

Gray Cox

SENIOR FULL STACK ENGINEER

San Jose, California | +1 (831) 272-2398 | graycox51@gmail.com

Summary

Senior Software Engineer with over 8 years of experience in full-stack development using .NET Core, ASP.NET Core (C#), Node.js, Angular and React. Proficient in building RESTful APIs, designing scalable solutions with MS SQL Server, and utilizing front-end technologies like HTML5, CSS3, JavaScript, and Bootstrap. Skilled in MVC, Blazor, and cloud platforms such as Azure, with expertise in object-oriented programming and design patterns. Experienced in DevOps practices, setting up CI/CD pipelines, and working with Docker for seamless deployments. Thrives in Agile/Scrum environments, mentoring technical teams, and conducting thorough code reviews to ensure adherence to SOLID principles and best coding practices.

Education

San Francisco State University, Bachelor's Degree

2011 - 2015

Computer Science

Experience

Wipro | Remote | East Brunswick, New Jersey

Senior C#/.NET Developer

Feb 2020 – Present

- Designed and developed scalable, secure web applications using C#, .NET Core, and ASP.NET MVC, optimizing performance and enhancing user experiences across multiple platforms.
- Reduced system load times by 30% by optimizing SQL queries and implementing caching strategies, improving overall application performance and user satisfaction.
- Developed and maintained RESTful APIs using .NET Core and C#, ensuring secure, high-performance communication between front-end and back-end systems.
- Architected microservices-based solutions using .NET Core and C#, ensuring modular, maintainable, and scalable applications across the platform.
- Implemented background services using C# to handle data synchronization between internal systems and external SOAP web services.
- Developed automated build and deployment pipelines using Azure DevOps, streamlining the release process and reducing deployment errors by 50%.
- Created technical documentation covering system architecture, API design, and workflows to ensure knowledge continuity and facilitate future development.
- Engaged in regular code reviews and knowledge-sharing sessions, fostering a culture of continuous improvement and ensuring adherence to best coding practices.

Framework Solutions | OnSite | Los Angeles, CA

Full Stack Developer

Aug 2017 – Dec 2019

- Built and maintained high-performance, secure APIs using C# and ASP.NET Core, ensuring seamless integration with third-party services and internal platforms.
- Built modular front-end applications using Angular, improving user experience through faster load times and enhanced interactivity.
- Enhanced security by implementing modern authentication and authorization mechanisms, including token-based authentication.
- Reduced bug occurrences by 30% through the introduction of automated testing frameworks and continuous integration practices.
- Designed and implemented highly available, scalable back-end services using microservices architecture, ensuring fault tolerance and improved system performance.
- Developed and enhanced a C#, ASP.NET web application for managing mineral rights, improving the user interface and adding features to streamline operations.

Cleveroad | OnSite | Los Angeles, CA

Web Developer

Jun 2015 – Jul 2017

- Implemented SOAP web services to interface with external data sources, ensuring real-time access to well public record data.
- Improved system performance by 20% through SQL query optimization and database indexing, leading to faster response times and enhanced user experience.
- Designed a custom UI component for mapping wells based on latitude and longitude, utilizing Google Maps API to visualize geographical data.
- Enhanced application functionality by updating legacy components, optimizing database queries, and improving web service performance.
- Worked on improving the user interface with JavaScript, jQuery, and Bootstrap, delivering a more intuitive and responsive front-end.
- Added MySQL database support, improving application scalability and providing greater flexibility for managing data.

Skills & abilities

- Programming Languages: C#, JavaScript, TypeScript
- Frameworks & Libraries: .NET Core, ASP.NET Core, MVC, Blazor, EF Core, Dapper
- Front-End Technologies: Angular, ReactJS, React Native, HTML5, CSS3, Bootstrap
- Databases: MS SQL Server, PostgreSQL
- Version Control: Git, SVN
- DevOps & CI/CD: Docker, CI/CD Pipelines, Azure DevOps
- Cloud Platforms: Azure, AWS
- Software Practices: OOP, Design Patterns, SOLID Principles, Agile/Scrum
- Tools & Technologies: RESTful APIs, Microservices Architecture
- Soft Skills: Team Leadership, Mentoring, Problem-Solving, Communication
