SENIOR SOFTWARE ENGINEER

Senior Software Engineer with 9+ years of experience designing, developing, and optimizing scalable software solutions. Leads high-performing teams, driving end-to-end development, and implementing innovative technologies to enhance system efficiency and user experience. Proven expertise in Python (Django, Flask, DRF, Celery, Redis), .NET Core, React, TypeScript, and cloud architectures (AWS, Azure, Docker, Microservices, KafkaJS, CI/CD) within Agile environments. Successfully led cross-functional teams, reduced project delivery timelines, and enhanced application performance by implementing event-driven architectures, Elasticsearch analytics, GraphQL APIs, and AI-driven automation. Strong background in DevOps, cloud computing, test automation (Cypress, TDD, Unit Testing), and machine learning (PyTorch, Pandas, NumPy). Recognized as a top performer and recipient of multiple "Employee of the Month" awards. Committed to optimizing backend scalability, refining frontend experiences, and delivering high-impact, AI-driven, and cloud-native solutions.

TECHNICAL SKILLS

- **Frontend:** JavaScript (React, Redux, ES6), TypeScript, HTML, CSS, Tailwind, Bootstrap, Material UI, NPM, Vite, JSON Web Token, DOM
 - **Backend:** Python (Django, Flask, DRF, Celery, Redis), .NET Core, C#, Node.js, MVC, Entity Framework, ASP.NET, FastAPI, XML, Asynchronous Programming
 - **Databases:** RDBMS, RDS, MySQL, NoSQL, GraphQL, PostgreSQL, MongoDB, OAuth, JWT
 - **DevOps & Cloud:** AWS (S3, EC2, Lambda, ECS, RDS, SQS), Azure, Docker, Microservices, Kafka JS, CI/CD (Git version control, GitHub, GitLab, Actions, Azure DevOps, Jenkins), Kubernetes, ELK (Elasticsearch), GCP (Google Cloud Platform)
 - **Tools:** Visual Studio 2019, and SQL Server Management Studio
 - **Testing:** Cypress, TDD, Unit Testing, Jira
 - **Machine Learning & Data Processing:** PyTorch, Pandas, NumPy, ML/AI, TensorFlow
-

EMPLOYMENT HISTORY

8Bit Solutions | Senior Software Engineer

October 2022 – Present

- Developed an LLM observability system with Flask, PostgreSQL, and Elasticsearch, accelerated query performance by 40% while processing terabytes of data.
- Designed a Celery-Redis processing pipeline, reducing request duplication by 40% and improving task execution efficiency.
- Engineered cost and token analytics with Elasticsearch, delivering real-time insights across 100K+ API requests daily.
- Enhanced PostgreSQL performance using partitioning and indexing, reducing query latency by 50%.
- Deployed Flask microservices with Docker, guaranteeing 99.99% uptime and scalability.
- Instituted 50+ Pytest tests with Redis mocking, ensuring API, Celery, and PostgreSQL reliability.

Prisim IT Solutions | Software Engineer

March 2019 – October 2022

- Facilitated cross-functional collaboration, expediting the design phase by 20% using Python, React, and TypeScript.
- Streamlined project delivery time by 15% by optimizing resource allocation through advanced estimation analysis.
- Managed end-to-end project planning and execution, improving code quality and cutting technical debt by 20%.
- Integrated Cypress tests with Azure DevOps and KafkaJS, reducing regression bugs by 30% and enhancing deployment reliability.
- Optimized backend logging, improving system monitoring efficiency by 25%, and led a frontend redesign, increasing user satisfaction by 18%.

Nodlays | Full Stack Developer

February 2015 – March 2019

- Directed an 8-member team to deliver AI solutions, ensuring 100% on-time delivery for 12 high-priority projects.
 - Revamped an AI-driven B2B sales platform, increasing client acquisition by 15% and onboarding DELL, Nutanix, and NTT Data.
 - Enhanced project execution by 10% through better requirement gathering, reducing miscommunication and optimizing workflows.
 - Conducted code reviews and mentoring, increasing team productivity by 15% while maintaining code quality.
 - **Tech Stack:** Microservices, Python, Django, React, TypeScript, MySQL, PyTorch, Pandas, NumPy, TDD, AWS.
-

EDUCATION

BS in Software Engineering

University of Houston
