Summary

Experienced SAP ABAP Developer specializing in custom functionality development within SAP systems. Proven track record at Deloitte, delivering successful projects involving reports, interfaces, and forms, including implementing the DRF framework. Passionate about driving process transformation through SAP to boost business efficiency and productivity. Led a team toward delivering objectives.

Experience

Calndr.io

Austin

Head of Integration and Custom Solutions

09/2024 - Current

- Manage and deliver the initial integration projects to ensure the core functionality of calendr.io.
- Designing and developing custom features that enhance the basic version of the platform, tailored to early user feedback using Python.
- Proactively identify and implement improvements to drive innovation and efficiency as we develop the basic version of calendr.io.
- Managing projects adhering to high standards, ensuring timely completion in a startup environment.

Deloitte

Mumbai

S4 HANA Developer | Consultant

04/2022 - 02/2023

- Presented effort estimation analysis for object delivery to client management for annual budgeting and forecasting.
- Collaborated on testing plans for integration testing, reducing failure risk by 80%.
- Developed ALV reports to make data more transparent and easier to work for clients for the FI module.
- Led a team to develop custom SAP S/4 HANA solutions for finance, achieving a 20% boost in processing efficiency.
- Successfully delivered 100% of objects on schedule by optimizing feeders and thorough testing.

Deloitte

Mumbai

Business Technology Analyst

04/2018 - 03/2022

- Created multiple interfaces using Data Replication Framework (DRF), Application Integration Framework (AIF), proxy, file interface, and IDocs.
- Implemented custom ABAP reports and function modules to boost financial data analysis and processing.
- Designed, documented, and implemented numerous smart forms with dynamic content for sales and purchase order data.
- Extended the ACDOCA table with custom fields to capture business-specific data within the Universal Journal.
- Streamlined PMO communication, ensuring consistent updates to teams and clients throughout the development, testing, and analysis phases.
- Improved report development and user experience using SAP Smart Forms and drag-and-drop functionalities.
- Composed ALV reports to enhance data transparency and usability for order-to-cash (SD) and procure-to-pay (MM) processes.
- Coordinated with teams to ensure timely delivery of compliance-specific activities, effectively addressing and resolving client concerns.
