

Hetal Shah

14605, 34th Ave N Plymouth, MN 55447 | 781-323-0423 | hetalthakar2007@gmail.com

Professional Summary

- A results-driven Business Systems Analyst with over 4 years of experience, specializing in both Agile and Waterfall methodologies.
- Expert in user requirements elicitation, business process mapping, interface design (including wireframing and interactive prototypes), project management, SDLC, and data management, ensuring efficient project delivery.
- Proficient in managing stakeholders through requirement-gathering sessions, business process observations, and team interviews, with a focus on producing comprehensive Business Requirement Documents (BRDs) for clear and thorough understanding of business needs.
- Facilitated and conducted daily scrum, JAD (joint application development) sessions with end-users, clients, stakeholders, and development team.
- Skilled in crafting detailed user stories in Agile/Scrum environments, aligning them with business objectives and user-centered design principles, and assisting product owners in breaking down epics for smooth sprint delivery.
- Experienced in leading user story mapping workshops to prioritize and organize stories, contributing to a focused, value-driven roadmap.
- Conducted data analysis using SQL to identify key business trends and recommend process improvements.
- Adept in modeling business processes with Data Flow Diagrams (DFD) and Entity-Relationship (ER) Diagrams for enhanced system functionality and data flow visualization.
- Collaborated with cross-functional teams to define API integration requirements and translate them into technical specifications.
- Contributed to system architecture and database model design to align with both business and technical needs.
- Led testing efforts across unit, integration, and User Acceptance Testing (UAT) phases, ensuring compliance with business and technical requirements.
- Worked closely with developers to create comprehensive system documentation, including functional specifications, FRDs, and technical manuals.

Experience

BUSINESS SYSTEMS ANALYST | FREELANCE/VOLUNTEER | NOV 2023 - PRESENT

- Business Process Management System Redesign (Aug 2024 – Dec 2024)

Problem Statement

The client is a mid-sized fiber-to-fashion apparel manufacturer with an annual revenue of USD 350,000. Its suppliers are based in China, Bangladesh, and India, and sales operations are focused on the US, India, and the Middle East. The objective was to lift and shift the existing supplier onboarding and inventory management system to the cloud and completely redesign the user experience.

Tool Stack: Figma, Postman

Objectives Accomplished

- Participated in requirements gathering workshops, and documented the as-is state of the database and current pain points of the Order Management System web application.
- Work closely with the solution architect to define the to-be state of the application in the cloud. Create an ER diagram based on data requirements and a system interaction diagram in Visio.
- Conduct a heuristic analysis of the User experience journey and recreate user experience journey maps for the target state application.
- Using FIGMA, design intuitive, responsive, and accessible wireframes.
- Key features of the application include: - Supplier onboarding, order placing based on inventory data, data cataloging, the geographical segmentation of trade volume, inventory routing, and payment processing.
- Define the data requirements for the applications and specify Restful API configuration, build JSON payloads for input and output queries, and test the APIs in Postman.

- **Patient data management system for Dental clinic (Nov 2023 – April 2024)**

Problem Statement

The client is a multi-specialty dental clinic with services related to oral oncology surgeries, periodontist services, and orthodontist services

Tool Stack: Figma

Objectives Accomplished

- Build a website that registers patient data, procedures, insurance, and payment details and helps doctors track patient history.
- Create User experience workflow and user journey maps.
- Review prototype and design recommendations with client stakeholders.
- Followed principles of user-centered and responsive design to support multiple viewports for the client teams.

BUSINESS SYSTEMS ANALYST | WISHTREE TECHNOLOGIES | AUG 2020 – JUL 2022

- **Business Process Management System**

Partner Organization of UNDP

Tech Stack: ReactJS | Angular | Node JS | MongoDB

Servers and Hosting: Microsoft Azure

The application facilitated organizational change by improving cross-departmental coordination and enhancing the overall budgeting efficiency across all levels of the organization.

- Led a cross-functional team of 4 software engineers, 2 QA specialists, and 1 designer throughout the Software Development Life Cycle (SDLC), ensuring timely and efficient delivery of the project.
- Implemented the Principle of Least Privilege to reduce security breaches by 85%, significantly enhancing system security.
- Developed and integrated User Account Control (UAC) features, including user group permissions and role-based access control (RBAC), ensuring 100% compliance with client requirements and best practices.

