PROFESSIONAL SUMMARY

Talented Cloud Solutions Architect with over 12 years AWS experience. Focused on security, hybrid data-center/cloud environments, migrations, Big Data analytics, databases, streaming . Confident and organized team leader. Thirty+ years of progressive data-center, network, storage, virtualization, security and customer management experience. Diverse experience across health, financial, E-commerce, Government, Oil and Semiconductor verticals.

SKILLS

AWS

- Hands-on AWS Technical Architect with 12 Years experience developing and deploying hybrid enterprise solutions.
- AWS solutions encompass IAM, MSK, SES, Snowball, Connect, Lex, Docker/ECS, EC2, VPC, S3, EFS, Kinesis, Lambda, Directory Services, Cloud Formation, RDS, EMR , DynamoDB and Redshift.
- Deep practical knowledge of Migrations. MRA, CAF ,WAR
- Security tools: IAM, KMS, Okta-SCIM, Cognito, API Gateway, Cloud Trail, Cloud Watch, Trusted Advisor, Keycloak.

WORK HISTORY

Lytix , Solutions Architect

San Diego, CA • 12/2021 - 02/2025

- Supporting ongoing migrations of two data centers to AWS and simultaneous creation of cloud-native AWS solutions enabling Lytx to succeed in its mission: driver safety first.
- Designed and deployed a cross-enterprise single sign on solution for IAM using Active Directory groups, Okta IdP and on-the-fly attached roles/permission sets.
- Initiated Email project to migrate from on-prem exchange to Amazon Simple-Email-Service and Mail Manager.
- Day-to-day support of engineering concerning design and performance of their AWS solutions.
- Application support on MongoDB and Tinybird
- Member of data governance/security review team.

Database

- QLDB, MySQL, MariaDB, Postgres, Oracle, SQL server

O.S.

- Windows, Ubuntu, RedHat, Amazon Linux, CentOS

CI/CD-Code development

- Jenkins, CloudFormation, Git, Taskcat, Chef

Networking

- AWS WAF, F5, Cisco, Converged Switches

Virtualisation

- Kubernetes, Docker, Amazon ECS, VSphere/ESX, HyperV, WLS2

Languages

- PHP, Bash, Python, 'C', Javascript, JSON

ADDITIONAL

- US Government Security Clearance (needs renewed)

EDUCATION

University of Kent

Canterbury,
England. • 06/1989

PhD : Electronic Engineering

University of Edinburgh

Edinburgh,
Scotland. • 07/1986

B.Sc. Honors : Astrophysics

AWS, Amazon Web Services - Partner Solutions Architect

Palo Alto, CA • 07/2018 - 11/2021

- Communicated migrate-to-cloud readiness strategies to customer and APN partner senior business leaders
- Leveraged AWS Workload Migration Program (WMP) best practices to ensure data, application stacks and security needs were met during and post-migration
- Analyzed and optimized migration methodologies and spend using AWS, APN partner and customer tooling
- Created and published Goto-Market collateral including Migration guides, Blogs, and joint partner Webinars
- IAC via CloudFormation, Terraform and Taskcat

MAPR(HPE Ezmeral Data Fabric) - Senior Professional Services Field Engineer

Palo Alto, CA • 07/2014 - 06/2018

- Prepared green-field and existing environments to use MAPR streaming, storage, database , Spark and Hadoop stack elements for Big Data analytics.
- Tracked and mitigated key changes to project that could affect cost, completion date or customer relationship.
- Produced operational collateral for customers

Dell Inc (purchased Scalent) - Senior Solutions Architect

Santa Clara, CA • 07/2006 - 06/2014

- Participated in all phases of AIM deployment life cycle from requirements analysis, system implementation to generation of acceptance and operational documents.
- Delivered training, project planning and architectural diagrams to 20+ unique customers
- Centralized on-demand booting, switch and converged networking support often reduced op-ex by 90%

Cassatt Corporation - Senior Infrastructure Architect

San Jose, CA • 01/2004 - 06/2006

- Wrote and implemented detailed architectural design plans, security requirements and specifications
- Worked with business analysts and different subject matter experts to gather and define requirements, identify constraints and plan scopes including SAP

IBM (Rational) - Senior Unix Engineer

Cupertino, CA • 09/2000 - 11/2003

- Migration Rational Developer Network IBM Southbury

- Managed Production environment for 500,000 internet based Rational Customers and 100+ internal engineers
- Enabled Rational University to cut costs by 75%.
- DB2 NAS to SAN conversion: 70% less expensive 200% faster
- Deployed Websphere Rational Developer Network portal

Taos Mountain Inc - Senior Staff Consultant

Santa Clara, San Jose, CA • 07/1997 - 09/2000

- Designed and implemented mission critical solutions in systems, security and network arenas.
- Managed 4 Taos consultants on day-to-day basis.
- Installed new switched network fabric for 250+ engineers.
- Reduced Cadence/Synopsys simulation times by 300%
- 8 month ramp up of from 8 to 200 engineers
- Enabled BGP4 Cisco based LAN-WAN failover
- Wrote tools saving \$50k/month in Exodus ISP charges.

General Magic - Unix Project Manager

Sunnyvale, CA • 11/1996 - 06/1997

- Designed, priced, procured and implemented heterogeneous UNIX Solaris/IRIX environment reducing IT spend by 25% by re-negotiating vendor support contracts
- Support Manager resolving customer and partner issues
- Implemented MagicTalk NT that evolved into GM On-Star

Taos Mountain Software - Senior Unix Administrator

Santa Clara, CA • 07/1995 - 11/1996

- Tuned US West customer billing Oracle server after performing detailed analysis of it's schema and physical data layout on HP hardware making it 220% faster.

Legend Systems Ltd - Director

London, England • 01/1993 - 06/1995

- Designed and deployed solutions at Barclays der Zoette Wedd, Industrial Bank of Japan International, European Bank Reconstruction & Development (EBRD) and Chevron.

Baring Securities Limited - Senior Systems Administrator

London, England • 11/1991 - 01/1993

- Geo-dispersed VAX-Clusters and Oracle. Futures. Settlements. Emerging markets

University of Oxford - Systems Manager

Oxford, UK • 11/1989 - 11/1991
