

Andrew Lee

Senior Full Stack Engineer

+1(281)721-0607 | andylee99626@gmail.com | Houston, TX | LinkedIn

Professional Summary

Experienced **Full Stack Engineer** with over **7 years** of building dynamic, scalable applications for top-tier **SaaS platforms** like **Slack** and **Atlassian**. Specialized in **Node.js** backend development, with a deep focus on building RESTful APIs, microservices, and serverless architectures. Expertise in frontend technologies including **React**, **Angular**, and **TypeScript**. Proven ability to drive **integration systems**, **real-time data processing**, and **developer tools** that enhance **cross-team collaboration** and **product scalability**. Passionate about optimizing performance, improving developer experience, and deploying cloud-native solutions with **AWS**. Strong advocate for **automation**, **CI/CD pipelines**, and **agile practices** in high-growth environments.

Work Experience

Senior Full Stack Engineer | Atlassian

January 2021 - Present

Led the development of a Node.js-based SDK and integration framework across Atlassian products (Jira, Confluence, Bitbucket), enabling seamless third-party connections with platforms like Slack and Microsoft Teams.

- Architected and developed backend services using **Node.js** and **Express.js** to handle high-volume event traffic between Atlassian products and external services like **Slack** and **Microsoft Teams**.
- Built modular **async** microservices using **Node.js** and **AWS Lambda** to enable scalable and reliable integration workflows.
- Enhanced front-end interfaces by building **React** and **Angular** applications, allowing teams to interact with integration configurations and monitor third-party service status in real-time.
- Implemented **WebSocket** and **Socket.io** for real-time data processing, ensuring a seamless and low-latency user experience.
- Improved integration performance and fault tolerance with **Redis** caching and **DynamoDB** for event tracking and state management.
- Led the design of **CI/CD pipelines** using **Bitbucket Pipelines** and **Docker**, ensuring consistent and reliable deployment across environments.
- Contributed to the automation of internal tooling for developers using **Node.js**, enabling better log parsing, monitoring, and reporting.

Tech Stack: Node.js (Express.js, NestJS), JavaScript (ES6+), TypeScript, React, Angular, AWS Lambda, WebSocket, Socket.io, Redis, DynamoDB, PostgreSQL, Docker, Bitbucket Pipelines, Slack API, Microsoft Teams API, REST APIs, CI/CD

Full Stack Engineer | Slack

June 2017 - December 2020

Focused on building highly scalable features, integration frameworks, and enterprise-grade automation capabilities for Slack's collaboration platform using Node.js for both frontend and backend solutions.

- Designed and implemented backend microservices using **Node.js**, **Express.js**, and **GraphQL**, enabling efficient data retrieval and communication for third-party integrations (Jira, GitHub, Google Calendar).
- Developed **React** and **Angular** components for the Slack web client, improving the user experience and enabling powerful real-time workflows.
- Expanded Slackbot's capabilities by creating backend workflows using **Node.js**, automating repetitive tasks and reducing user support queries.
- Integrated **Node.js** with **Redis** to optimize caching layers, improving message delivery and reducing latency by 25%.
- Contributed to internal developer tools using **Node.js** for CI job orchestration, build scripts, and real-time deployment notifications.
- Worked cross-functionally with designers and product managers to iterate on features and ensure alignment with customer needs.

Tech Stack: Node.js (Express.js, GraphQL), React, Angular, TypeScript, JavaScript (ES6+), Redis, MongoDB, MySQL, Jenkins, Docker, Kubernetes, GraphQL APIs, Slack API, OAuth2, AWS (Lambda, S3, IAM, CloudWatch)

Technical Skills

- **Backend: Node.js (Express.js, NestJS), JavaScript (ES6+), TypeScript, REST APIs, GraphQL, microservices, serverless architecture**
 - **Frontend: React, Angular, Redux, Webpack, TypeScript, JavaScript (ES6+)**
 - **Database & Messaging: MongoDB, MySQL, PostgreSQL, Redis, DynamoDB, Kafka, WebSocket, Socket.io**
 - **Cloud & DevOps: AWS (Lambda, S3, CloudWatch, IAM), Docker, Kubernetes, Bitbucket Pipelines, Jenkins, CI/CD**
 - **Tools & APIs: Slack API, Microsoft Teams API, Git, Jira, Confluence, Agile/Scrum**
-

Education

University of California, Santa Cruz

*Bachelor of Science in **Computer Science** (2013 - 2017)*
