Summary

Experienced Java Developer with approximately 5 years of expertise in designing, engineering, and deploying scalable web applications and microservices using Java 8/11, Spring Boot, and J2EE frameworks. Proficient in crafting RESTful APIs, orchestrating ORM solutions with Hibernate, and integrating front-end technologies such as Angular and TypeScript. Skilled at enhancing CI/CD pipelines with Jenkins and Docker and optimizing cloud deployments on AWS.

Skills

- **Programming Languages:** Java 8/11, J2EE, TypeScript
- **Frameworks & Libraries:** Spring Boot, Hibernate, Angular 14
- **Web Development:** HTML5, CSS3, Bootstrap
- **Messaging Systems:** Kafka, IBM MQ
- **Databases:** Oracle SQL, MongoDB
- **Testing Tools:** JUnit, Mockito, Postman
- **DevOps Tools:** Jenkins, Docker, Git, Jira
- **Cloud:** AWS EC2, S3, CloudWatch

Professional Experience

Java Developer

CenterPoint Energy | Houston, TX | May 2023 – Current

- Engineered a centralized SOA-based business layer serving **1,000+ users**, improving request processing speed by **30%**.
- Designed and deployed **15+ RESTful APIs** using Spring Boot and Hibernate, streamlining data retrieval and integration processes.
- Optimized SQL operations by authoring **30+ advanced queries**, reducing data processing time by **40%**.
- Enhanced UI compatibility for **500+ devices** by crafting responsive web interfaces using HTML5, CSS3, and JavaScript.
- Deployed Spring Boot microservices in **100+ Docker containers**, enhancing scalability and application performance.
- Developed proof-of-concept integrations with Kafka, increasing event-processing efficiency by **20%**.
- Secured applications with Spring Security and OAuth 2.0, reducing security breaches by **15%**.

- Authored and executed **100+ unit tests** with JUnit and Mockito, achieving **95% code coverage**.
- Reduced operational costs by **25%** by optimizing AWS deployments with Lambda, API Gateway, SNS, and SQS.

Java Associate

Wipro | Hyderabad, IN | **Oct 2020 – Aug 2022**

- Designed and deployed **25+ microservices** with Spring Boot, handling **10,000+ transactions/day** through REST APIs.
- Achieved **20% faster code execution** by implementing efficient design patterns and best practices.
- Secured API access with Spring Security and OAuth 2.0, ensuring **100% compliance** with security protocols.
- Migrated **5+ applications** from SQL to MongoDB, increasing data retrieval speed by **35%**.
- Reduced release cycles by **25%** through automated deployment pipelines with Jenkins and Docker.
- Developed Angular SPAs serving **500+ daily active users**, enhancing UI interactivity and responsiveness.
- Optimized backend services for **high-volume tasks** using AWS Lambda and SQS, improving throughput by **30%**.

Software Engineer

Mu Sigma | Bengaluru, IN | **Jan 2019 – Sep 2020**

- Built Java-based web solutions processing **10 million+ transactions/month**, ensuring **99.99% uptime**.
- Enhanced authentication systems, reducing unauthorized access incidents by **15%**.
- Delivered **20% faster component communication** by designing JMS-based messaging systems.
- Reduced response times by **25%** by integrating interactive GUIs with AJAX and JavaScript.
- Authored **200+ unit tests** using JUnit, achieving **90%+ application reliability**.

Education

Master of Science in Computer Science
Lamar University | Beaumont, TX | **May 2024**