- **Learning and Development Platform**

Partner organization of UNDP

Tech Stack: ReactJS | Angular | Node JS | MongoDB

Servers and Hosting: Microsoft Azure

The application equips users with the tools, resources, and opportunities to expand their knowledge and raise awareness about the responsible use of global resources. It provides a personalized, intuitive platform to explore, track, and manage your learning journey. Key features include engaging interactive content, collaborative learning experiences, and skill development through a variety of training resources.

- A multi-lingual platform that allows members to log in and access learning modules and training materials in their preferred language.
- The application analyzes data collected from learning and development workshops to enhance learning resources. It also enables the creation of customized workshop expectations and feedback forms, tailored to members' language preferences. This feature has helped the organization reduce analysis time by 50%.
- Additionally, the application tracks workshop costs, sponsorship funds, and the total training hours spent by tutors.

- **Dealer Onboarding Platform**

Leading HVAC organization of US

Tech Stack: Angular | TypeScript | JavaScript | Red Hat Linux

Servers and Hosting: Apache

Developed an eCommerce platform for a leading HVAC organization in the US, enabling efficient customer management, real-time pricing, and inventory scanning. Designed and implemented features to optimize customer interactions, streamline pricing updates, and ensure real-time inventory tracking, improving operational efficiency.

- Redesigned business processes, reducing the dealer onboarding cycle time by 48 hours, enhancing operational efficiency, and speeding up platform adoption.
- Improved user experience (UX) by conducting usability reviews, identifying UX issues, and proposing design recommendations, resulting in an enhanced user interface and increased client satisfaction

PROJECT COORDINATOR (BUSINESS ANALYST) | UPLERS | JAN 2020 – AUG 2020

- Enhanced digital applications for clients by conducting market research and competitive analysis, resulting in more targeted and effective marketing strategies.
- Managed HubSpot CRM to track customer interactions, leads, and sales opportunities, boosting lead conversion rates by 25%.
- Utilized HubSpot email marketing tools to launch segmented email campaigns, achieving a 17% increase in open rates and a 15% increase in click-through rates.

MARKETING/BUSINESS ANALYST | ICICI PRUDENTIAL LIFE INSURANCE | MAY 2019 – DEC 2019

- Analyze customer attributes to enhance targeting strategies, resulting in increased life insurance policy sales.
- Benchmarked industry trends and conducted a competitive analysis to drive sales for both new and existing customers.

- Planned and executed marketing activities and events, increasing brand awareness and generating high quality leads for the sales team.

Education

MASTER OF BUSINESS ADMINISTRATION | JUL 2017 - MAY 2019 | INSTITUTE OF MANAGEMENT, NIRMA UNIVERSITY

- Related coursework: Certificate in Markstat STRATX Simulations (Market analysis tool), Certificate in Lean Six Sigma Green Belt (KPMG), Business Analysis and Project Planning, Management Information systems, Database Management and Data Analytics.

COMPUTER SCIENCE AND ENGINEERING | JUN 2011 – MAY 2015 | GUJARAT TECHNOLOGICAL UNIVERSITY

- Related coursework: Academic Project for Institute: Scheduling system (.Net, C#, SQL) – Duration 1 year

UI/UX BOOTCAMP | SEPT 2024 – MAR 2025 (ONGOING) | UNIVERSITY OF MINNESOTA

- A professional course focusing on user experience (UX) research (requirement analysis and defining user persona) and user interface (UI) design principles and practices, gaining expertise in creating user-centered designs and improving usability.

Skills

- Requirement gathering, analysis, and backlog grooming
- User story writing
- Information Architecture
- SQL
- Postman
- UML
- Figma
- HTML and CSS
- Agile methodologies
- User Acceptance testing

Certifications & Courses

1. Certified SAFe 5 Practitioner – A certification focusing on Agile project management methodologies, provided by Scaled Agile, Inc.
2. Completion of the learning session "How to understand and take action on global goals" (United Nations Global Compact).
