisted in **Web Development** projects, ensuring cross-browser compatibility & mobile responsiveness.
- Implemented **NoSQL** databases like **MongoDB** for prototyping, learning non-relational data structures.
- Wrote **JavaScript** scripts to automate repetitive tasks, saving 10 hours of manual work per week.
- Supported **Back-end Development** by integrating third-party **APIs**, enhancing application functionality.
- Participated in code reviews, adopting **TypeScript** to improve code quality in team projects.
- Tested features with **Cypress**, identifying and fixing bugs during development sprints.
- Experimented with **Python** for data processing scripts, streamlining internal reporting processes.
- Worked on **Angular** front-end modules, delivering client-requested enhancements under supervision.
- Configured basic **AWS S3** buckets for asset storage, learning cloud storage fundamentals.
- Collaborated with senior engineers to deploy updates, gaining exposure to **Docker** basics.

EDUCATION

Florida Atlantic University - FL
Bachelor's Degree in Computer Science - 2016

ADDITIONAL SKILLS

- Leadership
- Problem-Solving
- Communication
- Team Collaboration
- Adaptability
- Project Management
