

Hrithik Harsha

Full Stack Developer

hrithikhg16@gmail.com | 571-306-1338 | Plano, TX

Full-Stack Java Developer with 4+ years of experience designing and deploying scalable web applications across the SDLC in Java/J2EE environments. Facilitated in building responsive React and Angular frontends with Node.js and developing RESTful microservices using Spring Boot. Worked on optimizing database performance and deploying applications on the cloud with integrated CloudWatch monitoring. Built modern UI architectures using Redux for state management and component-driven design to enhance performance. Known for delivering high-quality solutions, improving system efficiency, and contributing features that drive business impact.

TECHNICAL SKILLS

Languages	:	C, C++, Core Java, Java 8, SQL, Swift, C#, Python.
Frameworks/Libraries	:	Spring MVC, Hibernate, React.js, Angular, Spring Boot, SOAP, Microservices, , Spring Security, API Gateway (APIGEE), Node.js.
IDE's	:	NetBeans, IntelliJ IDE, Eclipse, Xcode, Visual Studio Code.
J2EE Technologies	:	Servlets, JSP, JavaBeans, JDBC.
Web Technologies	:	HTML, CSS, Bootstrap, JavaScript, TypeScript, jQuery, Ajax, JSON, REST, XML, GraphQL.
Application Server	:	Apache Tomcat, AWS, Azure, OCI.
Databases and Platforms	:	MySQL, Oracle, DB2, PL/SQL, SQL Server, PostgreSQL, NoSQL, Tableau, Windows, Linux.
Automation & Build	:	Maven, Gradle, JUnit & Mockito, Cucumber, Jenkins, SonarQube, Postman, Swagger, MS Visio.
Infrastructure & Monitoring:		Docker, Kubernetes, Terraform, Kafka, Kibana, Splunk, Spark.
Version Control Tools:		Git, GitHub, Git Bash, Git Lab, Jira, Bit Bucket.
Methodology	:	SDLC, Agile.
Certifications	:	AWS Certified Solutions Architect – Associate.

PROFESSIONAL EXPERIENCE

Assurant | Java Full stack Developer | United States

Jan 2024 – Current

- Managed API traffic with API Gateway, ensuring secure and reliable web services. Engineered serverless microservices using AWS Lambda, integrated with DynamoDB for storage, and streamlined messaging with SNS/SQS.
- Engineered secure microservices using Spring Boot and Java 11, enforcing security protocols and integrating Kafka for event streaming and messaging.
- Boosted web app performance by 40% using Node.js load balancing, boosting user engagement by 25%. Led migration from Angular 11 to Angular 15 in collaboration with cross-functional teams in an Agile environment.
- Integrated Hibernate (JPA) ORM to map object-oriented models to relational databases like MySQL and NoSQL databases like MongoDB.
- Configured Tomcat and Jenkins CI/CD pipeline for 6 projects, reducing deployment time by 25%. Adopted Splunk for log monitoring and established AWS S3, Lambda monitoring with CloudWatch integration.
- Conducted functional validations using Postman for APIs and deployed automated testing using JUnit, resulting in a 90% improvement in bug detection.

Wipro | Software Engineer | Hyderabad, India

Jun 2021 – Aug 2022

- Designed scalable microservices with Spring Boot and Spring Cloud, secured RESTful APIs using OAuth2.0, and optimized services to boost response times by 35% and user engagement by 30%.
- Crafted reusable asset components for institutional websites using React, JavaScript, and Oracle WebCenter Sites 12c, elevating user experience and engagement by 15%.
- Architected AWS integration using EC2, Lambda, Code Pipeline, Code Build, and Step Functions, with CloudWatch and CloudTrail for monitoring, achieving 40% faster issue resolution.
- Employed JUnit and Selenium automated testing frameworks, slashing manual testing efforts by 95% and enabling early bug detection.
- Enhanced data storage solutions using PostgreSQL and Cosmos DB, optimizing query performance and data retrieval times.
- Orchestrated containerized applications with Docker and Kubernetes on Amazon EKS, ensuring high availability through multi-AZ deployments and automated scaling via Kubernetes HPA and AWS Cluster Autoscaler.

Gigabyte Infocom | Software Developer | Hyderabad, India

May 2019 – Apr 2021

- Built an automated reporting tool using JDBC to execute Oracle SQL queries and an SMTP client library for weekly email reports, improving data reporting efficiency by 25%.
- Revamped user-facing features with Angular and Node.js, boosting user engagement and traffic by 40%, leveraging Azure for cloud deployment and implementing asynchronous data retrieval via RESTful APIs, SOAP, and AJAX.
- Optimized e-commerce web applications using Java, Spring MVC, jQuery, HTML, and Bootstrap, improving website speed by 20% through enhanced performance techniques.
- Coordinated L2 support by overseeing the full incident lifecycle—logging, tracking, resolution, and analysis while leveraging deep understanding of application architecture, business logic, and component interactions.
- Established JUnit test cases for unit testing and test suites for end-to-end testing, utilizing JIRA to track project stories in Agile methodology.

EDUCATION

Masters in Computer Science

Clemson University, SC, USA.

Bachelors in Engineering, Computer Science and Technology

Sathyabama Institute of Science and Technology, Chennai, India.
